Information:

Momcozy NM002 Comfort Nipple Cream is a specialist nipple cream for women who are breastfeeding and expressing milk. It soothes irritation, supports the regeneration and moisturisation of sensitive skin thanks to a natural, plant-based formula with shea butter. It contains no lanolin, petroleum, preservatives or artificial fragrances, and does not need to be washed off before feeding. The innovative Touch-Free ceramic applicator enables hygienic, contact-free application and provides a cooling effect, bringing quick relief. Its lightweight texture absorbs in around 30 seconds, leaving no greasy layer or stains on underwear. The product can also be used on dry lips, hands and other dehydrated areas of the body.

Full product description

Momcozy NM002 Comfort Nipple Cream

Momcozy NM002 Comfort Nipple Cream is a specialist nipple cream developed for the care of women's skin during breastfeeding. The product is designed to soothe irritation and help regenerate the sensitive breast area, which is exposed to strain during regular latching or when using a breast pump. The formula is based on plant-derived ingredients, allowing safe use without the need to wash it off before feeding.

Natural formula and plant-based Shea butter

The ComfortNip™ formula is based on natural plant substances and is free from lanolin, petroleum, preservatives and artificial fragrances. The main nourishing ingredient is Shea butter, which deeply moisturises the epidermis and supports its elasticity. The plant-based composition has undergone rigorous testing, making the nipple cream neutral for the infant's body and leaving no harmful residue.

Ceramic cooling nipple and Touch-Free application

The packaging design uses an innovative ceramic applicator that enables touch-free application of the product to the nipple area. The Touch-Free system allows precise spreading of the emulsion without using the hands, which minimises the risk of transferring contaminants and reduces discomfort associated with touch. The ceramic tip naturally cools sensitive areas, bringing quick relief and making everyday use easier.

Efficient absorption and clothing protection

The Nipple Cream formula has a light, balm-like consistency that absorbs completely within up to 30 seconds. Thanks to its rapid absorption, the product does not leave a greasy, sticky layer on the skin, preventing stains on underwear such as a nursing bra. Regular use helps maintain softness of the tissue and prevents the skin from cracking.

Cooling tips and versatile use of the nipple cream

To enhance the cooling effect, the product can be placed in the fridge's cooling compartment for around 15 minutes. After cooling, the ceramic tip maintains a low temperature for up to 20 minutes, supporting the soothing action of this Nipple Cream. The cosmetic's structure remains stable even with repeated cooling. Beyond basic breast care, the product can be used as a universal balm for the lips, hands or other dry areas of the body.

Technical data

Parameter	Technical specification
Model	Momcozy NM002
Product type	Nipple care cream (Nipple Cream)
Base ingredients	Plant formula, Shea butter (Shea butter)
Excluded substances	Lanolin, petroleum, preservatives, fragrances
Applicator type	Ceramic, reusable (Touch-Free)
Absorption time	Up to 30 seconds
Applicator cooling time	Up to 20 minutes (after 15 min in the fridge)
Safety	Dermatologically tested, safe during breastfeeding

Key benefits

- **Touch-Free application** – the ceramic tip allows application without using the hands, increasing hygiene.
- **Natural lanolin-free formula** – the plant-based composition with Shea butter is safe for the baby and does not need to be washed off before feeding.
- **Fast absorption** – the light texture absorbs in 30 seconds, protecting the bra from dirt and stains.
- **Skin-cooling effect** – the ceramic element quickly lowers the skin temperature, bringing relief to irritated areas.
- **Thermal stability** – the formula retains its physical properties and structure even with regular cooling in the fridge.
- **Multi-purpose use** – the product works well as a moisturiser for chapped lips, hands and dry areas of the body.

The product is ideal for

- Women in the postpartum period experiencing nipple soreness and irritation as a result of breastfeeding.
- Mothers regularly expressing milk, for whom a breast pump causes mechanical chafing of the breast skin.
- Those looking for stable and safe cosmetics based on plant ingredients for a hospital maternity bag.
- Users seeking microbiologically clean touch-free solutions that eliminate the need for hand contact with a wound.
