### Information:

The Momcozy bottle brush set is a practical and safe solution for parents who want to thoroughly clean bottles, teats, breast pumps and tubes. The patented Push-Press technology with silicone bristles creates a dense foam, increasing washing effectiveness and reducing cleaning time. The ultra-soft food-grade silicone is gentle on surfaces, does not scratch and is free from BPA, PVC and phthalates. The complete 360° set reaches hard-to-access areas, while the non-slip handles, hanging option, compact design and travel pouch ensure convenience at home and on the go.

### Full product description

### Convenience in washing bottles

The **Momcozy bottle brush set** offers a breakthrough solution for every parent. Thanks to the patented Push-Press design, the silicone bristles create a thick foam, which is difficult to achieve with standard brushes. This is a **complete set** of 360° cleaning tools that takes care of every nook and cranny of the bottle, teat and tube. Made from safe **food-grade silicone**, it enables hygienic, scratch-free washing.

### Push-Press System

Traditional silicone brushes often struggle to produce foam, which reduces washing efficiency. The Momcozy set solves this problem thanks to its **press-to-foam** structure. This technology makes it easy and quick to obtain **thick foam**, which contributes to thorough cleaning. A simple press is enough to activate the foaming action, which **significantly shortens washing time** and delivers better hygienic results. This is a key feature that sets this product apart from other silicone brushes available on the market.

### Safety and Gentleness

The brush bristles are made of **ultra-soft silicone**, which is effective at removing residue while remaining exceptionally gentle. This means washing does not cause **any scratches** on bottles, breast pumps or accessories. This is especially important for expensive bottles and delicate teats. In addition, the entire set is made from **food-grade silicone**, free from harmful substances such as **BPA, PVC and phthalates**. This helps protect your child's health and safety during every feed.

### Versatile Tools

Momcozy offers a comprehensive approach to cleaning baby accessories. The set includes several heads to meet a variety of cleaning needs. This makes it possible to reach all corners and crevices, regardless of the diameter of the item. In addition to the main brush for bottles and

breast pumps, it includes an angled head for teats and slim brushes for tubes and narrow openings. This provides **comprehensive cleaning** of all components, which is essential for maintaining full sterility.

## Ergonomics and Convenience

The designers also considered parental comfort. The brush handles have an **anti-slip coating**, ensuring a secure and comfortable grip even with wet hands. There is also an option to hang the handles, which helps with hygienic storage and faster drying. The brush design is also **detachable and compact**. This construction, combined with the included **travel bag**, makes storage and transport easy. As a result, bottle hygiene is simple, whether you are at home or on the go.

## Who is this product for?

- Parents and carers looking for a **more effective method** of cleaning bottles than traditional brushes.
- People who value **material safety** (food-grade silicone, free from BPA, PVC and phthalates).
- Users of breast pumps and bottles with unusual shapes that require **360° cleaning**.
- Families needing a **compact and hygienic** cleaning set for travel.

## Benefits

- **Intense foaming:** The patented Push-Press technology generates thick foam, maximising the effectiveness of removing milk residue and deposits.
- **Scratch protection:** The ultra-soft silicone bristles ensure that cleaned surfaces remain perfectly smooth and undamaged.
- **Versatile set:** The set includes brushes designed for bottles, teats and tubes, enabling complete cleaning of all accessories.
- **Convenient to carry:** The detachable design and special **travel pouch** make the set ideal to take on any trip, ensuring hygiene away from home.
