Full product description

ADSL2+ router/modem

TP-Link TD-W8961ND is a 4-port wireless router with a **ADSL 2/2+** modem, which can be used to create a wireless access point. Thanks to the use of N technology ensuring transmission speed up to **300 Mb/s** it is an ideal solution for applications sensitive to interference, or requiring wide bandwidth. The multi-language **Easy Setup Assistant** software enables convenient and quick installation, and the **WPS button** makes it easy to establish a connection protected by **WPA encryption**.

Modern design

The modern design of the housing not only impresses, but also allows for greater stability and performance. Numerous air vents guarantee the stability of the system and ensure high performance.

Easily turn your wireless network on/off

Now it's easy to turn your wireless network on and off - just press the wireless switch.
