Referention number: DNxGJOIMMRMMOP

Information:

Momcozy Breastmilk Bag is a set of 60 safe bags for storing expressed breast milk, made from BPA-free material. Each bag has a capacity of 250 ml, clear markings and a stable design, so it can be conveniently stored upright or flat in the fridge and freezer. Double side seams and a double zip seal increase leak resistance and protect against spills. The innovative temperature indicator changes colour, making it easier to monitor milk warming, and the side easy pour spout allows hygienic and precise pouring of milk into a bottle without the risk of contamination. This is a practical solution that supports feeding organisation and creating a home milk supply.

Full product description

Momcozy Breastmilk Bag – Stable and Functional Breast Milk Storage

The **Momcozy Breastmilk Bag 60-piece** product is a functional **storage bags** accessory that allows expressed **breast milk** to be **stored** safely. The set of 60 pieces makes it easier to organise babies' daily feeding. Each **bag** has been designed to support processes based on natural **breastfeeding**. It enables hygienic storage in the home fridge or freezer, helping parents maintain a regular **feeding** schedule for their child.

Milk bag and safe breast milk storage

The product's construction is based on safe BPA-free materials, which protect sensitive **food** from contact with harmful chemical compounds. These specialist **breast milk storage bags** are designed for stable **breast milk storage** at low temperatures. Double side seams and a double zip **seal** have been used here, so the **bag** remains leak-proof even when laid flat. The Temp Sensing Color Change system makes it easy to assess the temperature of the milk without using a thermometer. Purple indicates a cold state, blue indicates an **optimal** level (36–40°C), and white warns of overheating. This means a home **warmer** or water bath can be used in a controlled way.

Breast milk and its properties - Momcozy breast milk storage and breastfeeding

Proper stock management allows the shelf life of expressed liquids to be extended and gives parents greater independence. These practical products from the **breastmilk** category help maintain continuity of natural feeding when direct proximity to the mother is difficult. The product allows supplies to be **stored** in an organised way, reducing waste of valuable nutrients. As a result, returning to work or leaving the house does not disrupt the baby's regular **feeding** plan.

8 oz / 250 mL
Większe potrzeby karmienia

8 oz = 4 oz + 4 oz

Convenient easy-pour spout and feeding hygiene

The design stands out with an innovative side spout that allows the contents to be poured precisely directly into a bottle. This solution is based on complete separation of the inlet and outlet zones, which completely eliminates the risk of cross-contamination. Filling is done through the wide top zip opening, while emptying requires cutting the dedicated edge on the side. This division guarantees that the liquid does not come into contact with external elements, which raises the hygiene level of the entire process.

Breast milk storage bag - How to fill and store milk

Each piece offers a capacity of 8 oz (approximately 250 ml), and clear markings on the surface make it easy to monitor the amount of liquid collected. To safely **store** the contents, after pouring the liquid into the **bag** and before closing the zip seal, excess air should be removed from inside. The thoughtful base design means a stable **upright** position in the fridge prevents accidental tipping, making it easier to sort supplies by the date and time of filling.

Technical data

Brand	Momcozy
Number of pieces in the pack	60 pieces
Capacity of a single bag	8 oz / 250 ml
Material	BPA-free material
Temperature indicator system	Three-stage thermal indicator (purple, blue, white)

Type of closure	Double zip seal
Pouring method	Side spout (Side Spout)

Key advantages

- **Thermal indicator** – automatic temperature information makes it easier to prepare the right portion.
- **Side-spout design** – this system allows stable and hygienic pouring of the contents without the risk of contamination.
- **Reinforced construction** – double side seams and a double zip seal protect against leaks.
- **Large capacity** – 250 ml volume allows larger portions of milk to be stored.
- **Safe material** – BPA-free material protects the child's health and the structure of the milk.

The product is ideal for

- **Breastfeeding mothers** who want to collect and store expressed milk hygienically.
- **Parents looking for easy solutions** for controlling the temperature of babies' meals.
- **People who care about optimal organisation** of fridge space thanks to the option of storing flat or upright.
