Manufacturer: MOMCOZY

Referention number: DNXGJOJJGRMMHO

Information:

The Momcozy retractable safety gate is a practical and stylish solution for protecting children and pets at home. Equipped with a double locking mechanism, it effectively secures doorways, stairs and hazardous areas, while one-handed operation makes everyday use easier. The flexible mesh design fits openings up to 140 cm wide and 84 cm high, and when retracted it disappears completely into the cassette, saving space and eliminating any threshold. Easy installation with a complete set of accessories, together with compliance with ASTM and EN standards, ensures convenience and a high level of safety.

Full product description

Safe space for little explorers

When a baby starts crawling independently and curiously exploring every corner of the home, ensuring safe conditions for play becomes a priority. The Momcozy retractable baby gate, equipped with an advanced dual locking mechanism, creates a reliable barrier against household hazards. The gate effectively separates potentially dangerous areas, giving parents peace of mind and the little one a free and fully controlled space for everyday activity.

Retractable design that saves valuable space

The modern design of the safety gate perfectly meets the needs of contemporary interiors, where ergonomics and aesthetics matter. The product fits openings and doorways up to 55 inches (approx. 140 cm) wide and 33 inches (approx. 84 cm) high, and offers full flexibility in adjusting the width of the fabric. When the gate is not in use, the flexible safety mesh retracts completely into an elegant cassette, eliminating the risk of tripping over fixed thresholds and allowing the full width of the passage to remain unobstructed.

Intuitive one-handed operation for complete convenience

Daily childcare requires solutions that do not tie up both of a parent's hands. The Momcozy gate has been designed so that locking or unlocking it is as simple as possible – just gently press and turn the control button. This design makes opening the passage effortless, even when you are holding a child, carrying a heavy pack of nappies, favourite toys or care accessories, making everyday tasks much easier.

Versatile use throughout the home for children and pets

This functional barrier is an excellent solution for securing corridors, doorways and areas around stairs, adapting to a variety of architectural layouts. It can serve as an effective protective barrier for both active children and dogs or other pets, blocking their access to selected rooms. The use of high-quality technical mesh reduces the risk of injury in the event of accidental impact, while ensuring high mechanical durability.

Simple installation with a complete set of accessories

Thanks to the included installation template and all the necessary tools, fitting the new gate takes just a few moments and goes smoothly. In addition to the gate, the set includes: upper and lower mounting brackets, fixing hooks, spacer pads (10 mm and 5 mm) to level skirting board unevenness, a set of short and long screws, and wall plugs. All product lines are rigorously tested and meet or exceed the strict ASTM and EN safety standards. (Note: The product should not be installed directly on plasterboard without an appropriate load-bearing profile).

Key benefits

- **Dual locking mechanism:** Provides full protection against self-opening by curious children and pets.
- **Retractable design:** Saves space and folds away completely into the cassette, without creating architectural barriers or thresholds.
- **Comfortable one-handed operation:** Allows easy closing and opening of the mesh when the other hand is occupied holding a baby.
- **Flexible fit:** Designed for openings up to 55" (approx. 140 cm) wide and 33" (approx. 84 cm) high, with smooth adjustment.
- **Certified safety:** Meets or exceeds global ASTM and EN standards, guaranteeing the highest build quality and stability.

The product is ideal for

- **Parents of crawling babies and toddlers taking their first steps:** Looking for a reliable way to block off stairs, the kitchen or the patio from unsupervised access by a little one.
- **Owners of dogs and other pets:** People who need an attractive and durable pet gate that limits movement around selected areas of the home.
- **Those who value modern minimalism and ergonomics:** Anyone who wants to avoid installing classic, heavy metal gates with a threshold in favour of a light, retractable mesh structure.
