momcozy

Manufacturer: MOMCOZY

Referention number: DNKGJOIKGRMMHP

Information:

Momcozy YN46 is a seamless nursing bra with a push-up effect, designed for comfort and stable bust support during pregnancy and lactation. Thanks to jelly strip technology, it replaces traditional underwires, providing support without pressure or irritation. The soft, elastic and breathable material adapts to changes in body shape, while the smooth construction remains invisible under clothing. Adjustable fastenings and straps allow one-handed operation, making feeding easier. The model helps lift the bust, reduces sagging and offers everyday comfort.

Full product description

Functional Momcozy YN46 nursing bra with push-up support

Momcozy YN46 (M) is a **seamless floral nursing bra** designed to **support the female figure in a gentler way** during the demanding period of lactation. This **floral push-up nursing bra** in the Beige Floral variant combines an attractive finish with high functionality, providing stable bust support without unnecessary pressure. It is a suitable solution for women looking for support from the stage of **pregnancy through to motherhood**.

Construction based on Jelly Strip technology

The construction of this model uses a **jelly strip - seamless floral** support system, which acts as a replacement for traditional stiffening. This **innovative bonding technology** uses **jelly gel** to stabilise the cup structure without the need for hard **underwires** or metal **wires**. **Instead of traditional stitching**, which can cause irritation, a method has been used that **seamlessly bonds the fabrics**. Thanks to this solution, the **seamless floral bra** remains smooth and practically invisible under fitted clothing, while retaining its technical supportive properties.

kształtu biustu

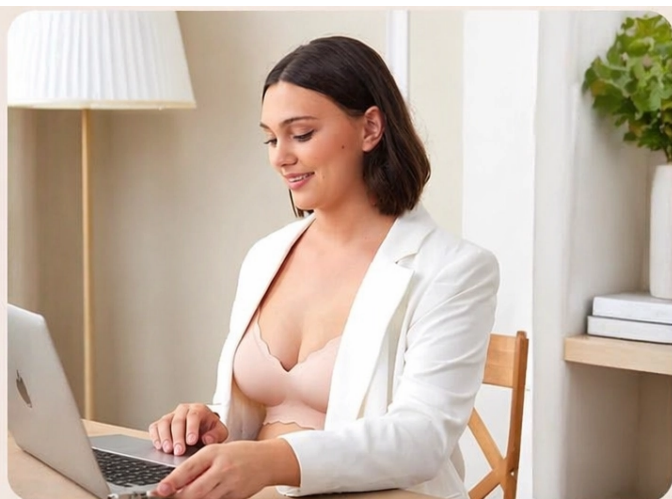

Comfort and fit - the most important product feature

The material used is **light and delicate**, allowing the fabric and the body to **move together** in any situation. The bra is highly **elastic** and can **stretch**, responding to natural changes in breast volume throughout the day. The fabric structure is very soft and exceptionally comfortable, making the lingerie feel like a **natural extension of the skin**. As the model is **wire-free and seamless**, it eliminates pressure points, which is particularly important when the breasts are more sensitive.

Urocze, falowane krawędzie
Wszechstronny wybór na każdą okazję

Functionality during feeding and everyday activities

The manufacturer decided to **design** this model in such a way that it effectively helps to **lift** the bust and **prevent breast sagging**. Adjustable **fastenings and straps** are **easy to operate** with one hand, making it easier to bring the baby to the breast. In situations where there is concern about moisture from slight leakage, it is worth noting that the material in the lower part is **slightly thicker** to help **prevent leakage** to the outside. The construction means that the **bra supports** weight well, and the cups **provide firmer support** and **sit closer** to the body than in standard **underwired models**.

Key benefits:

- Stable support thanks to **jelly gel** without the pressure of wires.
- A construction that effectively helps to **lift** the bust and **prevent breast sagging**.
- **Light and delicate** material providing skin breathability.
- The ability to operate the fastenings with one hand, which is practical when caring for a child.
- No side seams, preventing show-through under fitted clothing.

The product is suitable for:

- Women in lactation looking for a suitable option for everyday wear.
- Mothers needing stable bust support without traditional underwires.
- People who value lingerie that functions as a **natural extension of the skin**.
- Users looking for safe products free from harmful substances.
