Full product description

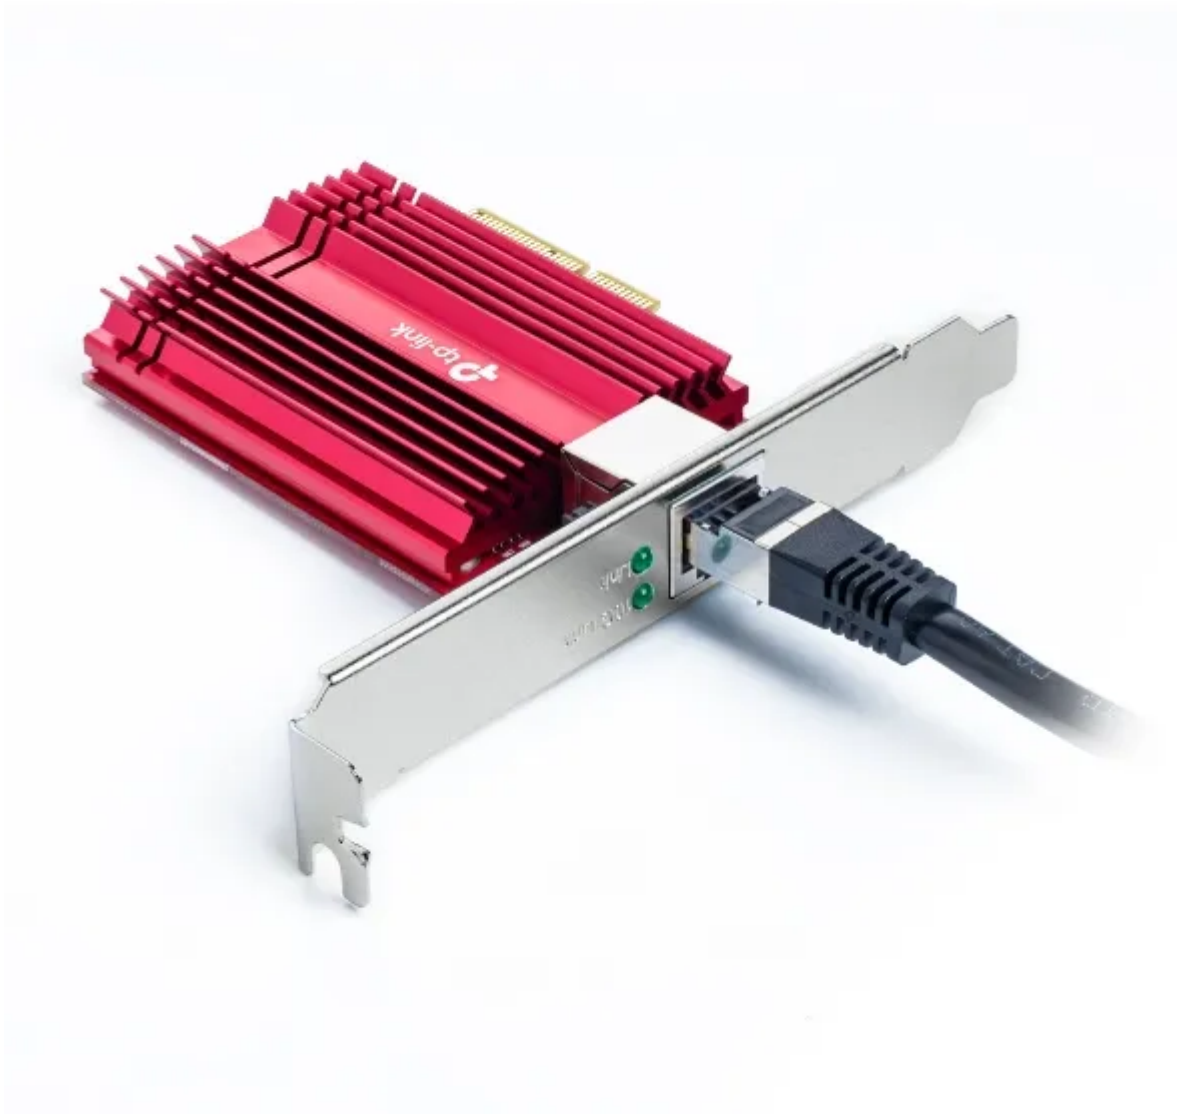

Extreme speed with the TP-Link TX401

Combined with the latest 10GBase-T technology, the TX401 delivers extreme speeds of up to 10 Gbps, **10 times faster** than typical gigabit adapters, ensuring smooth data transmission for both Internet access and local data transmission.

Comprehensive compatibility

With extreme speed and very low latency, 10GBase-T is compatible with Fast Ethernet and Gigabit Ethernet, automatically switching between higher and lower speed connections.

CAT6A Ethernet cable - To maximize the TX401's performance, a 1.5-meter CAT6A Ethernet cable with up to 10 Gbps bandwidth is included, while a regular cable has only 1 Gbps bandwidth.

Equip your computer with the latest 10G bandwidth

10 Gigabit Ethernet **delivers lightning-fast data transfer rates of up to 10 billion bits per second - 10 times faster than standard Gigabit Ethernet.** It's a whole new era for everything from local data transfers to Internet access.

Low-profile and full-height handles

In addition to the standard mount, a low profile mount for mini tower computer cases is included. Custom options allow you to customize a bracket that perfectly fits your motherboard design.
