Information:

Mould King Regera Hypercar is an advanced construction set consisting of 3063 pieces, allowing you to build a detailed hypercar model with a high level of accuracy. The model impresses with its realistic interior, opening doors, a working engine with moving parts, and independent suspension, which enhances the realism and enjoyment of play. The set provides a satisfying, lengthy build and will be a great choice for motoring fans and modellers. The remote control module is not included and can be purchased separately to expand the model's functionality.

Full product description

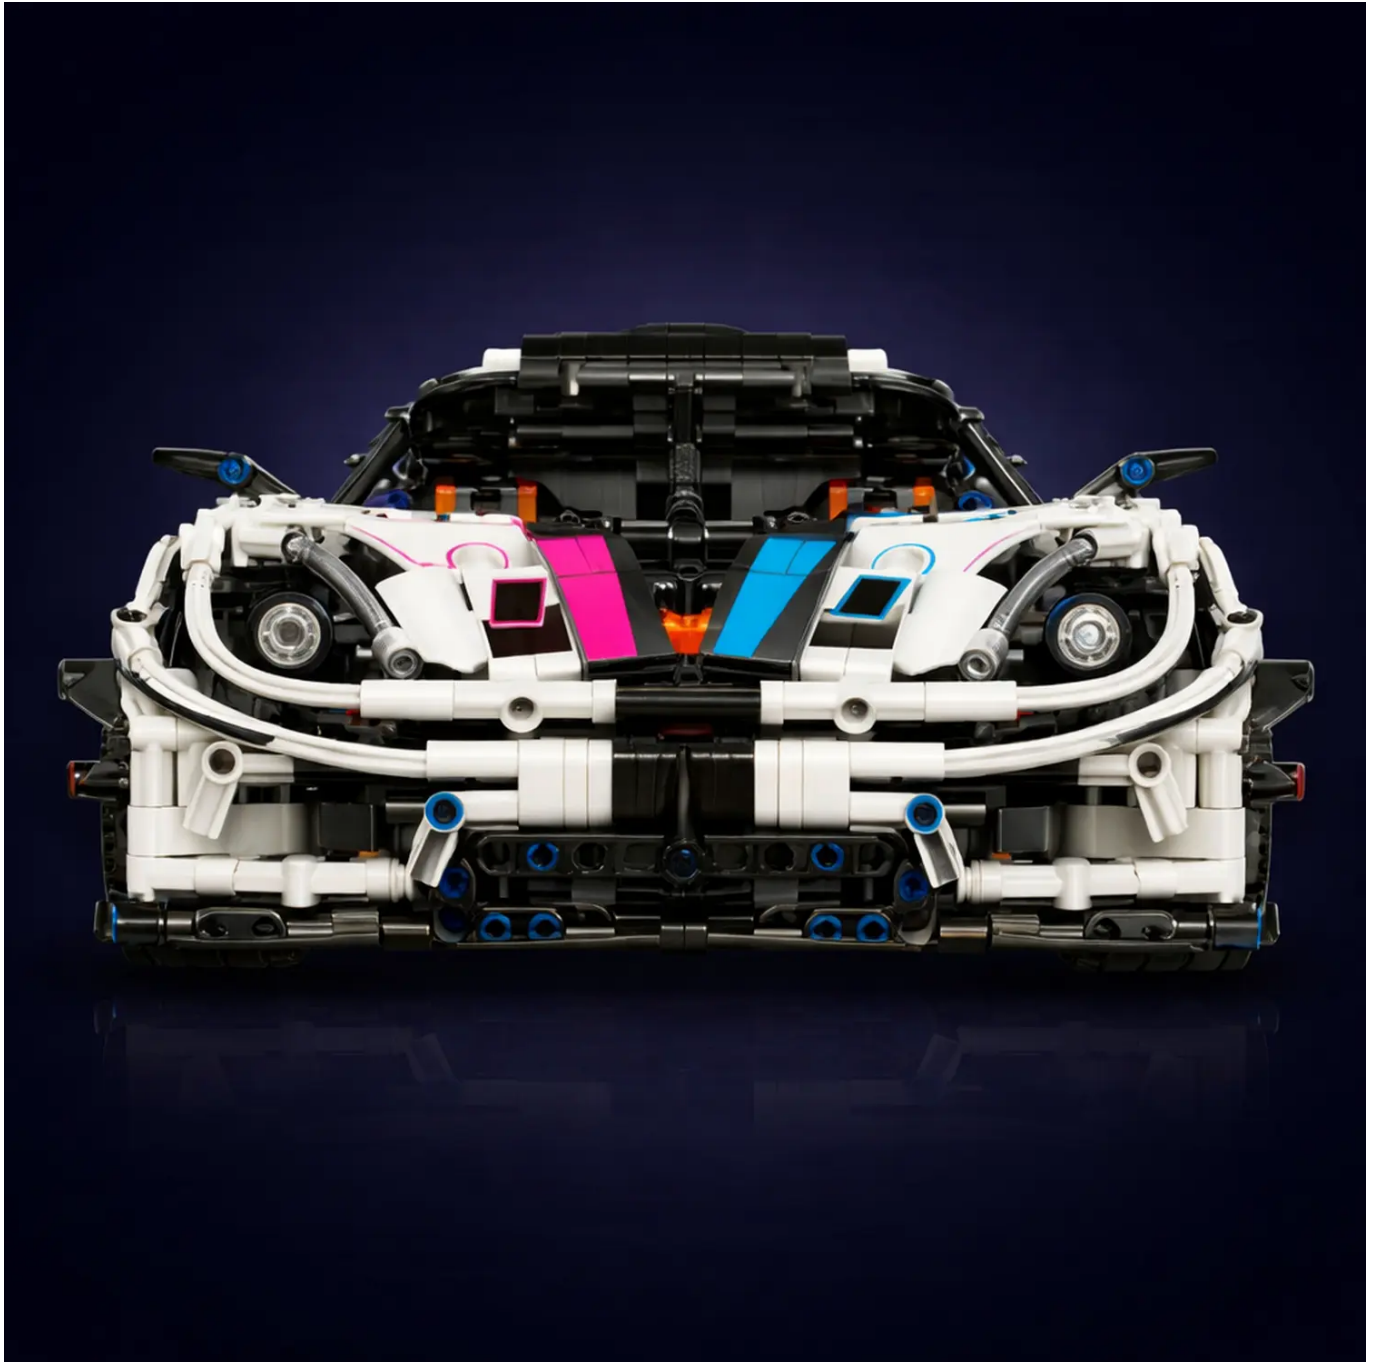

Model Mould King - Regera Hypercar

The Mould King - Regera Hypercar model is a unique set consisting of 3,063 pieces, allowing you to build a hyper-luxurious car with the highest precision of workmanship. This hypercar, known for its unique design, has been recreated with attention to detail, offering both aesthetics and functionality. The set is equipped with advanced mechanisms that enable full control over the vehicle's movement and steering.

Dynamic fun with remote control

Thanks to the advanced mechanism, the model offers dynamic fun, allowing full use of the vehicle's potential. Opening doors, a precisely recreated interior and a working engine with moving elements increase realism. The Regera also stands out with independent suspension, which adds even more realism during "driving". Please note that the set does not include a remote control module - it can be purchased separately.

