Information:

Momcozy BS04 4-in-1 Bottle Sterilizer and Dryer is an electric steam steriliser with drying and storage functions, designed for hygienic care of bottles, teats, teethingers and breast pump parts. Steam sterilisation takes just 8 minutes, and drying takes less than 30 minutes. The Storage mode keeps accessories sterile for up to 72 hours. The compact, space-saving design holds up to 6 bottles and small accessories, while the automatic operating modes make everyday use easier. The device does not wash items, so they must be washed beforehand before use.

Full product description

Momcozy BS04 4-in-1 Bottle Sterilizer and Dryer

Momcozy BS04 4-in-1 Bottle Sterilizer and Dryer is an electric bottle steriliser with a drying function, designed to ensure proper hygiene for baby feeding accessories. The device combines four basic operating modes in one automatic system, allowing efficient processes such as sterilisation, drying and safe storage of clean items. The product is a great help in parents' daily routines, eliminating the need for traditional scalding with boiling water.

Kompaktowy i łatwy do przechowywania

Stworzony do codziennego życia — zajmuje mało miejsca, a bardzo pomaga.

Kompaktowy rozmiar

Lekki i poręczny

Łatwy do przechowywania

Bezpieczne i higieniczne

Thoughtful design and efficient steam sterilisation

The device uses an advanced Steam Sterilization system, which neutralises contaminants in 8 minutes using hot steam. This cleaning method is completely safe for plastic and glass structures. The device housing has been reduced by 19% compared with standard models on the market, while retaining a large internal space that holds up to 6 standard bottles and small newborn accessories such as teats or teething rings.

Bezpieczne i higieniczne przechowywanie

Bez pośpiechu przy myciu — zawsze świeże, gdy tego potrzebujesz.

Varied operating modes and fast drying

This multifunctional bottle sterilizer and dryer offers users independent operating modes: Sterilization Mode, Drying Mode and an automatic mode combining both processes. Efficient drying technology ensures items are dry in under 30 minutes. The set also includes an additional drying rack, which allows water to evaporate freely from accessories after using the bottle washer, making it easier to organise space on the worktop.

Zaprojektowany, by zmieścić się wszędzie

Zajmuje mało miejsca, a daje pełen spokój.

Long-term storage and universal functionality

The Storage function allows sterile bottles to be safely stored inside the closed chamber for up to 72 hours, without the risk of recontamination. The device features a modular design (Stackable Design), which allows the elements to be stacked and makes transport and storage easier in smaller cupboards. The product is also suitable for preparing items such as breast pumps or replaceable breast pump parts that require regular disinfection.

Szybka i dokładna sterylizacja

Zyskaj więcej czasu na to, co naprawdę ważne.

Safety and installation guidelines

During daily use, remember that the Momcozy Bottle Sterilizer is a device dedicated to disinfection and drying, and does not have a washing function – items must be thoroughly washed before being placed inside. The BS04 model is designed exclusively for the 120V power supply standard, which should be taken into account when choosing mains power sources or travel adapters when away.

Rated voltage	120V (USA standard)
Sterilisation time	8 minutes (Steam Sterilization)
Drying time	Under 30 minutes
Safe storage time	Up to 72 hours in a closed chamber
Chamber capacity	Up to 6 standard bottles + accessories
Housing design	Modular (Stackable Design), 19% smaller in size

Key benefits

- **Fast steam sterilisation** – complete cleaning of accessories using steam in just 8 minutes.
- **Efficient drying system** – removes moisture from the inside of bottles and small parts in less than half an hour.
- **Long protection mode** – keeps disinfected items sterile for 72 hours inside the device.
- **Practical design** – the reduced base of the device helps save space on the kitchen worktop.
- **Four integrated functions** – process automation makes daily use easier without the need to switch between machines.
- **Additional drying space** – the included drying rack makes it easier to sort washed bottles before sterilisation.

The product is ideal for

- Parents looking for a reliable device for quick disinfection of bottles, teats and newborn accessories.
- Mothers who regularly use breast pumps and need efficient cleaning and drying of milk-pumping parts.
- Owners of kitchens with limited worktop space who need equipment with reduced external dimensions.
- Carers who value automatic operating modes combining scalding and drying in one repeatable cycle.
