Price: **399.00 zł** gross / 324.39 zł net

Manufacturer: MOULD KING

Referention number: DNXGKIJJMRMMKH

Information:

Mould King 18021 is an advanced ATV model made up of 1120 pieces, created for fans of mechanics and off-road driving. The vehicle features direct 4x4 drive powered by 4 L High Torque motors mounted in the wheel hubs, providing high torque and excellent traction in difficult terrain. The model offers full remote control via an app or a remote controller, independent long-travel suspension, high durability, and off-road tyres. Once assembled, it reaches a length of up to 36 cm, and the included rechargeable battery allows for long and dynamic play.

Full product description

Advanced off-road vehicle

The **Mould King 18021** model is a treat for builders who appreciate mechanics and engineering challenges. The design is based on **1,120 pieces**, creating a solid ATV-style machine. Thanks to the use of direct drive, the vehicle offers a unique building experience and later control in difficult conditions.

Key features of the MK-18021

- **4 L High Torque motors** driving the wheel hubs directly.
- Full **remote control** via app or controller.
- Independent **wheel suspension** with long spring travel.
- Impressive model length of up to **36 cm**.
- Efficient **rechargeable battery** included.

Power and all-wheel drive

The set does away with traditional servos in favour of **L-type motors** placed in the hubs. This solution means that the **permanent 4x4 drive** delivers enormous torque. Drive synchronisation via the app helps when overcoming obstacles, which any fan looking for technical innovations will appreciate.

Durability off-road

The designers ensured **high ground clearance** and long-travel shock absorbers, allowing smooth driving over uneven terrain. The durable frame structure and **off-road tyres** ensure the model remains stable during play. The clear instructions guide you step by step through the assembly process, offering the satisfaction of creating a complex mechanism.
