Information:

Mould King 24074 is a collector's building set for the iconic 126p in an expedition version. The model, made up of 393 pieces, faithfully captures the car's distinctive silhouette, while the red bodywork and roof rack with accessories give it a unique, adventurous style. The set includes a detachable trailer for camping gear, an opening boot and a working tow hitch, as well as additional scene elements such as a well, a signpost and vegetation. It is an excellent choice for adult motoring and building-block fans, ideal for display and for creating outdoor dioramas.

Full product description

Classic in an expedition version

The **Mould King 24074** set lets you build the iconic 126p model, which has fascinated adult motoring enthusiasts for years. The construction, made up of **393 pieces**, faithfully captures the vehicle's distinctive silhouette, combining nostalgia with the satisfaction of building. The red bodywork and **roof rack** with accessories emphasise the unique, adventure-inspired style of this collectible model.

Key features of the 126p Outdoor

- **Mobile trailer** – detachable transport module for camping gear.
- **Functional elements** – opening boot and working tow hitch.
- **Rich details** – the set includes a well model, a signpost and vegetation.
- **Compact scale** – the model is easy to display on an office or home shelf.

Ready for long journeys

The model offers extensive display possibilities thanks to the **detachable trailer** and rich travel equipment. Elements such as **travel gear** on the roof make the build look more realistic and stand out from standard vehicles. This solution helps create interesting dioramas with an **Outdoor Adventure** theme, catching the eye of any brick fan.

Precision and scene details

In addition to the vehicle itself, the set includes environmental elements that create a complete story around the model. The **signpost** and natural details make the whole thing look like a ready-made scene. The high-quality finish of **Mould King** bricks contributes to the durability of the construction, allowing the model to be moved freely without the risk of loosening important mechanical parts.
