momcozy

Manufacturer: MOMCOZY

Referention number: DNXGJOIQRMMNO

Information:

A multifunctional device supporting a child's sleep and daily routine, combining a white noise machine, night light, sleep trainer and Bluetooth speaker in one compact housing. It offers 34 soothing sounds and light that creates a calm atmosphere, helping to soothe babies and preschool children more quickly. The Time-for-Bed and Time-to-Rise functions support the development of healthy sleep habits and independence. Thanks to Wi-Fi control, settings can be conveniently adjusted without getting up or risking waking the child, ensuring greater comfort and peace for the whole family.

Full product description

Support for your child's sleep

The Momcozy Rainbow device is a **comprehensive sleep centre** that completely transforms evening routines. It makes falling asleep easier thanks to a unique combination of up to **34 soothing sounds** and **dynamic nature-inspired lights**. It enables full personalisation of the sleep environment via an **intuitive app** on your mobile, and also helps to easily introduce a **daily routine** for older children, signalling nap time or wake-up time.

Light creates the atmosphere

The **dynamic light show** is inspired by the gentle rhythm of nature. The device offers six **soothing colour modes** and a rainbow-style night light. Soft, flowing glows help to calm overstimulated minds and signal that bedtime is near. This helps to **soothe newborns who are afraid of the dark** and makes it easier for little children to settle down in line with an established routine, creating a **calm and predictable** evening atmosphere.

34 soothing sounds

Momcozy Rainbow offers you the chance to create a **custom combination of sound and light** perfectly suited to your child's needs. There are as many as **34 relaxing sounds** to choose from, including fan noise, ocean waves and gentle lullabies. This allows you to experiment and find the combination that really works. You can combine, for example, a sea-wave light effect with ocean sounds or a flame with the gentle sound of a campfire to create a **personalised sleep atmosphere** that helps your little one fall asleep quickly.

Assistant for daily routines

This device helps to build **independence in children** and minimises everyday bedtime battles. The Time-for-Bed and Time-to-Rise functions, as well as configurable light and sound schedules (available soon in the app), make it easier for a child to understand what activities are coming next. Different light colours indicate what happens next: green can mean dinner, and red the end of screen time. It helps ensure that daily activities, such as meals or going to bed, run **smoothly and without stress**.

Convenient Wi-Fi control

Thanks to control via the **Wi-Fi mobile app**, you do not need to go into the room and risk waking your child to change the settings. You can manage sounds, lights, volume, Wake-Up Light alarms and set timers **directly from your phone**. If you prefer manual operation, the simple buttons on the device offer quick one-touch control. This makes it easier to adjust sleep conditions in the middle of the night.

Multifunctionality and peace of mind

This compact device replaces a **night light**, **Bluetooth speaker** and **children's room clock** in your child's room. It allows you to use dimmed night light during late-night feeds or nappy changes, as well as a soft clock display, which helps you quickly check the time. It also offers a **wireless speaker** mode, which is useful for playing bedtime stories or favourite lullabies. It keeps every sleepy moment simple thanks to quiet operation and **memory of the last settings**.

Who is this product for?

- Parents looking for an effective way to settle babies to sleep and calm little ones down.
- People who want to introduce a stable evening and daily routine for pre-school children.
- Users who value multifunctional solutions – the device combines several products in one.
- Parents who need remote control of the device so as not to wake the child while adjusting settings.

Key benefits for you

- Better sleep for the whole family: Thanks to the synergy of sound and light, little ones enter deep sleep more quickly, making nights calmer.
- Full control without getting up: Control via the Wi-Fi app allows you to adjust volume and light without having to go into the room and wake the sleeping child.
- Support in developing independence: The Time-for-Bed and Time-to-Rise functions help children learn to get up and go to bed on their own, contributing to healthy habits.
- Space-saving in the room: The compact design offers the functionality of a white-noise machine, night light, sleep trainer and Bluetooth speaker in one elegant unit.
