Price: **49.00 zł** gross / 39.84 zł net

Manufacturer: MOULD KING

Referention number: DNXGKIJKRMMIJ

Information:

Mould King 24052 is a detailed exploration helicopter model for fans of aviation and advanced constructions. The set consists of 284 elements made from durable ABS and, once assembled, reaches a length of 34,5 cm. Its military look in shades of green and black gives it a realistic, technical character. The model features a movable main and tail rotor, a working winch for simulating rescue operations, and an opening cockpit with a detailed interior. It is an impressive collector's set that combines an attractive appearance with functional details and a satisfying build.

Full product description

Helicopter model for enthusiasts

The **Mould King 24052** set is a treat for aviation fans and advanced builds. This exploratory helicopter model, measuring **34.5 cm** in length, combines military aesthetics with functional details. The colour scheme in shades of green and black gives it a raw, technical character that looks great on any collector's shelf.

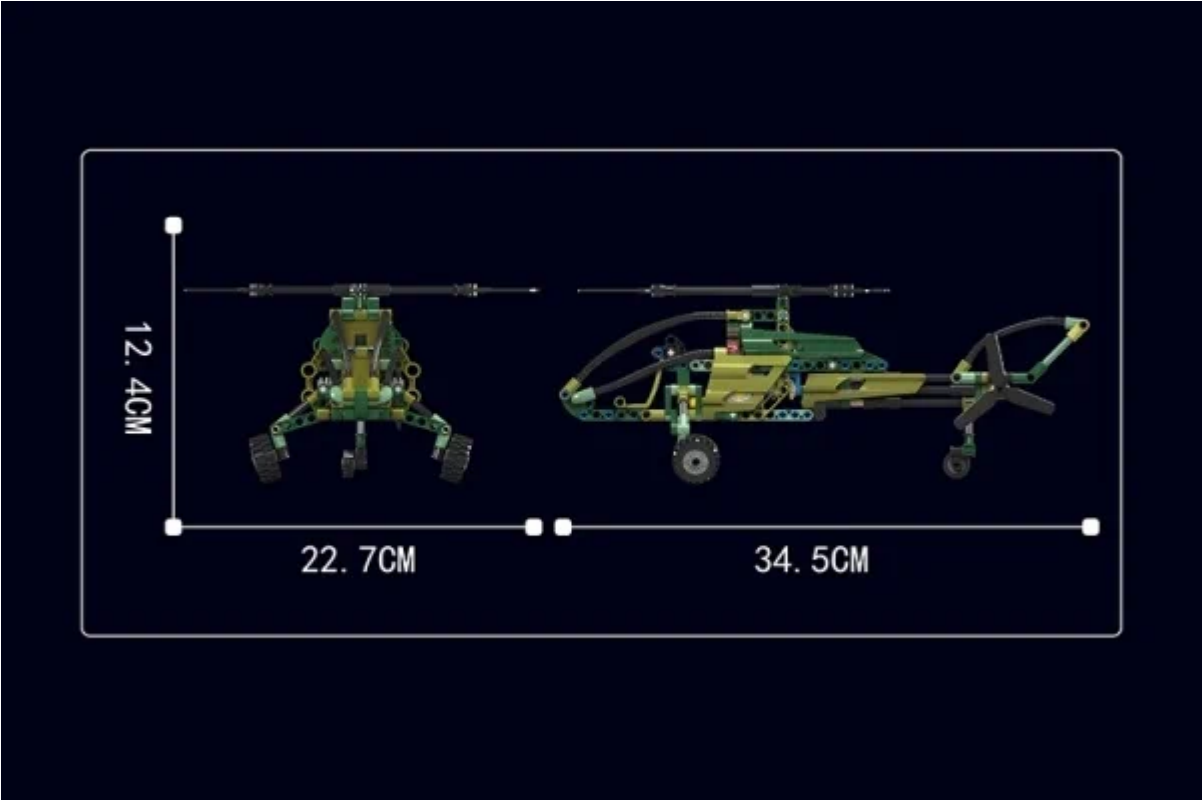

Key features of Mould King 24052

- **284 pieces** made from durable ABS plastic.
- **Movable rotor system** (main and tail) for added realism.
- **Working winch** enabling rescue mission simulations.
- **Opening cockpit** with replicated interior equipment.
- **Impressive scale** model measuring nearly 35 cm in length.

Functionality and mechanics

The **Mould King 24052** model focuses on interaction. The use of an **operational winch** and a wide rotor blade system means the build is not just a static object. The thoughtfully designed **undercarriage and tail** help to explain the basics of aeronautical engineering. The included clear instructions guide you through the assembly process, making it easier to connect all the details precisely.

Realism in micro scale

Details such as the **cockpit equipment** and military colours make this set appealing to **Adult Fans of LEGO**. The designers have ensured the correct proportions, so the helicopter looks authentic. The solid fit of the bricks contributes to the model’s durability, allowing it to be safely repositioned or displayed in dynamic poses.

Specification
