Price: **239.00 zł** gross / 194.31 zł net

Manufacturer: EXTRALINK

Referention number: DNXGKINMMRMMPJ

Information:

The compact 20000 mAh solar hand-crank power bank provides independent power in the field, during camping trips and survival expeditions. It offers four charging methods: USB-A, USB-C, integrated cables, a solar panel and an emergency crank, as well as 20W Power Delivery fast charging and 15W Qi wireless charging. It allows up to 7 devices to be powered simultaneously. The durable, waterproof, dustproof and shock-resistant housing protects the equipment in harsh conditions. Additional features such as a camping light, torch, SOS, compass and thermometer make it practical support in any situation.

Full product description

Energy for every condition and complete independence

A compact hand-crank solar power bank with a capacity of **20000 mAh** means that lack of access to the mains electricity grid is no longer a problem during camping trips or long expeditions. The device combines the function of an efficient power source with a **camping light**, compass, thermometer and even the option of charging via the integrated crank. The thoughtfully designed casing protects the interior while also offering **15W wireless charging** and integrated cables, so you always have the whole necessary set in one place.

Four alternative ways to charge

No socket in sight no longer means being cut off from the world, because this model offers complete power flexibility. You can top up the energy traditionally via **USB-A and USB-C ports** or using the integrated mains cables. In difficult outdoor conditions, the efficient **solar panel** and **hand crank** come to the rescue, enabling manual power generation in emergency situations.

Construction built to survive in the field

The rugged casing with orange accents has been designed with lovers of extreme expeditions and survival in mind. Special seals and reinforced edges make the equipment fully **waterproof, dustproof and shockproof**. An accidental drop onto rocks, contact with water or heavy rain will not affect its proper operation.

Multi-functional lighting and support in crisis situations

The integrated LED panel turns the device into an efficient source of light that successfully replaces traditional camping lighting. The user has **four operating modes** at their disposal, which help in different scenarios:

- **Camping light** - disperses the darkness around the tent and makes evening preparations easier.
- **Torch** - with a strong beam, making it easier to move around after dark in a dense forest.
- **Strobe and SOS signal** - making it easier to call for help in the event of a sudden accident on the road or trail.

A huge reserve of energy for all your devices

The impressive cell capacity translates into real support during multi-day camps far from civilisation. The stored energy allows for **4 full charges of a modern phone** or powering a tablet more than twice. It is an excellent solution for people travelling with smartphones, wireless headphones or camping torches that require regular top-ups.

POWERBANK 20000mAh

Wysoka pojemność, która gwarantuje niezawodne zasilanie przez długi czas.

Fast charging for up to 7 devices at once

20W Power Delivery technology via the USB-C connector significantly shortens the time needed to recharge the battery in connected equipment. The rich set of outputs includes two USB-C ports, classic USB-A, a plug dedicated to iOS devices and a **15W Qi wireless charging area**. This configuration allows you to share energy with travel companions at the same time without having to wait your turn.

Convenient wireless charging in natural surroundings

The 15W inductive charging module eliminates the need to carry a tangle of cables on mountain trails. Simply place a compatible smartphone on the casing to start transferring power immediately. A clear **wireless charging indicator** in the form of coloured LED lights keeps you up to date with the operating status and the level of available energy.

Handy and easy to carry

Optimal dimensions and an elongated shape make it easy to pack the device into a side pocket or travel bag. The included **sturdy carabiner** lets you secure the equipment to the outside of a backpack, making it easier to keep the panel exposed to the sun while walking. In addition, the **compass and thermometer** built into the casing help with efficient navigation and monitoring weather conditions along the route.
