Manufacturer: MOMCOZY

Referention number: DNXGJOIPFRMMKQ

Information:

The Momcozy SE01 Baby Food Maker is a practical device for the quick preparation, portioning and storage of homemade purées and mousses for babies. Thanks to its Anti-splash design, it reduces splashing and keeps the worktop clean, while the wide, stable base increases safety during use. The product is made from BPA-free materials such as PP and silicone, safe for contact with children's food. Easy cleaning, quick drying without hard-to-reach areas, and dishwasher-safe parts make it convenient for everyday use. The set includes 5 reusable pouches, suitable for freezing, ideal for storing and taking meals on the go.

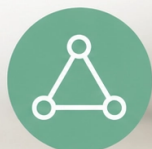

Full product description

Momcozy SE01 Baby Food Maker – Food preparation device for babies

The Momcozy SE01 Baby Food Maker is a functional device designed for the efficient preparation and portioning of meals such as purées for little ones. This practical product supports parents during the weaning stage, making everyday feeding easier and allowing for **hygienic food storage**. As a versatile accessory, the station enables quick filling of pouches without mess, so homemade baby food is always close at hand. Its thoughtful design means that buying this model is a worthwhile investment in everyday convenience.

Węższe u góry, szersze u dołu

Szersza podstawa zapewnia
większą stabilność

Construction and stable base - Safety and Anti-splash function

When designing this product, the manufacturer used an anti-splash system (Anti-splash tubing design), so the purée goes directly into the pouch and the worktop stays clean. The device features a downward-widening base, which guarantees **high stability when pressing the plunger** and eliminates the risk of the unit tipping over. The whole product is made from certified BPA-free materials, such as Polypropylene (PP) and silicone, making the entire process completely safe for the health of a baby.

Use for portioning and storing food

The Momcozy device combines filling, pressing and dispensing food without the need for additional tools. It is an excellent complement to accessories used at the stage when breastfeeding gives way to solid meals or when, alongside accessories such as a bottle and milk container, there is a need to serve fruit and vegetable purées. The set includes **5 reusable pouches**, which can be safely frozen in the freezer and washed in the dishwasher, making it easier to prepare supplies for trips or walks.

Szybkie napełnianie saszetek z jedzeniem dla dziecka

Hygiene, operation and easy drying process Easy-to-clean

The Momcozy Baby Food Maker station has been designed according to the Easy concept, which means that its everyday use and cleaning are as simple as possible. The innovative construction method eliminates lower nooks where water could collect, which **speeds up drying and prevents bacterial growth**. The components are dishwasher compatible, so easy disassembly allows the equipment to be prepared quickly for the next use. For many people, an important factor when choosing products from this brand is also a reliable consumer protection policy, including an option for returning goods within 30 days, which increases the comfort of online shopping.

Space organisation and food storage

The system allows for efficient management of baby food supplies, making it easier to sort prepared portions in the fridge or freezer. The regular shape of the filled pouches makes them easy to stack, which **optimises space usage** in cooling appliances. The transparent walls of the included containers make it possible to quickly assess the contents and check how much purée is left without having to open the closure. It is a practical way to keep the kitchen tidy, especially when preparing larger batches of meals for the whole week.
