Price: **349.00 zł** gross / 283.74 zł net

Manufacturer: MOULD KING

Referention number: DNKGKIIRIMMI

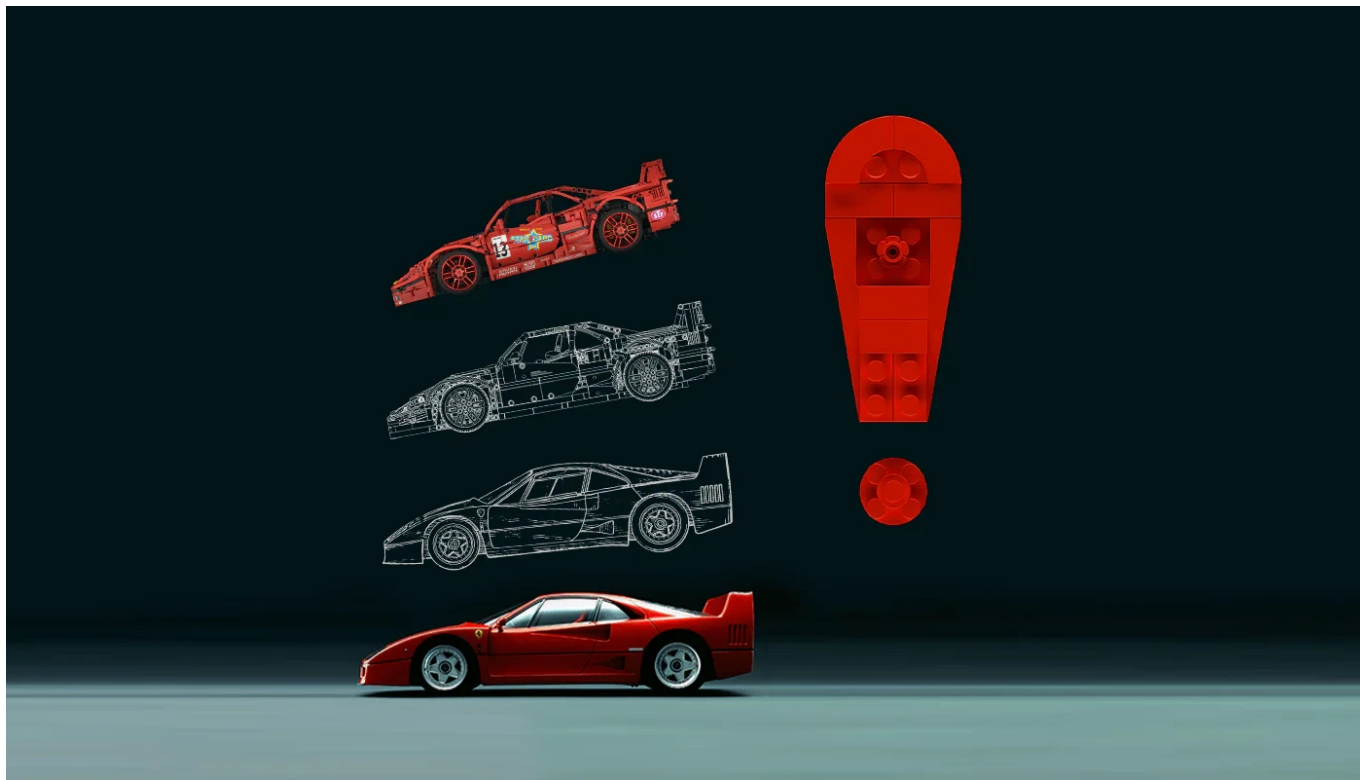

Information:

Mould King 13095 is an advanced construction model in 1:10 scale, inspired by a legendary sports racing car. The set consists of 2688 elements and, once assembled, measures 46 cm in length, offering an impressive level of detail and a satisfying, many-hours build. The model stands out with a realistic V8 Twin Turbo engine with moving pistons, a working steering system, rear-wheel drive, and opening body elements, including the bonnet, engine cover and side doors. The construction is also prepared for the installation of RC modules, and optional stickers allow it to be given a more classic or racing character.

