Full product description

Extralink PS-48V60W Power Supply - Reliable PoE Power for your Network.

The Extralink PS-48V60W power supply is a robust and efficient solution for powering devices using Power over Ethernet (PoE) technology. It is designed to provide safe and stable operation in a variety of network environments. Compatibility with the 802.3af/at PoE standard makes it ideal for powering IP cameras, VoIP phones, WiFi access points and many other devices.

Energy Security and Efficiency

The safety of your equipment is a top priority. That's why the PS-48V60W power supply is UL, CE, FCC and RoHS certified, confirming compliance with stringent safety standards. In addition, its high energy efficiency, which complies with Level 6 guidelines, reduces energy consumption and saves money in the long run. Built-in short-circuit, overcurrent and overvoltage protections further protect connected devices from damage.

Universal Application and Easy Installation

With a wide input voltage range (100~240V 50/60Hz), the power supply can be used in different regions. The output parameters of 48V and 1.25A (60W) provide stable power for a wide range of PoE devices. A C14 AC power cable is included (various regional plugs available) for easy installation. The PS-48V60W power supply is ideal for applications such as powering network switches, Ethernet switches and PoE Injectors.
