FIMI

Manufacturer: FIMI

Referention number: DNXXGNJMFRMMHI

Full product description

Meet the FIMI Mini 3 Standard - a drone that redefines standards in its category.

Equipped with advanced navigation systems, a high-quality camera and a lightweight and portable design, it is the perfect tool for exploring and documenting the world from the air. Its unparalleled precision and ease of use make it an ideal choice for both beginners and experienced drone pilots.

FIMI MINI 3

FEEL FREE TO FLY

250g-Class Ultralight Design | 4K/60fps Video
SoLink Dual-Band 9KM Video Transmission | AI Super Night Video

Recording in 4K/60fps

The drone captures videos in 4K resolution at 60 frames per second, capturing every dynamic moment with complete precision. Enjoy smooth motion scenes, higher resolution and higher frame rates for advanced post-production and lossless zooming.

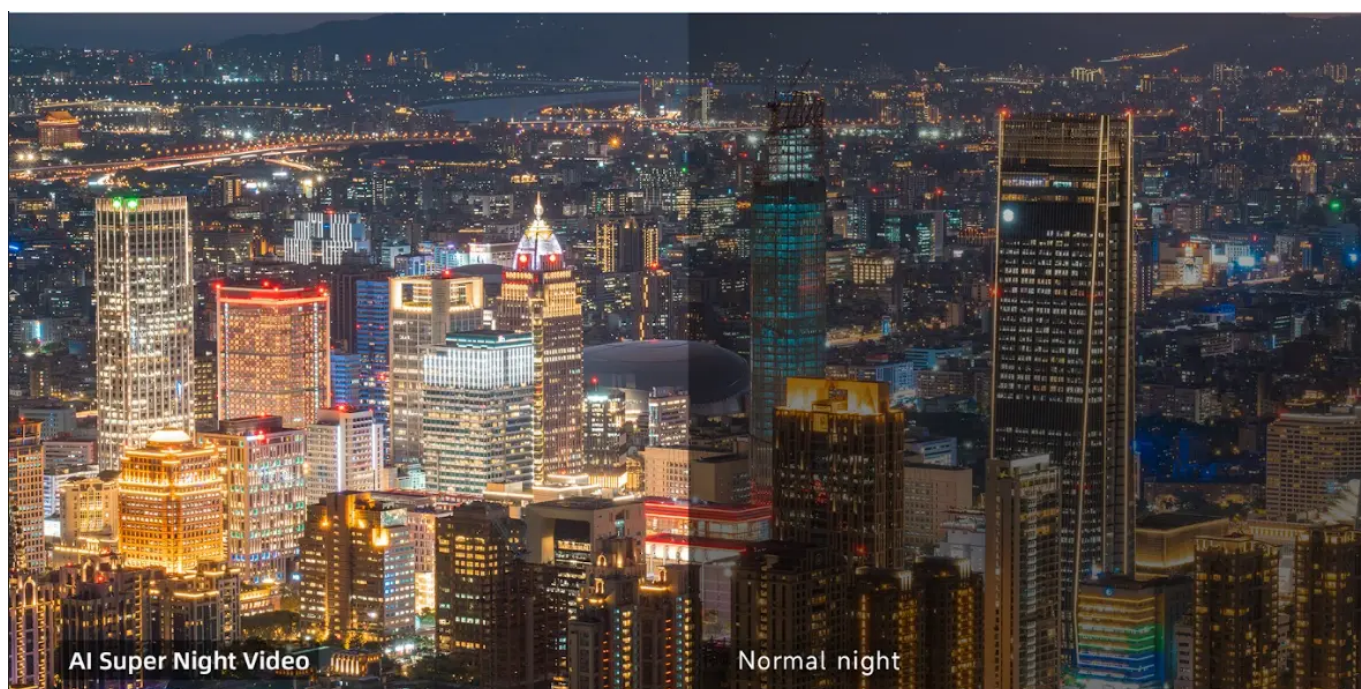

Ultra-compact and lightweight design

The FIMI Mini 3 weighs less than 250 grams, so it requires no special training or permits to fly in most places. Its compact design makes it as handy as a smartphone, easy to carry and store.

Night recording mode

A new generation AI ISP processor with super light sensitivity and noise reduction features increases the signal-to-noise ratio by up to four times. The drone captures clear and transparent images even in difficult lighting conditions.

