Information:

The Black Forest SUP board 320 × 81 × 15 cm is a stable and comfortable model for recreational paddling on lakes, calm rivers and coastal waters. The 81 cm width and 15 cm thickness provide good buoyancy and a secure position when paddling standing, kneeling or sitting. The inflatable construction makes the board easy to transport, store and take on trips. The set includes an adjustable 3-piece aluminium paddle with TPR grips, a hand pump, a transport backpack, a safety leash, a removable fin, a repair kit and instructions. The easy inflation and folding system means the board is quickly ready for use and just as quickly packed back into the backpack after activity.

Full product description

Freedom on the water

The Black Forest SUP board 320 × 81 × 15 cm has been designed for recreational paddling on lakes, calm rivers and coastal waters. Its length promotes smooth tracking, while the 81 cm width supports a stable stance when paddling. It is a good choice for relaxation, balance training and peaceful trips on the water.

Stable construction

The 81 cm width makes it easier to position your feet and helps maintain balance while paddling. The 15 cm thickness affects the board's buoyancy, allowing the user to comfortably use it in a standing, kneeling or seated position. The elongated shape supports smooth movement across the water's surface.

Comfortable paddling

The inflatable design makes it easy to transport and store the board out of season. Once deflated, the board can be folded and placed in the transport backpack. This solution means the equipment can be taken to the water by car or camper van, or stored at home without needing to make space for it.

Time for paddles!

The set includes a 3-piece aluminium paddle. The grips are made of TPR material, so wet hands are less likely to slip while paddling. The length adjustment range from 165 to 208 cm allows the paddle to be adapted to the user's height, personal needs and paddling style.

Easy operation

The board is easy to inflate and deflate. A special high-pressure valve allows it to be quickly prepared for use with the included pump. The recommended pressure is 15 PSI, which is about 1 bar. After finishing your activity, you can quickly deflate the board, fold it and pack it into the backpack.

Set

The set includes a Black Forest SUP board 320 × 81 × 15 cm, a 3-piece aluminium paddle with TPR grips, a hand pump, a SUP backpack, a safety leash for the feet, a removable standard large slot-type tail fin, a repair kit and an instruction manual. The hand pump allows the board to be prepared without additional equipment, and the safety leash helps keep the board close to the user after entering the water or losing balance.
