momcozy

Manufacturer: MOMCOZY

Referention number: DNXGHJKOJRMMLI

Information:

Momcozy NP001 is a multifunctional, adjustable nursing pillow that provides comfort for mum and safety for baby during breastfeeding or bottle-feeding. Its ergonomic shape relieves pressure on the back, neck and shoulders, while the adjustable waist strap keeps the pillow securely close to the body, eliminating the gap between parent and little one. The Safety Guard border helps prevent the baby from slipping, and the memory foam filling provides durable, stable support. The pillow grows with the child, and is also suitable for tummy time and learning to sit. The cover is machine washable, making it easy to keep clean.

Full product description

Momcozy NP001 - multifunctional and adjustable nursing pillow

Momcozy NP001 is an innovative **adjustable nursing pillow**, designed to provide maximum comfort during one of the most important activities in the lives of **mother and child**. This **multifunctional and adjustable pillow** makes both **breastfeeding** and **bottle feeding** moments free from muscle tension. Thanks to its thoughtful design, the **Momcozy nursing pillow** encourages better posture, relieving the parent's spine and neck. **Feeding** becomes easier, and the little one can suckle calmly while lying in the optimal position.

Ergonomic design and adjustable strap for ideal support

The key element that sets this product apart is the **adjustable** waist strap. It ensures that the **pillow** fits snugly against the body, eliminating the gap between parent and baby. The **adjustable pillow** adapts to almost any body shape, providing a **stable** and safe foundation for **feeding**. Its **ergonomic** shape offers the necessary **arm support**, which is invaluable when frequently latching on. As a high-end **nursing pillow**, **Momcozy** guarantees that every **breastfeeding** session will be associated with relaxation rather than back pain.

Ergonomic Momcozy pillow with a safe border

The innovative "Safety Guard" design acts as a **safety barrier** that wraps around the baby and prevents them from slipping during feeding. Such a **high-density foam nursing pillow** provides excellent **support**, allowing mum a moment of rest or the freedom to use one hand. Although **Momcozy** is sometimes mistaken for the category of a **pregnancy pillow**, its main purpose is professional support during the postnatal period and infancy. The **breastfeeding pillow** is an essential part of every baby kit, increasing the sense of safety for **mother and child**.

Memory foam nursing pillow with a safe border

The **memory foam nursing pillow** filling offers the perfect balance between softness and firmness. The **Momcozy nursing pillow** does not sink under the baby's weight, which is crucial for keeping the little one's airways clear. Due to vacuum transport, the **pillow** needs around **48 hours** to regain its full fluffiness and shape after unpacking. The **Momcozy pillows** technology used makes the **support** durable and ensures it does not lose its properties even after many months of intensive use.

Multifunctional product growing with your child

Momcozy NP001 is a **multifunctional** product that supports a child's development at different stages. Initially, it serves as a classic **breastfeeding pillow** (0+ m), but it quickly becomes a help when learning to lie on the **tummy** (6+ m) and support when the little one starts sitting independently (9+ m). **Tummy** exercises with such stabilisation are much more enjoyable for the baby. **Feeding** by bottle also becomes more convenient for other family members, who can safely hold the baby while benefiting from the advantages offered by this **pillow**.