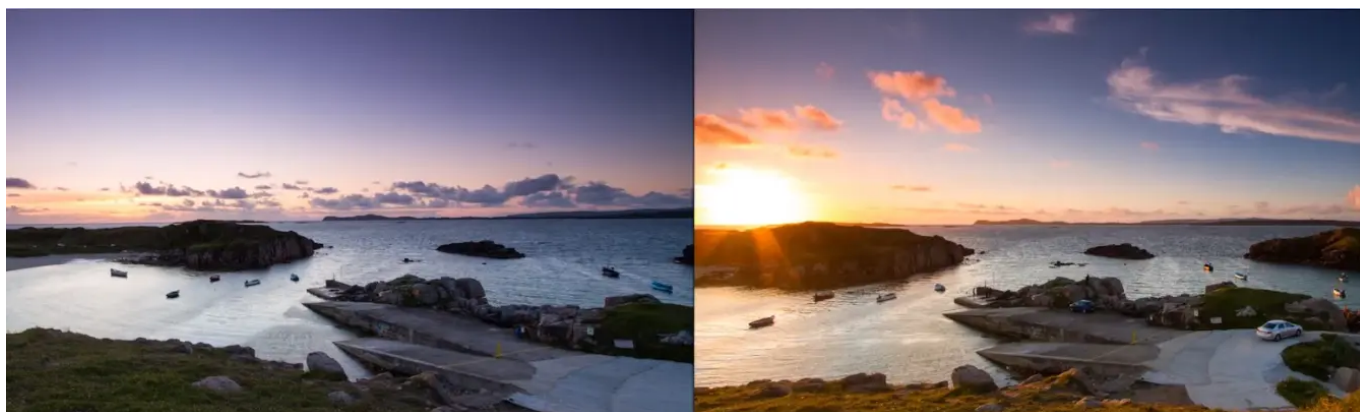

Video transmission system for 9 km

The FIMI Mini 3 is equipped with the new SoLink HD digital transmission technology, enabling live high-definition transmission up to 9 kilometers. The technology minimizes delays of up to 120 milliseconds, ensuring smooth and stable video transmission.

8K time-lapse photography technology

With groundbreaking 8K time-lapse photography technology, the drone captures and displays each shot with ultra-high precision. The advanced imaging system makes it easy to create impressive cinema-quality time-lapse videos.

Mechanical three-axis gimbal

The advanced three-axis brushless gimbal combined with the new LOS stabilization algorithm provides excellent control precision down to 0.005° . Even when flying at high speeds in strong winds, footage remains smooth and stable.

