Manufacturer: MOMCOZY

Referention number: DNxGHJKOKRMMH

Information:

Momcozy GP01 is a 950 ml breast milk storage container, made from durable borosilicate glass that is resistant to temperature changes. It is food-safe, BPA-free, and ensures hygienic storage of milk while preserving freshness and nutritional value. The airtight silicone seal protects against leaks, and the precise spout makes pouring easy without wasting any milk. The ergonomic handle allows the container to be comfortably operated with one hand, while the wide opening makes cleaning easier. It is a practical, durable and multifunctional solution for breastfeeding mothers.

Full product description

Momcozy breast milk storage - innovation and safety

Momcozy GP01 is an innovative **breast milk storage container** that provides indispensable support for every active mother. This **container** with a capacity of 950 ml has been designed to make the process of **feeding** easier, allowing expressed milk to be safely **stored** in ideal conditions. Thanks to it, **Momcozy breast milk** retains its freshness and valuable nutrients, which is crucial for the health and proper development of your **infant**. This **storage-type accessory** makes everyday organisation simpler, and every portion of food is always ready to serve.

Durability and resistance to extreme temperatures

The exceptional **construction** of the vessel is based on the use of high-quality borosilicate glass, which translates into its remarkable durability and resistance to damage. The **milk container** is unaffected by sudden changes in **temperature**, so it can be used without concern both for chilling in the fridge and for sterilisation at high temperatures. For the **Momcozy** brand, safety is a priority, which is why the product is completely free from **BP** (BPA-free) and has a **food-grade** certification. By choosing this **portable** jug, you can be sure that **breast milk** does not come into any harmful reactions with the vessel material.

Reliable sealing and protection against leaks

The key element protecting the contents is the **silicone** sealing component, which effectively prevents leaks and protects the milk from external contamination. This **breast milk storage container** has been fitted with a thickened seal, guaranteeing complete tightness even during transport, making it an ideal product for parents on the move. Thanks to the precisely shaped spout, pouring liquid into the **bottle** is completely hygienic and prevents wasting even a single drop of precious milk. Every mother will appreciate the fact that **milk storage** with this product becomes a safe and predictable process.

Ergonomic solutions for storing breast milk

User ergonomics is another advantage offered by the **Momcozy** brand in its premium products. The **comfortable** and sturdy handle makes it easy to operate the vessel with one hand, which is extremely important when the other hand is caring for an **infant** or doing other household tasks. The wide mouth of the vessel (wide-mouth) makes the **container** extremely easy to wash thoroughly, which shortens the time needed to prepare for the next stage, namely **breastfeeding** or giving expressed milk. This professional **accessory** (available as **1 pc**) allows you to prepare milk quickly and maintain the highest standards of sterility in the home kitchen.

Multi-purpose Momcozy breast milk container

Although the product's main purpose is **breast milk storage**, its **multi-purpose** nature allows for much broader use in the household. The **jug** can serve as a **collector** or a vessel for preparing formula, as well as for storing other healthy liquids such as juices or infusions. The ideal **fit** of the vessel's dimensions to the doors of most fridges allows you to make optimal use of the available space. **Momcozy** proves that one well-designed product can effectively support an **infant** and mother at many stages of development, from the first days of life right through to the time of introducing solid foods.