Full product description

Racing engineering icon

The **Mould King 13095** set is an advanced construction model in **1:10** scale, recreating the legendary silhouette of a sports car. The build consists of **2688 elements**, making the construction process engaging for many hours and offering the satisfaction of creating complex mechanisms and precise body details.

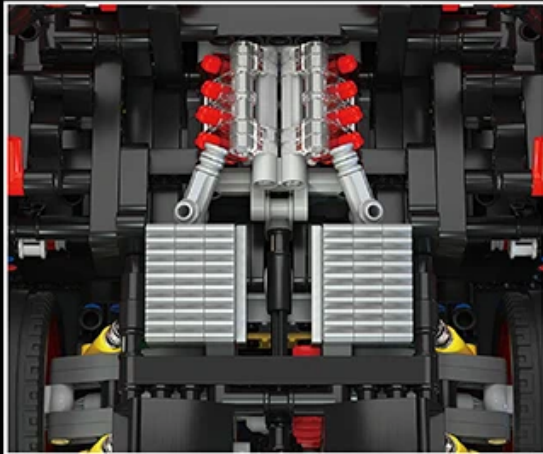

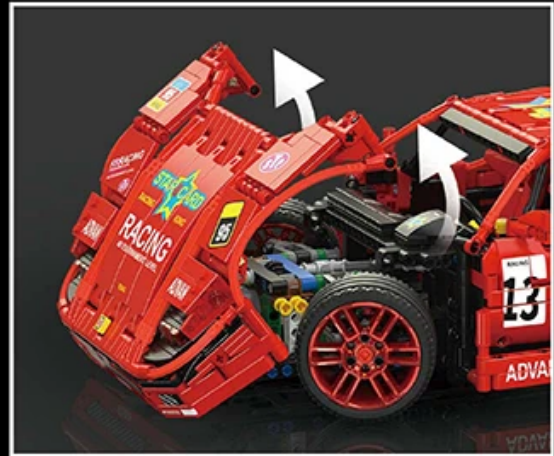

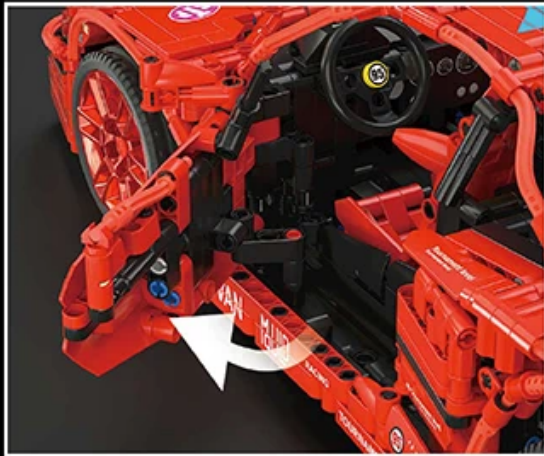

Key features of Mould King 13095

- **1:10 scale** - the 46 cm long model allows for the display of numerous details.
- **V8 Twin Turbo engine** - moving pistons operate as the vehicle is moved.
- **Full mechanics** - opening bonnet, engine cover and side access doors.
- **Steering system** - steerable front axle controlled by mechanisms.
- **Expansion option** - construction prepared for mounting RC control modules.

Realism and mechanical details

The heart of the vehicle is the detailed **V8 engine with twin turbocharging**. The use of functional pistons and rear-wheel drive helps to understand how drivetrain systems work. The aggressive body line and the possibility of customising the appearance with **optional stickers** make the model look impressive in both the classic and racing versions.

Advanced 1:10 construction

The model, nearly **half a metre** long, offers access to a fully equipped engine bay and cabin interior. The use of **over 2600 parts** translates into a high level of detail and the solidity of the finished build. The product helps develop technical skills and presents a challenge for experienced builders who value **engineering realism** in brick sets.

Specification

Parameter	Details
Catalogue number	13095
Number of elements	2688 pieces
Model scale	1:10
Assembled model dimensions	12.5 x 21 x 46.2 cm
Engine type	V8 Twin Turbo (moving pistons)
RC compatibility	Yes (requires 13080D Dynamic Pack set)
