Full product description

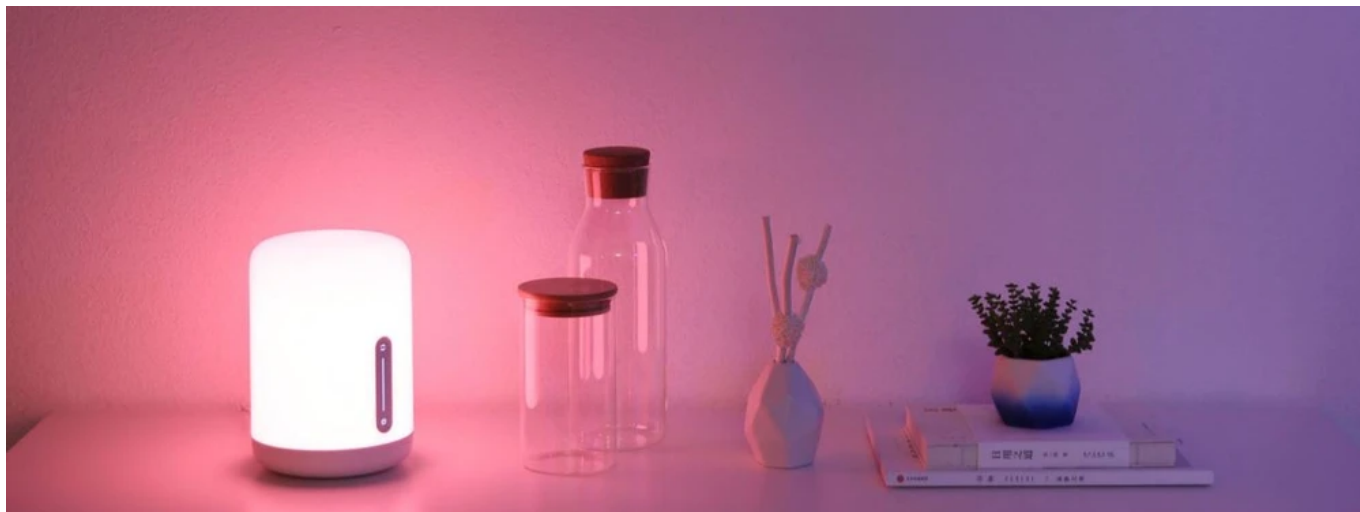

Xiaomi Mi Bedside Lamp 2 - RGB bedside lamp

The special design **provides a high illuminating surface**, making the room evenly lit. Convenient **connectivity via Wi-Fi** and **Bluetooth Low Energy**, combined **with voice control** and multiple functions, will provide comfort and easy control of the lamp.