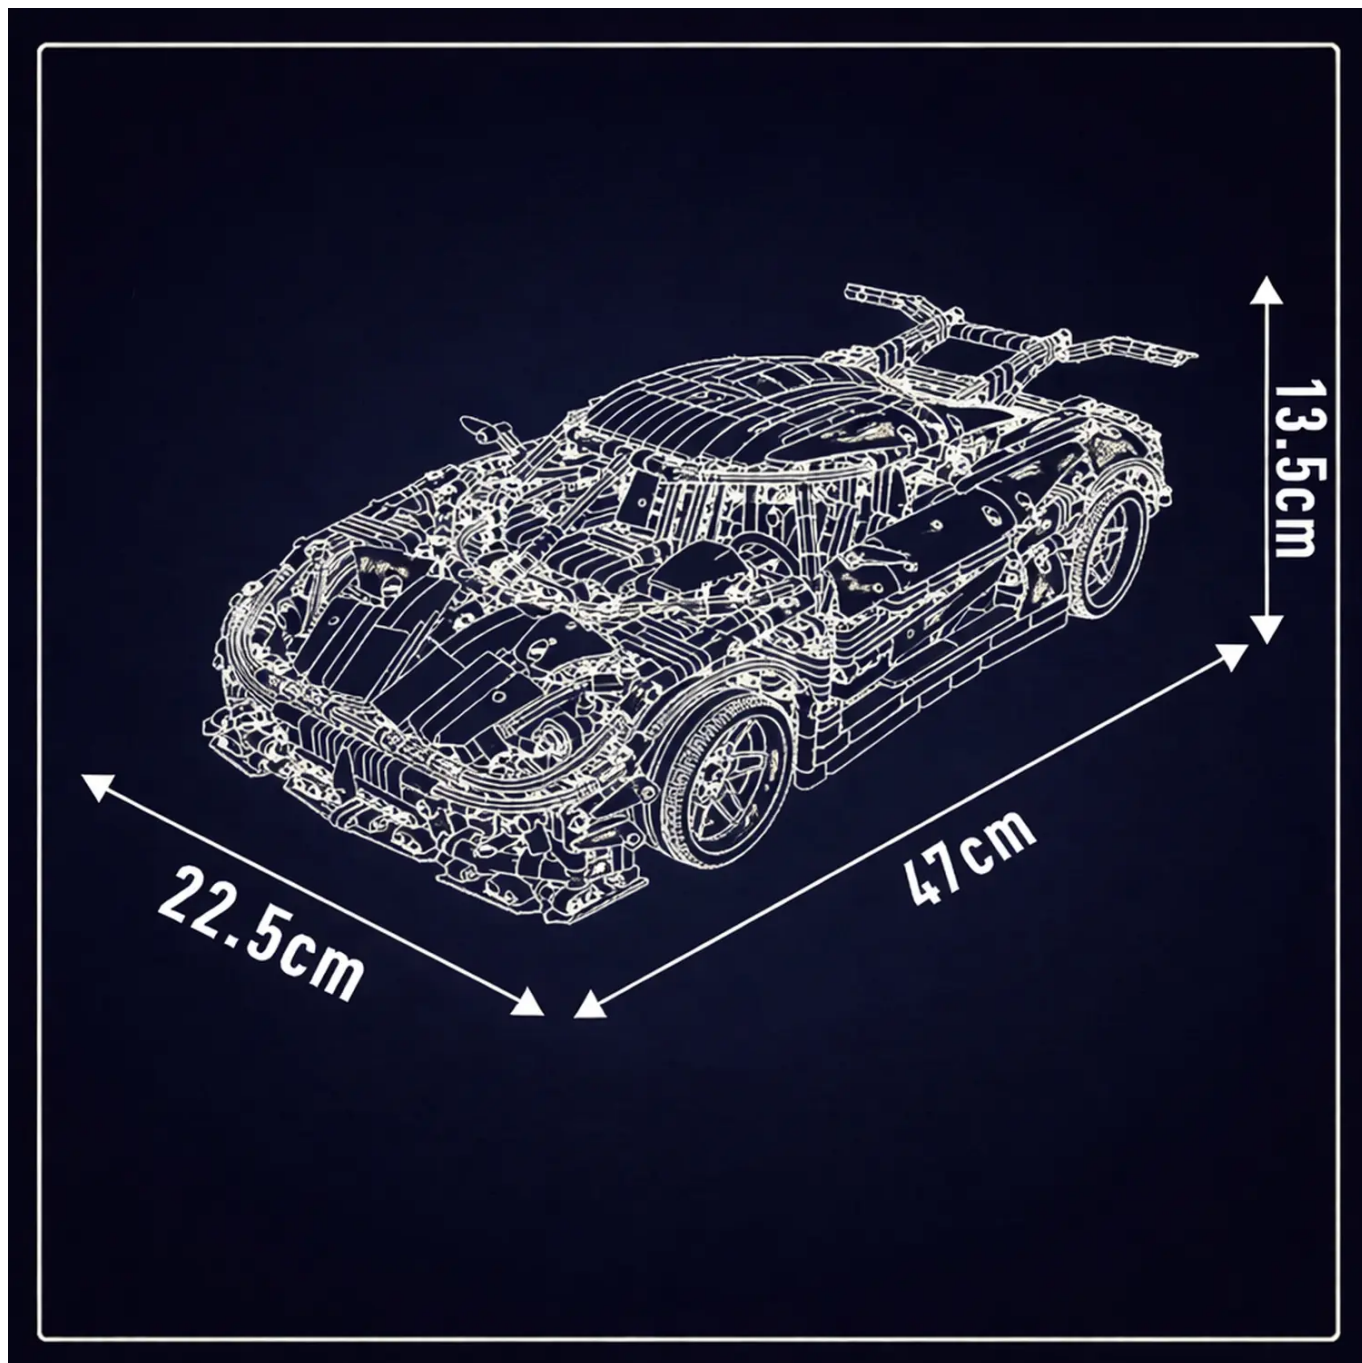

The ideal choice for motoring enthusiasts and modellers

This is a set that will certainly satisfy both motoring enthusiasts and modellers. Over 3,000 pieces provide many hours of building and satisfying fun. The Regera Hypercar model is perfect as a gift for anyone interested in advanced models, as well as for those looking for a challenge in building complex vehicles.

Technical specification

The Mould King - Regera Hypercar set is also the perfect opportunity to create a vehicle that not only looks beautiful, but also impresses with its functionality and details. Once assembled, it will become a wonderful decoration for any collection.
