Manufacturer: MOMCOZY

Referention number: DNKGJOIQRMMKP

Information:

Momcozy AZ01 Multi-Function Baby Scale is a multifunctional electronic baby scale for home monitoring of a child's development from the first days of life. It enables simultaneous measurement of weight and height, and the quick result in 2 seconds reduces errors with a restless infant. The contoured, non-slip tray ensures stability and safety, while the tare function allows the weight of a blanket or clothing to be deducted. The clear LED display with backlighting and 180° rotation makes reading easy, and the choice of units kg, g, lb, oz and lb:oz increases convenience. Once the platform is removed, the device can be used as a floor scale for older children and adults, and the load capacity of up to 150 kg makes it a universal solution for the whole family.

Full product description

Momcozy AZ01 Multi-Function Baby Scale - Electronic baby scale

The Momcozy AZ01 Multi-Function Baby Scale is a multifunctional measuring device designed to monitor the physical development of children from the first days of life. This practical product combines the functions of precise body weight and length measurement, allowing key growth parameters to be checked at the same time. The device is suitable for home use, making it easier for parents to collect data regularly without the need for visits to medical facilities. Its stable construction and simple operation make the product suitable for everyday use in homes with a baby.

Stabilny pomiar

Tray design and safe profile - Momcozy technology

The measuring platform is based on a shaped, curved tray that creates a stable surface for a lying child. This element is made of durable materials with anti-slip properties, which prevents the little one's body from moving during the measurement. A special lower fastening system allows the tray to be firmly locked onto the main base, eliminating the risk of wobbling components. The device features a modular design - after removing the upper platform, the product turns into a floor scale that can be used by older children and even adults, significantly extending its useful life.

Fast measurement and functionality as a Multi-Function Baby Scale

As an advanced **multi-function** scale, the device provides a measurement result in 2 seconds, reducing errors caused by the child moving. A 60 cm (23.6 inch) measuring scale is marked on the tray surface, making it easier to carry out the task of **height measurement**. The accuracy is 5 g for loads up to 20 kg and 50 g in the range from 20 kg to 150 kg. The product has a wide load range from 50 g to a maximum of 150 kg, making it a universal measuring instrument for the whole family.

Łatwe przechowywanie

Control panel and unit changes in the Unit system

The front of the housing features a clear **LED** display with a night backlight function, which makes it easier to read the readings in poor lighting conditions. The device allows smooth management of the unit system using the **unit** button, offering 5 options: kg, g, lb, **oz** and lb:oz. In addition, the implemented **tare** function allows the weight of a blanket, hygienic pad or clothing to be deducted, ensuring the actual **weight** reading is obtained without having to place the baby directly on the cold plastic.

Changing the viewing angle and saving energy

The thoughtful **design** of the device includes a function for changing the text viewing perspective on the screen. By holding the selection button for longer, the user can rotate the displayed digits by 180 degrees, allowing convenient reading of the result regardless of whether the carer is standing or sitting. The built-in memory module automatically saves the last used unit and the set viewing angle. The automatic shut-off function cuts the power after 2 minutes of inactivity, which optimises battery consumption included in the set and prepares the device for the next **use**.

Key advantages

- The wide load range of up to 150 kg allows the product to be used by babies, older children and adults.
- The dual measurement system enables simultaneous determination of body weight and physical length on one platform.
- The tare function automatically subtracts the weight of textiles, ensuring a precise measurement result.
- The detachable tray design makes the device easy to store in small spaces and transport.
- The backlit LED display with a 180-degree rotation option ensures convenient reading from any position.

The product is intended for

- Parents who want to monitor babies' weight gain and growth systematically and accurately.
- People looking for a universal measuring instrument with a high load capacity for all family members.
- Pet owners who need a stable platform for checking the weight of dogs or cats.
- Those who value easy-to-assemble modular devices with an automatic shut-off function.
