Manufacturer: EXTRALINK

Referention number: DNXGKINMHRMMKO

Information:

The Black Forest SUP board 305 × 81 × 15 cm is a stable model for recreational paddling on lakes, rivers and calmer waters. Its wide design makes it easier to keep your balance, while the rigid 2700 GSM drop-stitch material and double-layer sides increase durability and user comfort. The non-slip 3 mm EVA foam improves foot grip, and the included 3-piece aluminium paddle with 165–208 cm adjustment lets you adapt the equipment to the user. The board can be inflated to 15 PSI, and after use it can be easily packed into a backpack. A hand pump is also included.

Full product description

Black Forest SUP Board

The Black Forest SUP board, measuring 305 × 81 × 15 cm, is a model designed for recreational paddling on calmer waters. The 81 cm width helps maintain balance, while the 15 cm height supports the rigidity of the structure once inflated. It is ideal for leisure time by a lake, river or on a holiday trip.

Comfort on the water

The 305 × 81 × 15 cm dimensions provide comfortable space for standing and kneeling paddling. The wide surface helps maintain balance, making it easier to manoeuvre calmly and learn the basic movements on a SUP board.

Rigid construction

The board is made from 2700 GSM drop-stitch material. The internal structure, 15 cm high, helps maintain its shape when inflated, so the board performs well during recreational use on the water.

Double-layer side

The side panel consists of two layers: an inner layer 0.52 mm thick and an outer layer 0.7 mm thick. This construction reinforces the edges of the board and increases the resistance of the side sections to typical loads during paddling and carrying.

3 mm EVA foam

The top of the board features 3 mm EVA foam. Its surface improves foot grip and increases comfort during longer periods on the board, both standing and kneeling.

Paddle and handling

The set includes a 3-piece paddle with an aluminium construction and TPR material grips, which help you hold it more securely in your hands while paddling. Length adjustment from 165 to 208 cm makes it easy to adapt the paddle to the user. The board has a high-pressure valve, allowing it to be inflated to the recommended 15 PSI (1 bar), and then deflated efficiently after use.

Backpack transport

Once deflated, the board can be packed into the included backpack. This makes it easier to transport the equipment by car, carry it to the water and store it out of season. The set also includes a hand pump.
