Manufacturer: MOMCOZY

Referention number: DNXXGHJKOMRMMNP

Information:

Momcozy GP01 is a 950 ml breast milk storage container, made from durable borosilicate glass that is resistant to temperature changes. It is food-safe, BPA-free, and ideal for storing milk in the fridge as well as for sterilisation. The airtight silicone seal protects against leaks and contamination, while the precise spout makes hygienic pouring into a bottle easy without wasting a drop. The comfortable handle ensures one-handed use, and the wide opening makes thorough washing easy. It is a practical, portable, and multifunctional solution for breastfeeding mothers.

Full product description

Momcozy breast milk storage - innovation and safety

Momcozy GP01 is an innovative **breast milk storage container**, which provides indispensable support for every active mother. This **container** with a capacity of 950 ml has been designed to make the process of **feeding** easier, allowing expressed milk to be safely **stored** in ideal conditions. Thanks to it, **Momcozy breast milk** retains its freshness and valuable nutritional properties, which is crucial for the health and proper development of your **infant**. This **Storage** type **accessory** makes everyday organisation simpler, and every portion of food is always ready to serve.

Bezproblemowe czyszczenie

Z łatwością utrzymasz higienę dzbanka na mleko

The exceptional **design** of the vessel is based on the use of high-quality borosilicate glass, which translates into its remarkable durability and resistance to damage. The **milk container** is unaffected by sudden changes in **temperature**, so it can be used without concern both for chilling in the fridge and for sterilisation at high temperatures. For the **Momcozy** brand, safety is a priority, which is why the product is completely free from **BP** (BPA-free) and has a **food-grade** certification. By choosing this **portable** jug, you can be sure that **breast milk** does not react with the vessel material in any harmful way.

Reliable sealing and leak protection

The key element protecting the contents is the **silicone** sealing component, which effectively prevents leaks and protects the milk from external contamination. This **breast milk storage container** has been fitted with a thickened seal, guaranteeing complete tightness even during transport, making it an ideal product for parents on the move. Thanks to the precisely shaped spout, pouring liquid into the **bottle** is fully hygienic and prevents the waste of even a single drop of precious milk. Every mother will appreciate the fact that **milk storage** with this product becomes a safe and predictable process.

Ergonomic solutions for storing breast milk

Ease of use is another advantage offered by the **Momcozy** brand in its premium products. The **comfortable** and sturdy handle makes it easy to operate the vessel with one hand, which is extremely important when caring for an **infant** with the other hand or carrying out other household tasks. The wide-mouth opening means the **container** is exceptionally easy to wash thoroughly, which shortens the time needed to prepare for the next stage, namely **breastfeeding** or giving expressed milk. This professional **accessory** (available as **1 pc**) allows you to prepare milk quickly and maintain the highest standards of sterility in the home kitchen.

Multi-purpose Momcozy breast milk container

Although the product's main purpose is **breast milk storage**, its **multi-purpose** nature allows for much broader use in the household. The **jug** can be used as a **collector** or a vessel for preparing formula, as well as for storing other healthy liquids such as juices or infusions. The ideal **fit** of the vessel's dimensions to the doors of most fridges allows the available space to be used optimally. **Momcozy** proves that one well-designed product can effectively support both **infant** and mother at many stages of development, from the first days of life through to the period of introducing solid foods.
