Full product description

Xiaomi Electric Scooter 4 Pro - a scooter for professionals

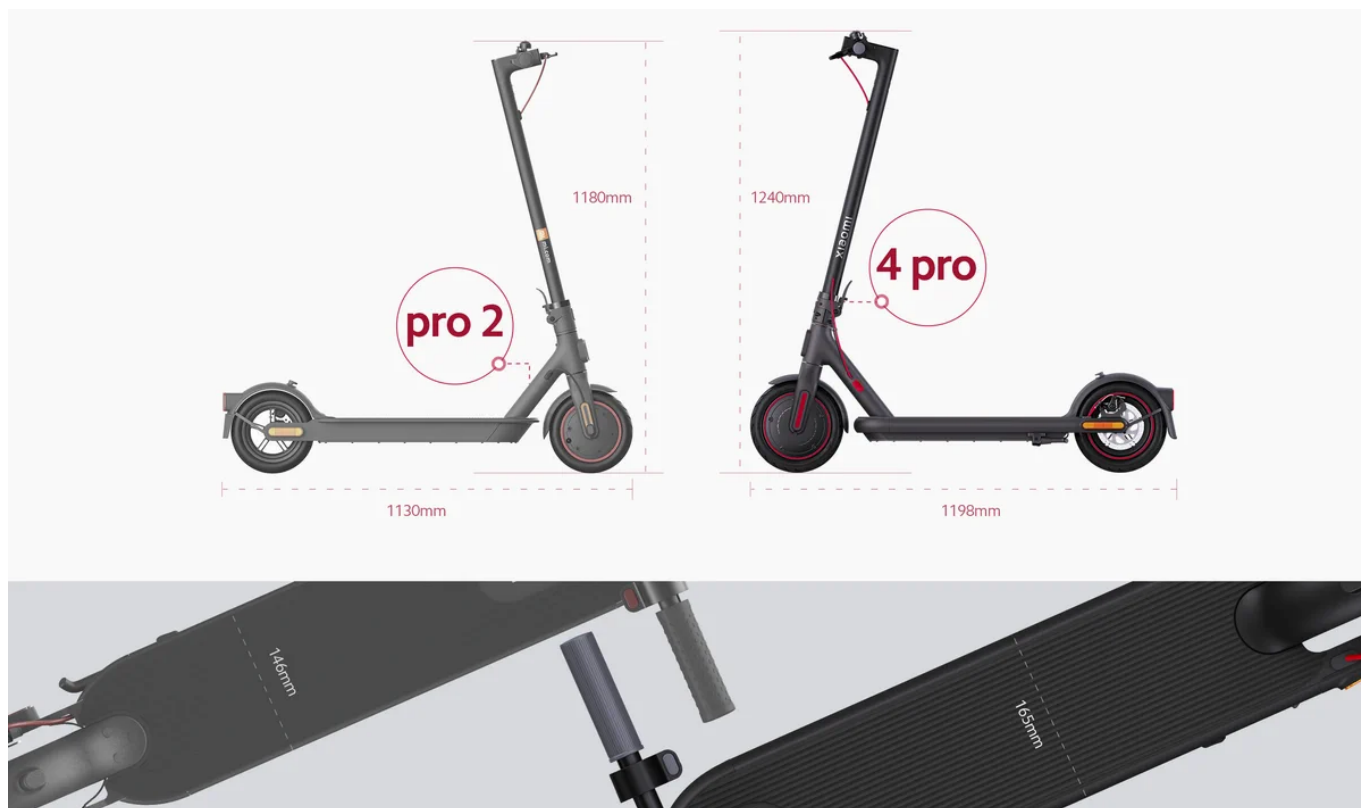

Discover the incredible speed and convenience offered by the **Xiaomi Electric Scooter 4 Pro**. This innovative electric scooter allows you to reach a top **speed of 20km/h**, and freely navigate **steep slopes of 20%**. Thanks to the advanced **KERS kinetic energy recovery system**, the scooter can use the energy that is generated during braking and convert it into electric power, which increases the travel range. This is a scooter that will meet your expectations in terms of performance, comfort and safety. Enjoy a new way to get around town with the Xiaomi Electric Scooter 4 Pro.

