Manufacturer: MOULD KING

Referention number: DNKGKIIRKMMNQ

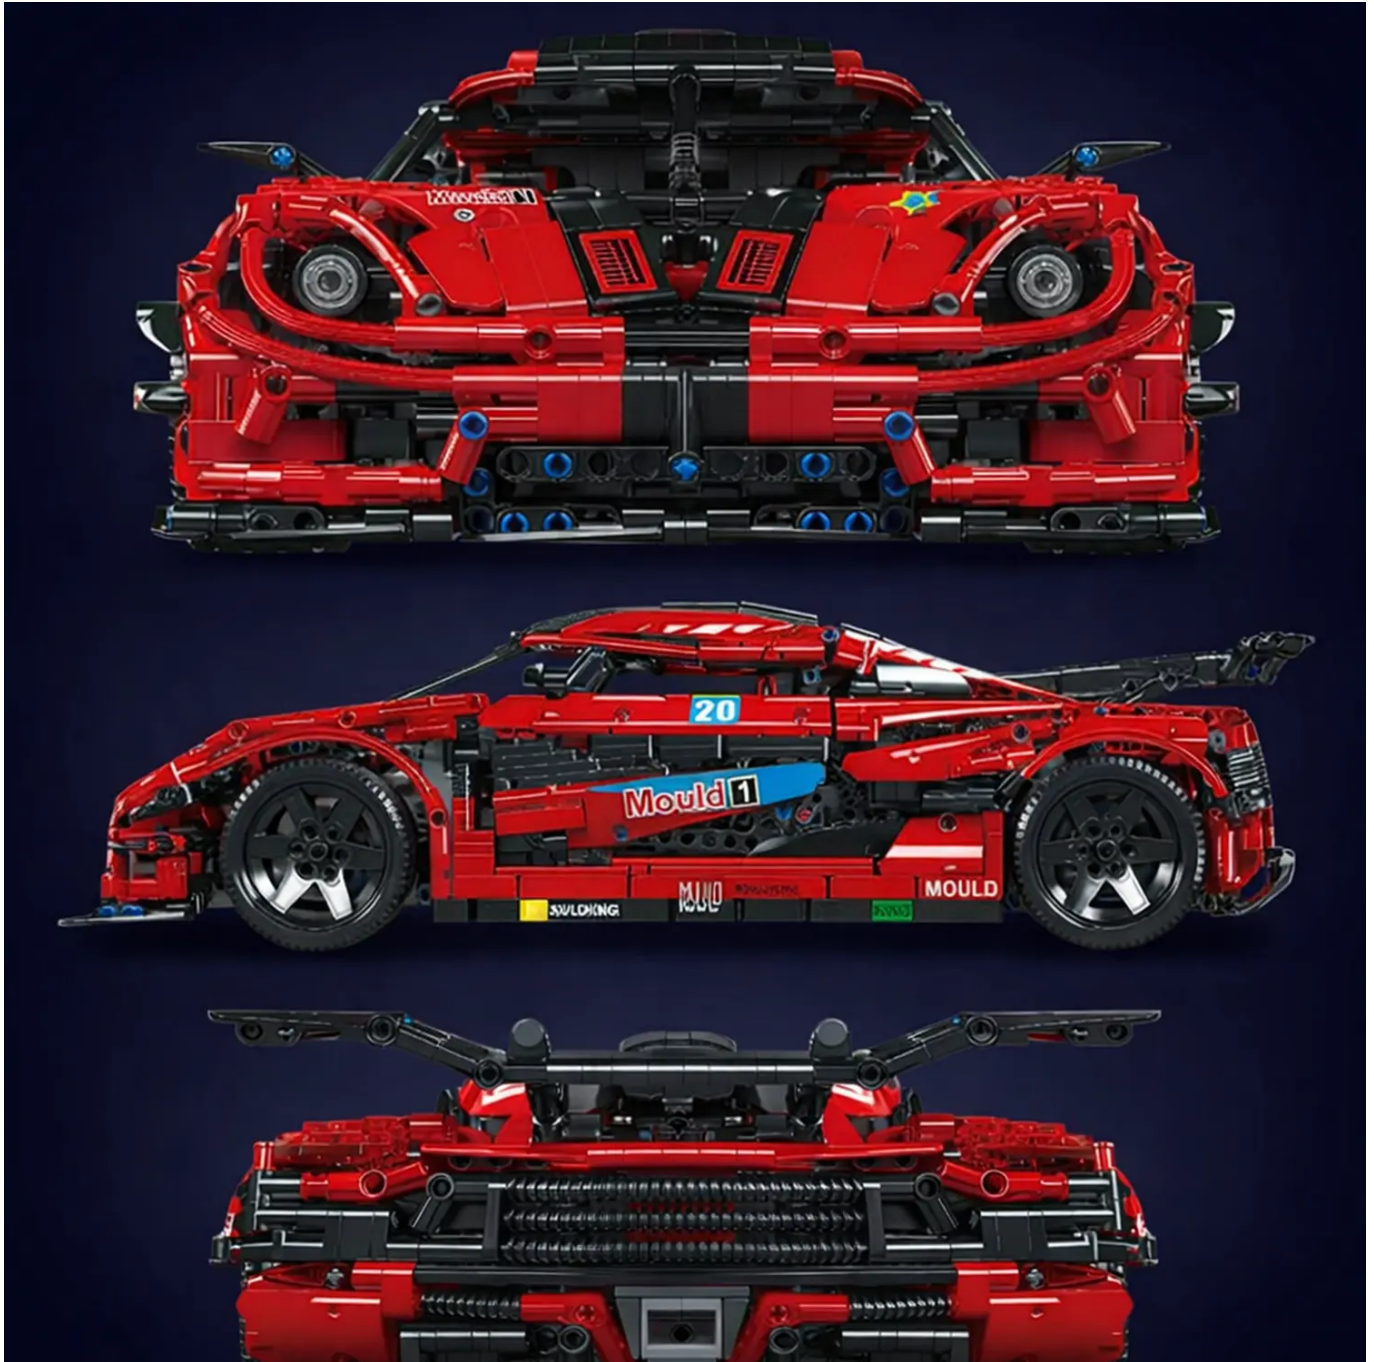

Information:

Mould King Hypercar is an impressive 1:10 scale supercar model made up of 3063 pieces, which measures 47 cm in length when built and looks great as a decorative collector's item. The set stands out with its refined silhouette, opening scissor doors, engine bonnet and moving elements. Inside are racing seats, a dashboard and gear shift paddles, while the realistic engine with moving pistons, gear systems and independent suspension provide a satisfying build. Optional remote control allows the model to be expanded with additional functionality.

