Price: **529.00 zł** gross / 430.08 zł net

Manufacturer: MOULD KING

Referention number: DNXXGIIRDRMMHN

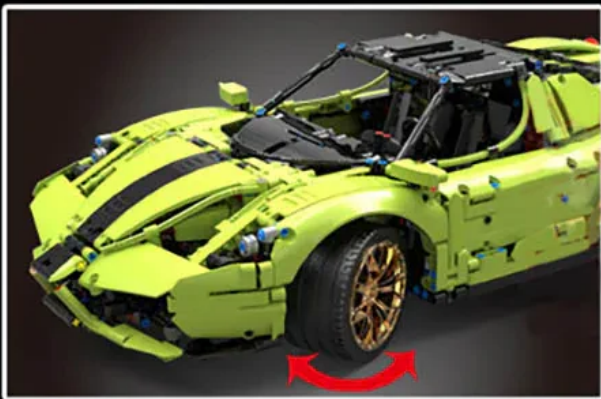

Information:

An impressive 1:8 scale sports car model for adults, consisting of 2798 elements. It stands out with its unique light green colour, refined details and realistic construction, making it look superb in any collection. The model features a moving V12 engine with pistons, a 6-speed manual gearbox, independent suspension on all wheels and a working steering system. The opening bonnet, boot and side doors increase interactivity, while the electroplated rims emphasise the premium character of the set. It is a demanding, satisfying building challenge and an excellent choice for fans of motoring and engineering.

Full product description

Race machine in 1:8 scale

Build an impressive replica of an Italian motoring legend. The model in **1:8** scale consists of **2798 pieces**, offering an advanced construction challenge for adult enthusiasts. The unique **light green colour scheme** and attention to detail make the vehicle a distinctive addition to any sports car collection.

Key features of Mould King 13074

- **V12 engine** with moving pistons imitating the operation of a real unit.
- **6-speed gearbox** enabling manual gear changes.
- **Independent suspension** on all wheels improving the stability of the build.
- **Opening elements** such as the bonnet, boot and side doors.
- **Steering system** connected directly to the vehicle's steering wheel.

Advanced engineering

The model offers a deep insight into the mechanics of racing vehicles. The use of **electroplated rims** adds to the aesthetics, while the systematic division of the bricks into **numbered bags** helps organise the build. The construction allows interaction with the finished model, contributing to a better understanding of the operation of the **drivetrain** and suspension.