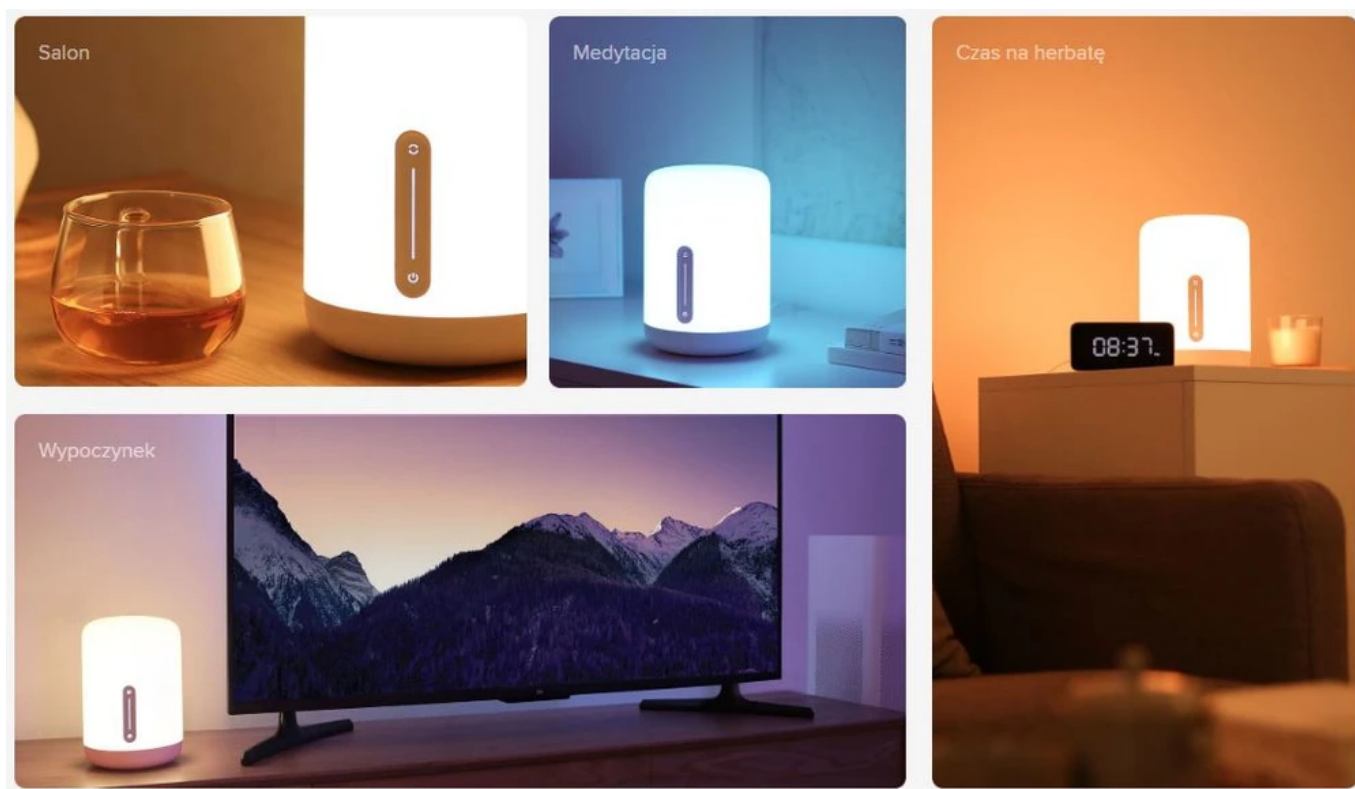

Large illumination area. Soft RGB light. Night mode. Voice control.

Mi Bedside Lamp 2 will offer you a full game of colors. **Adjust the light color** according to your mood. Set it appropriately for gaming, reading, or other activities. Quickly and conveniently change the brightness level of the lamp, **improving the comfort level of your rest** and sleep cycle.

Enhanced lighting versatility

The maximum brightness of the light has been increased to **400 lumens** for full brightness during daytime use. The minimum brightness can be set to less than 2 lumens for **sleeping comfort**.

Natural wake-up call with Mi Bedside Lamp 2

Start the **morning wake-up mode** by simulating the rays of the rising sun. Let the morning sun's rays **make it easier for you to start your day**.

Comfortable sleep

The lowest brightness of less than 2 lumens **will provide warm light**, perfect when you want to recuperate and **breathe after a hard day**.

Voice control - Siri

You can use your **iPhone**, **iPad**, **Apple Watch**, and the app on your Mac to **easily control the light with your voice**, touch, and set automatic actions.

Control via app - Mi Home

Connect the light to the **Mi Home** app to unlock the full potential of features and control. **Control your lights with the app**, set alarm clocks, and manage numerous light modes and patterns.