Full product description

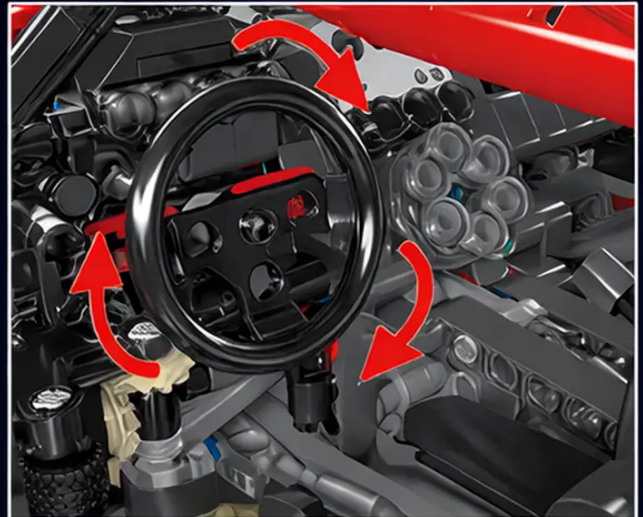

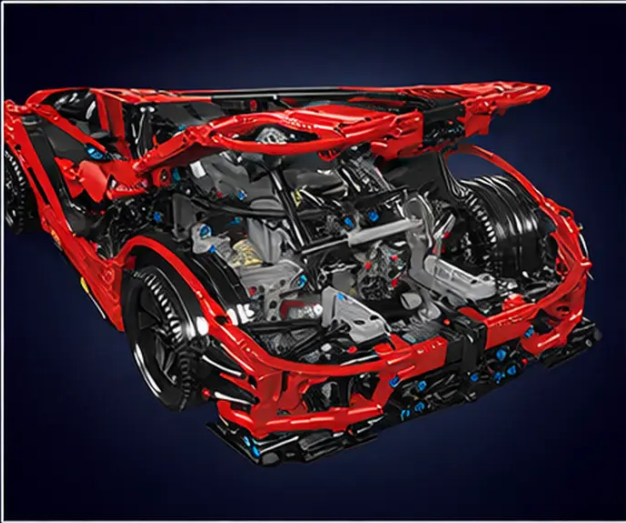

Striking silhouette and elaborate construction

The Mould King Hypercar model presents a supercar in 1:10 scale, which attracts attention with its refined body line and the size of the finished build. The set consists of 3,063 pieces, and once assembled it reaches 47 cm in length, making it look great on a shelf, desk or in a collection of motoring-inspired models. Opening scissor doors, an engine cover and moving elements make both the build and later display even more interesting.