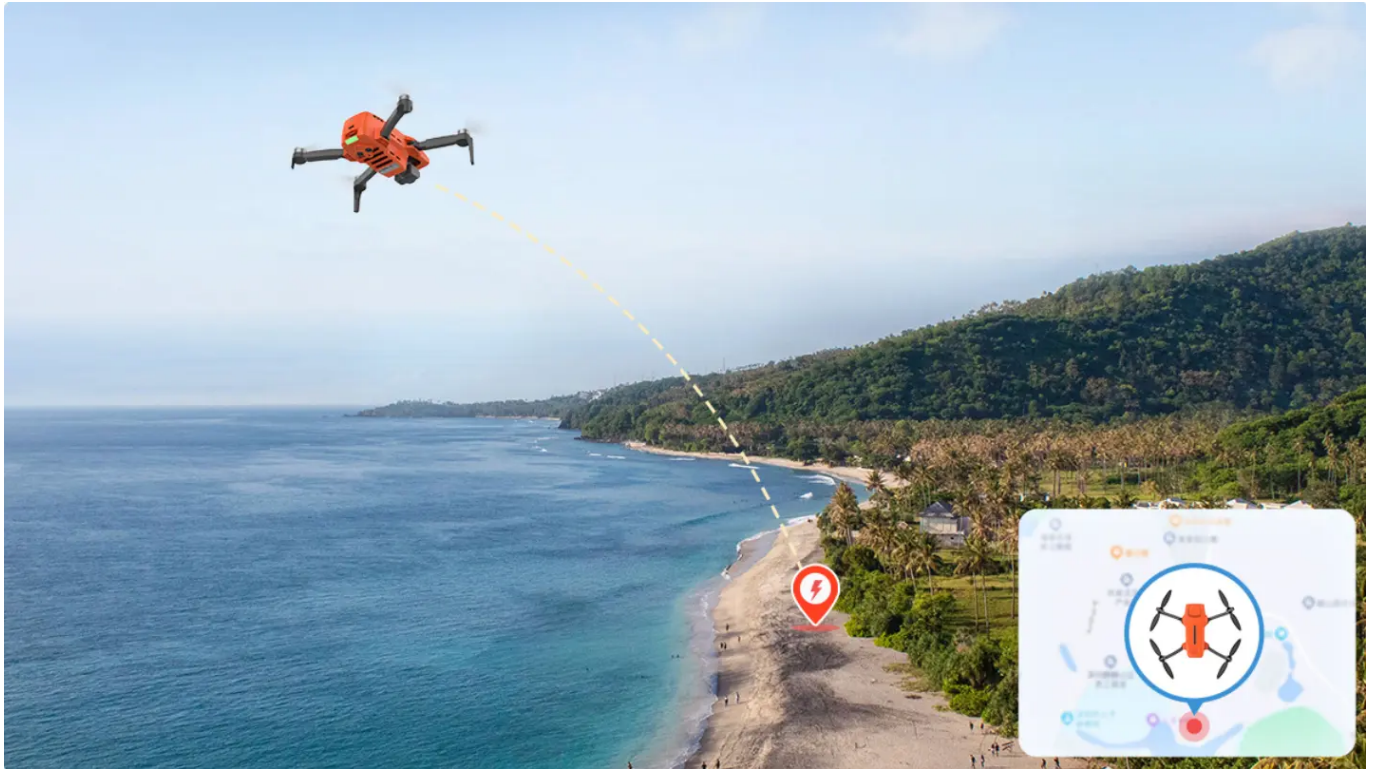

Resistance to strong wind

The drone is equipped with motors with minimal magnetic backlash and efficient and quiet propellers. As a result, it offers a higher thrust-to-weight ratio and faster response, ensuring safe flight even in difficult wind conditions.

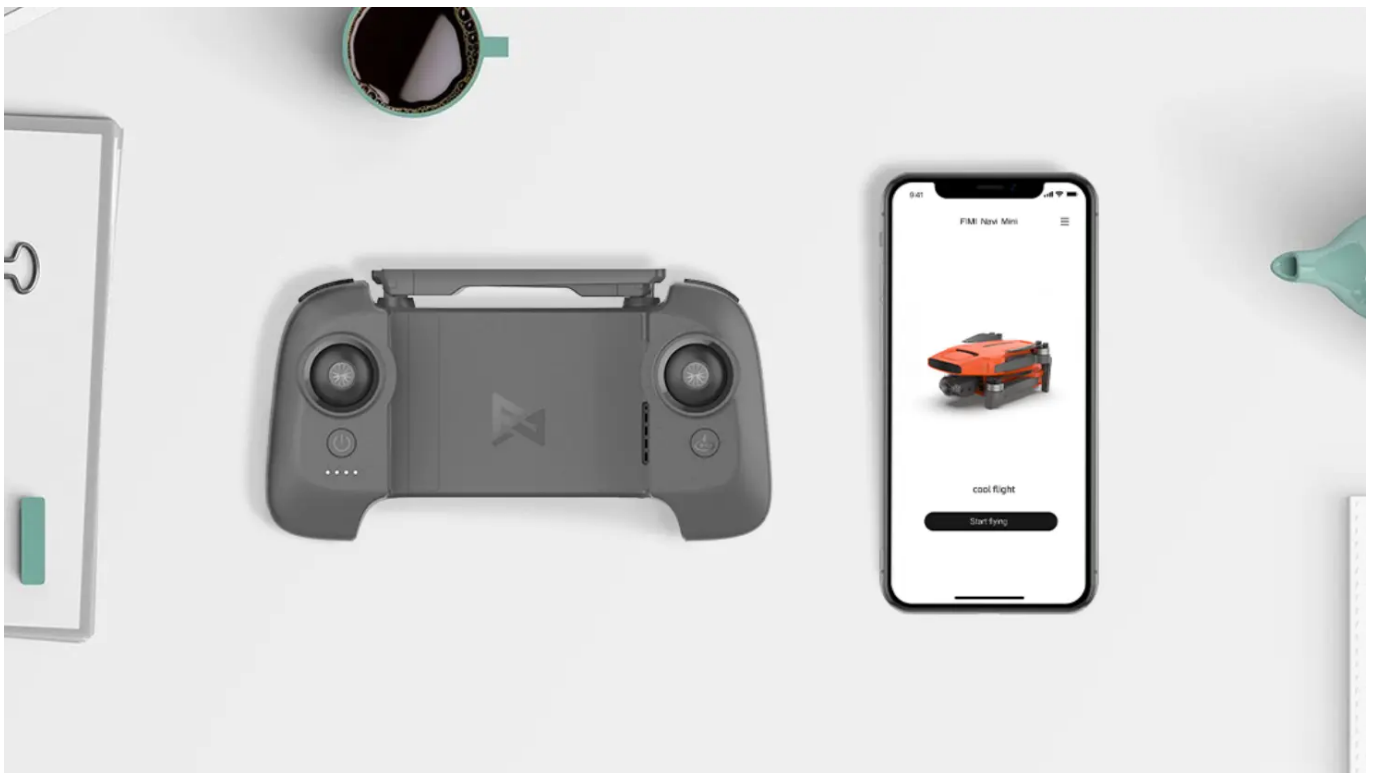

Satellite positioning system

The FIMI Mini 3 drone's positioning system can simultaneously receive signals from GPS, GLONASS, Beidou and Galileo. This provides faster and more accurate positioning for more efficient takeoffs and better in-flight protection.

Remote Controller

The lightweight and handy remote controller is easy to carry and use. The improved receiver provides more stable video transmission for better drone control and higher video quality.

Application

The app's completely redesigned interface makes it more intuitive and easier to use than ever before. The plug-and-play feature allows the controller to be connected to a mobile device via an OTG cable, eliminating the need for complicated setup.
