Full product description

PCI network card

The **TP-Link TF-3239DL** network card is an advanced, cost-effective **Fast Ethernet** adapter with a **PCI** connector for 32-bit performance. The device meets IEEE 802.3 10Base-T, IEEE 802.3u 100Base-TX specifications and provides full duplex data flow control in accordance with IEEE 802.3x standard.

Fast Ethernet

It allows you to upgrade your network operating at **10 to 100Mb/s**. The device uses the function of automatic connection speed negotiation, supports full and half duplex modes operating at both 10 and 100Mbps. The card works with most operating systems. It is mounted on the principle of **plug-and-play** devices.