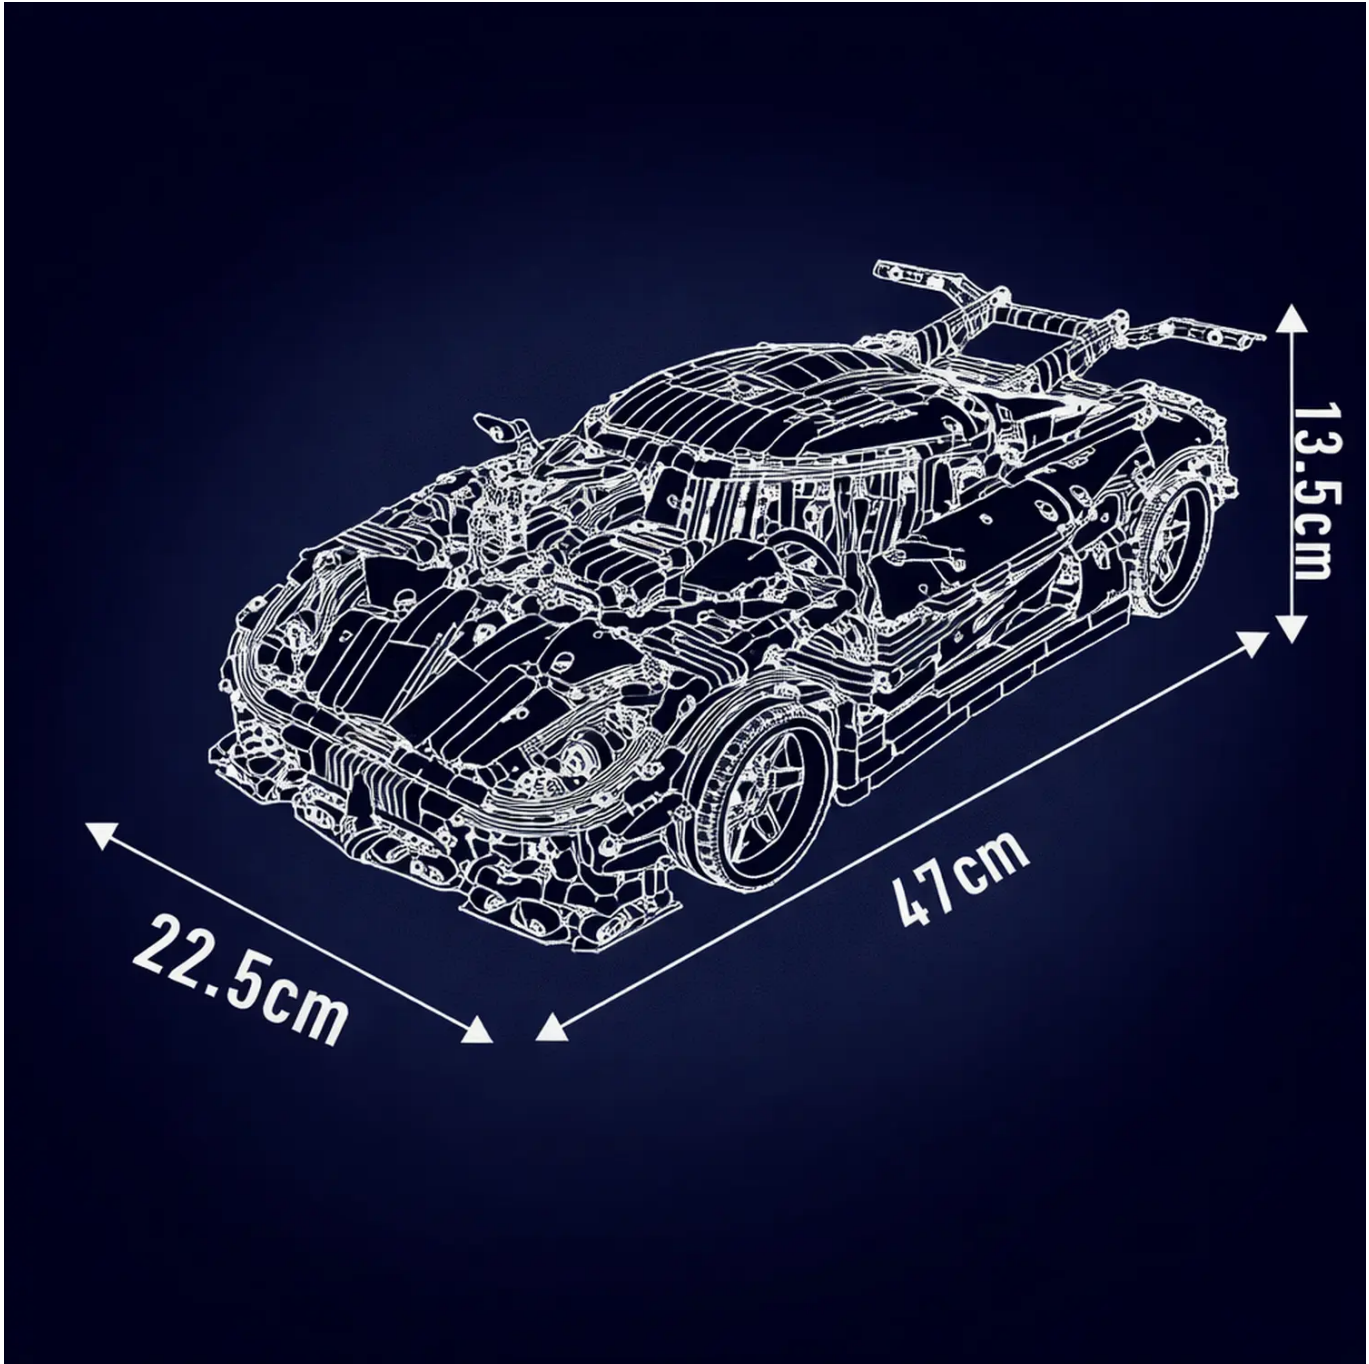

Interior details and functional elements

The model includes numerous accents that give the build a realistic character. The interior features racing seats, a dashboard, paddle shifters and additional equipment elements that emphasise the vehicle's sporty style. Engine and cabin details revealed when the panels are opened make the model interesting to view from different angles, and the optional remote control set allows it to be expanded with further possibilities.

Satisfying building for motoring fans

The set has been designed for people who enjoy more elaborate builds and want to spend time assembling a model full of mechanical solutions. A functional engine with moving pistons, a gearbox system and independent suspension make the build an engaging activity. It is an option for collectors, supercar enthusiasts and anyone looking for a model that combines an attractive appearance with an interesting technical construction.