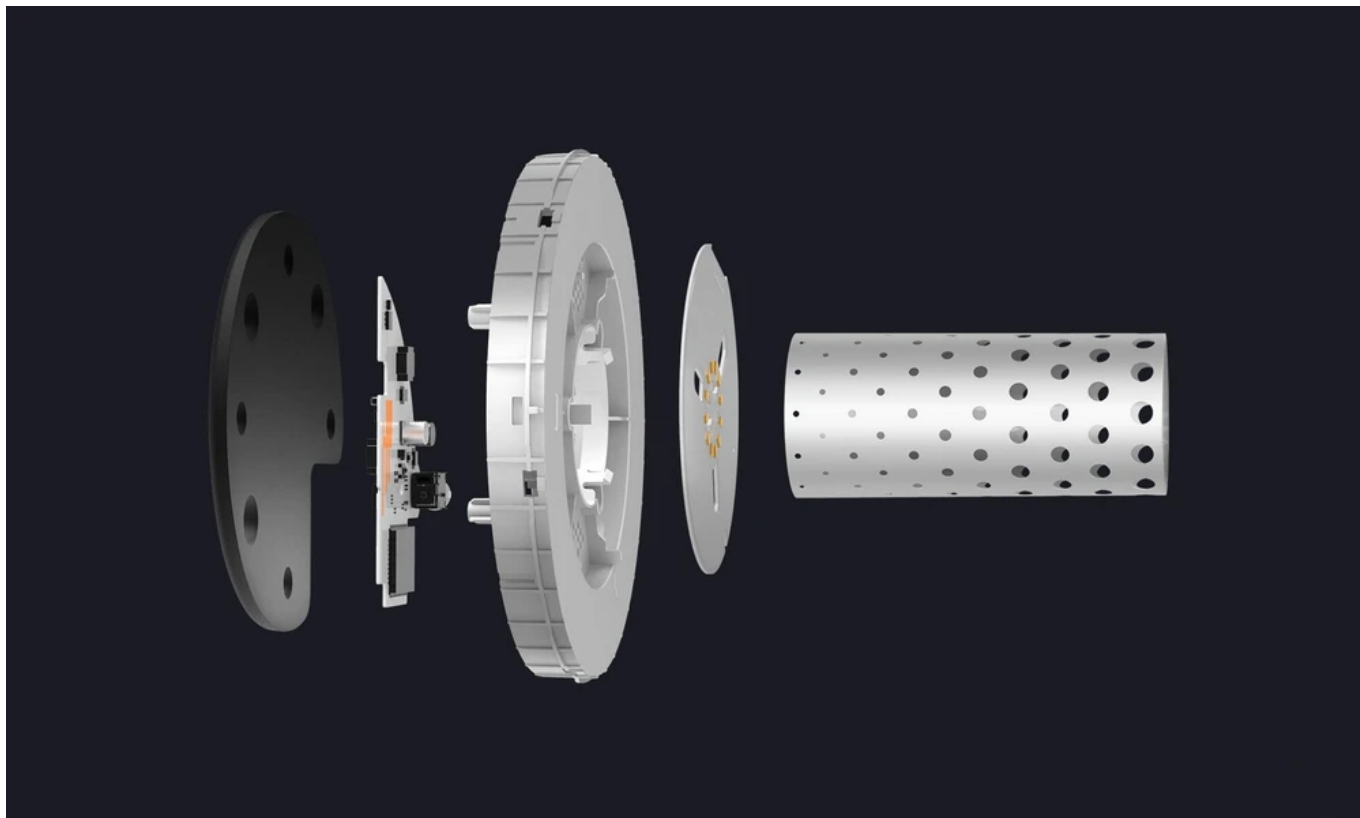

Convenient touch controls

When the light is off, touch the brightness bar to turn the light on. **A convenient solution** when controlling the light at night.

High standard of production

The special optical structure and **professional light-combining technology** have been created using precision **CNC** shot-blasting and **cutting** techniques, which make the lamp light a perfect fit for any bedroom.

Professional light combining technology

LEDs of the highest quality, combined with a unique advanced light-combining technology and a double-layered diffuser, made it possible to achieve a smooth and even lighting surface of the lamp. Colors are emitted uniformly across the entire surface of the housing, **enhancing the visual experience**.
