momcozy

Manufacturer: MOMCOZY

Referention number: DNXXGJLLLRMMMO

Information:

Momcozy BreezyClear Pro™ is an electric nasal aspirator for babies and small children, combining gentle humidification with efficient mucus suction. Thanks to 9 suction levels and vacuum pressure of up to 75 kPa, it effectively loosens and removes even thick nasal discharge, while automatic mist shut-off after 6 seconds helps protect the sensitive mucous membrane. Quiet operation at 59 dB and built-in music increase comfort during use. The device has a practical storage compartment for accessories, a stable base, and easy-to-remove parts that can be washed in the dishwasher. The set includes two silicone tips designed to fit small nostrils.

Full product description

Electric nasal aspirator Momcozy BreezyClear Pro™

The Momcozy BreezyClear Pro™ electric nasal aspirator is a functional device designed for comprehensive respiratory hygiene in infants and young children. The device combines targeted humidification with mechanical suction of secretions, making it easier to clear a blocked nose. The design has been created to simplify care and make it more comfortable for a sensitive child, providing practical support during infections and for everyday respiratory hygiene at home.

Skutecznie usuwa katar i ułatwia oddychanie

Udrażnia nos

Zapewnia swobodny oddech.

Lepszy sen

Spokojniejsze noce dla dziecka.

Szczęśliwsze dziecko

Komfort i ulga każdego dnia.

2-in-1 dual-action technology and adjustable suction power

The 2-in-1 design is based on a two-stage nasal cleansing process. In the first step, the device uses a soft mask made of Silicone material to deliver a precise mist that effectively softens and loosens thick, stubborn mucus. Next, the efficient suction module draws out the secretions with power close to the standards used in medical facilities, generating negative pressure of up to 75 kPa. The system offers 9 adjustable intensity levels, allowing the pump's operating parameters to be matched to the thickness of the secretions and the child's individual sensitivity.

Automatic safety mechanisms and quiet motor operation

To ensure proper protection of the delicate mucosa, the device is equipped with an automatic timer switch that stops the humidification process after 6 seconds. The advanced motor design means the aspirator operates at a low noise level of 59 dB. This acoustic profile prevents a sensitive little one from being frightened, making the procedure easier to carry out in infants. An additional feature that helps distract the child during nasal cleansing is the built-in module that plays soothing music.

Nasz najmocniejszy elektryczny aspirator do nosa klasy szpitalnej

Skuteczne usuwanie wydzieliny.
Ułatwia oddychanie. Zapewnia ulgę.

Silna moc ssania

9 poziomów ssania

Nawilżanie 2 w 1

Bezpieczny i higieniczny

Practical design with built-in storage compartment

The device housing has been designed with ergonomics and the convenience of storing all components in one place in mind. The storage compartment integrated into the base structure allows accessories to be kept hygienically, protecting them from being lost and from dust contamination. The stable base prevents the aspirator from accidentally tipping over on flat surfaces, which is helpful when carrying out the procedure one-handed while caring for an active child.

Wbudowany schowek na akcesoria

Wszystko, czego potrzebujesz, zawsze pod ręką.

Dwie końcówki

Dla lepszego dopasowania do potrzeb dziecka.

Szczoteczka do czyszczenia

Łatwe i higieniczne czyszczenie.

Praktyczny klips

Pomaga utrzymać porządek i zapobiega zgubieniu.

Easy cleaning and dishwasher-safe component hygiene

The structure of the parts that come into direct contact with secretions allows for quick disassembly and thorough washing. The aspirator components are made from materials resistant to high temperatures, so they are safe to clean in a dishwasher. This helps prevent the growth of microorganisms and makes it easier to maintain cleanliness for repeated use. The set includes two interchangeable, flexible silicone tips, suited to different nostril sizes in infants and young children.

Wbudowane miejsce do przechowywania

Wszystko w jednym miejscu.
Czysto, bezpiecznie i zawsze pod ręką.

Kompaktowe etui

Wszystkie akcesoria
w jednym miejscu.

Chroni przed zabrudzeniem

i pod ręką.

Technical data

Parameter	Value
Brand	Momcozy
Model	BreezyClear Pro™
Device type	2-in-1 electric nasal aspirator
Maximum suction power	Up to 75 kPa
Suction power adjustment	9 intensity levels
Automatic shut-off	Yes, after 6 seconds (humidification function)
Noise level	59 dB
Accessory material	Silicone
Multimedia functions	Music playback
Maintenance	Selected parts can be washed in a dishwasher

Delikatnie rozrzedza wydzielinę, ułatwiając odsysanie

Nawilża błony śluzowe

Zapobiega wysychaniu i podrażnieniom.

Ułatwia oddychanie

Zmniejsza gęstość wydzieliny.

Bezpieczny dla dzieci

Delikatna i skuteczna ulga.

Key benefits

- **Multi-level adjustment:** The option to choose from 9 suction levels allows the device to be adapted to current needs.
- **Mucosal safety:** The automatic mist cut-off system after 6 seconds prevents excessive humidification.
- **Integrated storage compartment:** Practical space inside the housing makes it easy to hygienically store the silicone tips.
- **Efficient mucus reduction:** High negative pressure of up to 75 kPa allows stable suction even of deeply lodged secretions.
- **Acoustic comfort:** A noise level of 59 dB combined with music reduces stress and makes child care easier.

The product is intended for

- **Parents of infants and young children:** Those looking for a safe and effective way to clear the nose without irritation.
- **Carers who value easy sterilisation:** Those seeking devices with parts that can be washed in a dishwasher without difficulty.
- **People looking for portability and tidiness:** For whom a stable base with a compartment holding the entire accessory set is important.
