momcozy

Manufacturer: MOMCOZY

Referention number: DNXGKINNGRMMKN

Information:

Momcozy Air 1 Ultra-Slim is a discreet, slim shell breast pump that allows you to express milk comfortably at home, at work and while travelling. The wireless charging case provides up to 15 sessions or 5 days of use without cables, and the ultra-quiet operation below 45 dB guarantees complete discretion. The transparent top section makes correct positioning easier, while the soft 50A silicone funnels adapt to different breast shapes, increasing comfort and efficiency. The Momcozy app allows you to monitor sessions, change modes and receive notifications. Easy to disassemble into 5 parts and simple to clean, with a durable PPSU container.

Full product description

Discreet and comfortable design

The Momcozy Air 1 Ultra-Slim breast pump enables almost invisible milk expression. Its slim shell-shaped form helps you feel confident at work, in public places and at home. The transparent upper part makes it easier to position the nipple correctly and monitor the amount of milk, minimising discomfort during use.

Wireless convenience

The charging case allows for up to 15 sessions or 5 days of use without the need to connect cables. This compact solution eliminates tangled wires and makes it easy to store the entire set in one place, simplifying mums' daily routine.

Łatwa do czyszczenia

Quiet and intelligent operation

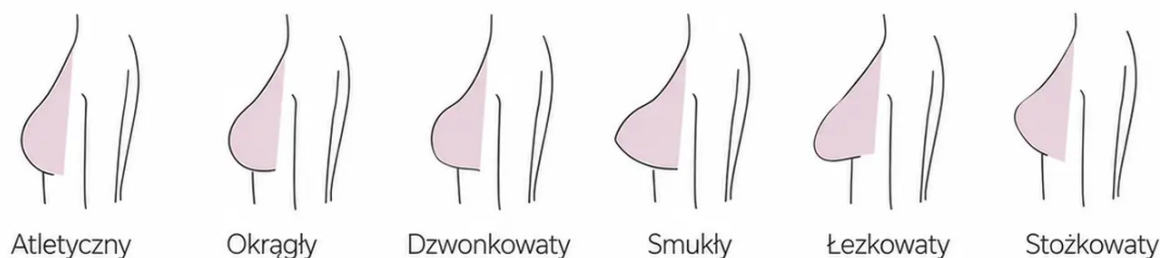

Thanks to ultra-quiet operation (<45 dB), the breast pump works discreetly without disturbing the peace around you. Integration with the Momcozy app allows you to monitor the pumping process in real time, change operating modes and receive notifications when the container is full, making use comfortable and hassle-free.

Komfort w każdej krzywiźnie

Miękki kołnierz silikonowy 50A zapewnia delikatne dopasowanie dla efektywnego odciągania pokarmu

Delikatne dopasowanie do większości kształtów

Comfort and fit

The soft 50A silicone flanges adapt to different breast shapes — round, slim, bell-shaped or teardrop-shaped. The stable fit increases pumping efficiency and comfort during sessions.

Inteligentne sterowanie laktatorem

* Interfejs aplikacji ma charakter poglądowy i może ulec zmianie.

Easy cleaning and durability

The breast pump consists of five parts that need washing, with no additional tools required. The milk collector is made of non-porous PPSU, easy to clean and resistant to long-term use, saving time and supporting hygiene.
