Information:

Momcozy PF01 Portable Stroller Fan is a portable, multifunctional fan for a stroller, car seat or cot, helping to protect your child from overheating on warm days. The flexible stand made of metal and silicone allows stable mounting on various surfaces, and the 360° rotating head lets you direct the airflow exactly where it is needed. Four speed levels, including a natural wind mode, provide comfort tailored to your little one's needs. The 8000 mAh battery guarantees long operation of 12-27 hours, and USB charging increases ease of use. In addition, the built-in LED lamp with white light and colour mode makes evening walks easier and gives a sense of security.

Full product description

Momcozy PF01 Portable Stroller Fan - Portable stroller fan

The Momcozy PF01 Portable Stroller Fan is a multifunctional and portable stroller fan, designed to provide optimal airflow for little ones on warmer days. The device makes everyday walks easier, and when mounted on a stable frame it protects the child from overheating while resting outdoors. This versatile product works perfectly as an accessory for a pushchair, offering a constant airflow in varying environmental conditions. Its compact design means it can be taken on any trip with ease, improving your little one's thermal comfort.

Tripod design and high flexibility - Momcozy technology

The device is based on a flexible mounting frame. This integrated tripod is made of high-quality metal and silicone, allowing the legs to be bent at any angle, wrapped around a rail, or placed on a flat surface. The tripod design enables versatile and convenient use with pushchair frames, cot structures and car seats. In addition, the new version of the device features a modified front guard, where the smaller gap (below 5 mm) fully protects the child and prevents little fingers from accidentally touching the rotor blades.

Airflow adjustment and 360° rotation in any direction

The device offers wide-ranging air distribution options. The movable fan head allows full vertical and horizontal rotation in any direction, making it easy to direct the stream of cooled air precisely without having to change the mounting position of the base. The Momcozy Portable Stroller Fan model offers 4 operating speeds, including 3 speeds for different uses and a special variable mode. This fourth level is a natural breeze that mimics airflow in open spaces, which is most suitable for a baby's sensitive body.

Efficient 8000 mAh battery and USB charging

At the heart of the device is an integrated high-capacity 8000 mAh power cell. The technology used ensures stable operation for a long time, which translates into ultra-long battery life, allowing it to run for 12 to 27 hours depending on the motor speed. Charging is done via a universal USB connector. The set includes a one-metre charging cable (USB to Type-C), which allows the device to be connected to a power bank, car charger or computer anywhere and at any time.

Integrated LED night light and modular construction

A practical night light has been built into the rear of the housing, operating in two modes: steady white light and a changing colour cycle. The gentle LED lighting disperses the darkness around the child during evening walks, makes it easier for parents to check on their little one in the dark, and gives the child a sense of security. The thoughtful design means that the fan head and tripod are detachable structures. This makes it easy to remove just the top section and connect it for charging without having to reattach and unwind the legs from the Momcozy pushchair frame.

Technical data

Parameter	Value
Product name	Momcozy PF01 Portable Stroller Fan
Battery capacity	8000 mAh
Battery operating time	From 12 to 27 hours (depending on the selected intensity level)
Airflow speed adjustment	4 levels (3 standard speeds + 1 mode mimicking natural wind)
Head adjustment range	Full 360° rotation (horizontally and vertically)
Charging port and standard	USB Type-C (1 m cable included in the box)
Auxiliary lighting function	LED lamp (white light mode and RGB colour-changing mode)
Front guard gap width	Smaller protective gap <5 mm (safe for children's fingers)
Material of the flexible legs	High-quality metal alloy covered with a layer of silicone

Bardzo długi czas pracy na baterii

Key benefits

- An efficient 8000 mAh power cell guarantees long operation without the need for frequent connection to mains power.
- The fully configurable silicone tripod allows the device to be mounted securely on tubes of varying diameters.
- The dense protective grille with gaps below 5 mm eliminates the risk of fingers touching the rotating rotor.
- 4-level airflow adjustment lets you match the strength of the breeze to the current thermal conditions.
- The detachable head design simplifies charging without needing to detach the entire frame from the structural base.

The product is ideal for

- Parents looking for a stable fan for a pushchair, car seat or cot.
- People who want to protect a baby from overheating and insects during summer rest in the garden or park.
- Users who value versatile devices charged via a USB port with long cordless operating time.
- Those looking for a portable fan with a gentle night-light function for the space around the child.
