Information:

Mould King 24017 Forklift Workshop is a compact construction set for technology enthusiasts, allowing you to build a realistic forklift from 219 pieces. The model, in an intense lime colour, stands out with its interesting appearance and functional mechanics. It offers movable forks with the ability to raise and lower loads, angle adjustment, and an integrated steering system. The bricks are compatible with elements from other popular brands, and the durable ABS plastic ensures safety and sturdiness. It is a great choice for play, learning, and collecting.

Full product description

Forklift Workshop Forklift Truck

The **Mould King 24017** set is an option for technology enthusiasts, allowing them to build a functional **forklift truck** by hand. The model in an intense lime colour catches the eye and makes an interesting addition to a collection of technical vehicles. The design focuses on recreating the mechanics of warehouse machines, offering the satisfaction of assembling **219 pieces**.

Key features of MK-24017

- **Lifting system:** Moving forks enabling the load to be raised and lowered.
- **Angle adjustment:** A function for changing the fork tilt for greater realism.
- **Steering system:** An integrated mechanism for controlling the vehicle's wheel turning.
- **Full compatibility:** Parts fit bricks from other well-known manufacturers.
- **Safe materials:** Made from durable and eco-friendly ABS plastic.

Realistic working mechanics

This compact **Forklift Workshop** model offers advanced functions despite its small size. The applied **linkage functionalities** mean that the user can control the drive, adjust the fork angle and manage their height. This helps to understand the principles of **steering systems** and levers used in logistics.

Specification

Parameter	Details
Catalogue number	24017
Number of pieces	219 pieces
Material	ABS plastic
Functions	Lifting, steering, fork tilting
Colour scheme	Lime / Black
Dimensions	13.4 x 8.5 x 20.8 cm
