Information:

iFlight Nazgul Evoque F7 O4 6S HD is a 7-inch long-range FPV drone created for cinematic shots and demanding flights. The Deadcat geometry removes the propellers from the frame, and the DJI O4 Pro system provides a stable live view and 4K recording with a wide 155° angle and excellent low-light performance. The powerful 6S drive with XING2 2809 1250KV motors offers a large power reserve, speeds of up to 140 km/h, and flight time of up to 25 minutes. Borg F7 electronics with ESC 60R, GPS, ELRS, and a sealed design increase reliability, safety, and resistance to harsh conditions. An ideal choice for professionals and premium FPV enthusiasts.

Full product description

Cinematic long-range drone

iFlight Nazgul Evoque F7 O4 6S HD is an advanced **drone** in the 7-inch class, designed to carry out the most demanding long-range missions. Thanks to the Deadcat (DC) geometry, the propellers remain out of the camera's field of view, allowing you to capture clean, cinematic footage in the highest-quality **hd**. The device has been equipped with the **dji** O4 Pro transmission system, which offers a stable live view and unprecedented image detail. This model is an option for pilots who expect reliability from FPV during flights over mountains or sea, offering extended flight time and resistance to harsh conditions.

Szczegóły Produktu

Boczna Płyta CNC

dla Pełnej Ochrony Kamery

Mocowanie Anteny VTX

Wzmocniona wytrzymałość
ze stałymi mocowaniami
kołnierzowymi M2.

Wbudowany Brzęczyk

Lutowanie Nie Wymagane

Pełna Rama ze Stopu Aluminium

Wzmocniona Rama dla Wytrzymałości

Zintegrowany Moduł LED

Konstrukcja All-in-One

DJI O4 Pro Air Unit technology and 4K quality

The key element of the drone is the **air unit** DJI O4 Pro module, which takes **fpv** recording to a completely new level. Equipped with a 1/1.3-inch sensor, it performs excellently in low-light conditions, delivering 4K footage with a wide 155° field of view. The **dji o4** system provides a transmission range of up to 15 km (FCC), making **drones** in this series some of the most efficient tools for creating video content. Support for RockSteady 3.0+ technology guarantees smooth footage even during aggressive **flight** in difficult terrain.

*Więcej szczegółów znajduje się w uwagach lub instrukcji produktu.

Borg Stack electronics and F7 controller

Inside the **nazgul evoque** is a modern Borg **stack**, consisting of the efficient **f7** controller and the Borg 60R **esc**. This system has a built-in anti-spark filter and a dual BEC power supply system, which translates into stable operation of all components. This advanced **flight controller** has been optimised for flight stabilisation and support for the **gps** module, which is standard in this model. The fin-shaped cooling channel design effectively dissipates heat, protecting the electronics from overheating during long sessions in the air.

Trójwarstwowa Powłoka Nano-Próżniowa

Proces Wodoodporny

Pewna ochrona przed trudnymi warunkami deszczowymi i śnieżnymi.

6S power and XING2 drive

The **iFlight Nazgul Evoque** drone has been optimised for **6s** power, which, combined with the powerful XING2 2809 1250KV motors, provides a huge power reserve and a payload capacity of up to 800g. The standard **connector** of the **xt60** type allows safe connection of high-capacity batteries, such as a **battery** 6S 8000-10000mAh, enabling a hover time of up to 25 minutes. The high-quality **6s hd** setup means the machine can reach speeds of up to 140 km/h while remaining stable even in strong wind. It is the ideal choice for those looking for a ready-to-use **bnf** solution for professional applications.

Udoskonalona Konstrukcja Formowana Wtryskowo

Zastosowano w pełni formowane wtryskowo komponenty, zapewniając doskonałą integralność materiału i udoskonaloną gładkość w dotyku.

Safety and intelligent flight systems

The **Nazgul Evoque F7** model focuses on safety thanks to the integrated GNSS system (GPS, Galileo, Glonass), which enables a return-to-home function in the event of signal loss. The drone has a sealed design that protects the interior from splashes, which is rare in the class of high-performance **FPV** machines. The dual ELRS receiver antenna ensures stable **dual** band communication, eliminating the risk of interference in complex environments. As a result, **iFlight** has created a drone that is not only fast, but above all predictable and safe for the user.

Seria Nazgul Evoque

Klasyczny projekt ramy DC dla bardziej niezawodnych lotów długodystansowych

Kontynuując język projektowania serii Nazgul Evoque, geometria DC zapewnia kinowe ujęcia bez śmigieł w kadrze. Wbudowane nagrywanie dla bezpośredniego wyjścia wideo, lataj swobodnie i twórz bez wysiłku, rejestrując niezakłócone widoki na góry i morza.

Technical specifications

Parameter	Value
Model	Nazgul Evoque F7 O4 6S HD
Video system	DJI O4 Air Unit Pro
Flight controller (FC)	Borg Mini F7
ESC	Borg 60R 60A
Motors	XING2 2809 1250KV
Power supply	6S (LiPo/Li-Ion batteries)
Transmission range	Up to 15 km (FCC) / 8 km (CE)
Weight (without battery)	765 g

Key advantages

- **DJI O4 Pro system:** The highest 4K image quality and stable low-latency transmission.
- **6S HD performance:** Powerful motors and optimised drive for long cinematic flights.
- **Deadcat geometry:** No propellers in the frame, ensuring clean shots without the need for editing.
- **GPS safety:** Advanced positioning system and rescue functions to protect the equipment.
- **Sealed construction:** Increased resistance to splashes and moisture during flight.

This product is suitable for:

- Professional video creators looking for a stable **FPV** platform for landscape shots.
- Pilots flying long distances (Long Range), requiring a reliable **DJI** system.
- Users needing a drone with a high payload capacity for mounting additional accessories.
- Hobbyists looking for a premium-class machine with the latest **o4** system.