Key features of Xiaomi Electric Scooter 4 Pro

Larger size, better stability

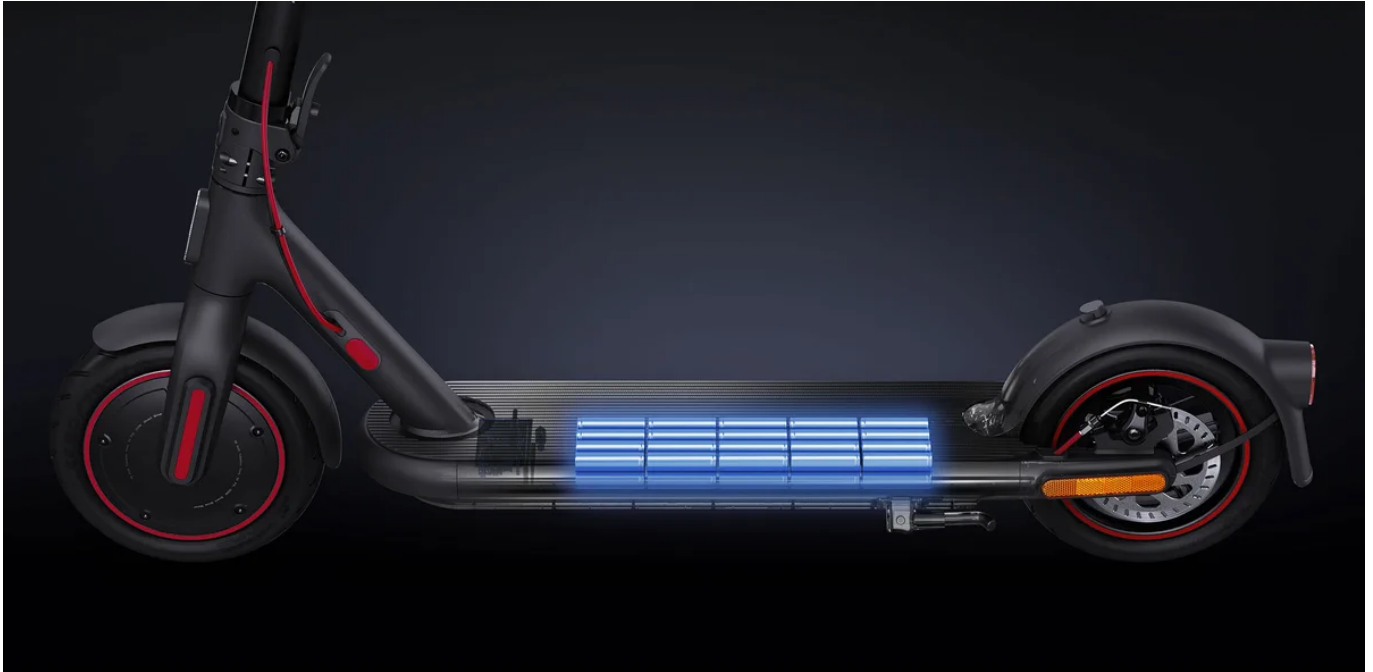

The Xiaomi Electric Scooter 4 Pro is now bigger in every way. **It is 60 mm taller, 68 mm longer, 54 mm wider at the handlebars and has a 19 mm wider deck.** As a result, it provides better stability and comfort while riding. In addition, the scooter is easy to fold and store thanks to its smart design. The scooter's frame is made of durable aircraft-grade aluminum alloy, which guarantees durability and lightness.

Powerful battery, long range on a single charge

The Xiaomi scooter is equipped with a powerful **446 Wh battery**, which allows it to travel **up to 55 km on a single charge**. The battery is

protected by a **5th-generation** intelligent **BMS**, which provides six safeguards against overloading, overheating, short circuits and other hazards. You can check the battery status on the **Xiaomi Home app** on your smartphone. Charging the scooter is a breeze thanks to a magnetic charging port and a cover that automatically snaps into place.

Tubeless tires, smooth ride

The Xiaomi Electric Scooter 4 Pro has **tubeless tires with a diameter of 10 inches, which are filled with self-sealing gel**. This means you don't have to worry about a tire puncture on uneven pavement. The tires are also designed to better absorb shock and provide a smooth and comfortable ride. The tires also have a non-slip surface and good grip on various types of ground.

Three speed modes, full control

The scooter has three speed modes to choose from: **pedestrian mode (5 km/h)**, **D mode (15 km/h)** and **S mode (20 km/h)**. You can easily switch between them by double-tapping the power button. The speed modes are tailored to different riding environments and ensure safety and energy savings. The scooter also has a powerful **motor with a maximum power of 700 watts**, which allows you to **climb hills with an incline of up to 20%**.

Bright lights, safe night driving

The Xiaomi Electric Scooter 4 Pro has an ultra-bright **2.5-watt headlight** that effectively improves visibility when riding at night. The light has a new dispersion angle design that keeps the light below the line of sight to avoid glare from the headlight. The scooter also has a red brake light on the rear to warn other road users of a change in speed. In addition, the scooter has reflectors on the sides to increase visibility from the side.

Disc brake, effective braking

The Xiaomi Electric Scooter 4 Pro has a **disc brake with two pads on the rear wheel** to ensure efficient and smooth stopping of the scooter. The brake is easy to operate with an ergonomic lever on the handlebars. The scooter also has the **KERS energy recovery system**, which uses kinetic energy during braking and increases the scooter's range.

Xiaomi Home app - control your scooter from your smartphone

The Xiaomi Electric Scooter 4 Pro is compatible with the Xiaomi Home app, which allows you to remotely manage the scooter from your smartphone. The Xiaomi Home app is available for free on Android and iOS. The Xiaomi Home app is not only useful, but also safe. The app has received Kitemark™ certification for secure digital apps.

Using the app, you can:
