Information:

Momcozy FD003 Dual Lights Water Warmer is a stationary water warmer for parents who want to prepare infant formula quickly and conveniently, especially at night. It keeps water at a constant temperature 24/7 and offers 6 levels of adjustment from 98.6°F to 176°F, ensuring precise matching to your baby's needs. The large, 57-ounce BPA-free tank holds water for many servings, and the removable design makes cleaning easy. The dual, gentle lighting helps with feeding in the dark without waking your little one, while flow adjustment helps prevent spilling.

Full product description

Momcozy FD003 Dual Lights Water Warmer for Night Feedings

Momcozy FD003 Dual Lights Water Warmer for Night Feedings is a stationary water warmer designed for efficient preparation of infant formula. The device allows water to be kept constantly heated to the selected temperature, which shortens the time needed for the night-time feeding process. This functional Momcozy bottle warmer eliminates the need to wait for water to boil, providing a properly prepared base for formula whenever a newborn or older infant needs a feed.

Safe design and precise temperature control

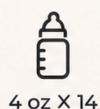

The Momcozy FD003 device offers 6 temperature settings ranging from 98.6°F to 176°F. Such precise temperature control makes it possible to match the liquid parameters to the child's individual needs, helping to preserve the nutritional value contained in the feed. The 57 fl oz tank is made from BPA-free, food-grade materials, which guarantees that the heated water remains clean and free from artificial odours.

Efficient dispensing system and universal compatibility

The warmer is equipped with a practical dial that allows you to adjust the speed of the outgoing water flow. The sealed design prevents accidental leaks, making it easier to keep the feeding area tidy. The large, removable tank holds enough water to prepare up to 14 portions of 4 oz, so less frequent refilling means significant time savings for busy parents.

Removable Water Tank

Step1

Gently shake the water tank to release the latch

Step2

Lift the Tank to Detach It

Practical features that make night-time feeding easier

The Momcozy FD003 model has an integrated Dual Lights lighting system that emits a gentle, non-dazzling glow. This solution makes it easier to fill bottles accurately in a dark room, helping avoid disturbing the baby's sleep. The constant temperature maintenance function works 24/7, so warm water is instantly available at every night-time wake-up, without the need to restart the device.

Easy cleaning and everyday use

The warmer's design allows the tank to be quickly detached from the base, so it can be cleaned easily and thoroughly. Although the product serves a different function from a traditional cordless bottle warmer powered by a module such as a built-in battery, its stable mains power system guarantees uninterrupted readiness for use. The device also works well when breast milk is used as a supplement to the diet, and the mother expresses milk using a breast pump and stores it in dedicated containers.

Technical specification

Momcozy FD003 Dual Lights

57 fl oz (approx. 1.7 litres)

From 98.6°F to 176°F (6 options to choose from)

Parameter	Technical specification
Temperature maintenance mode	24/7 (around the clock)
Safety certifications	BPA-Free, Food-Grade
Lighting	Integrated Dual Lights system (dual light source)
Flow control	Manual dial with sealing system
Tank design	Detachable (removable from the base)

Key benefits

- **Precise temperature control** – 6 settings allow the water to be heated appropriately without the risk of overheating.
- **24/7 operation** – constant heat retention means the water is instantly ready to use at any time.
- **Dual Lights lighting** – makes it easier to prepare a feed in the dark, minimising the risk of disturbing the baby's sleep.
- **Large-capacity, detachable tank** – holds up to 57 fl oz of liquid, and the detachable design makes cleaning quick and easy.
- **BPA-Free material** – certified food-grade components ensure clean water and no artificial odours.
- **Flow speed adjustment** – the ergonomic dial lets you control the water stream and helps prevent spills.

The product is ideal for

- Parents looking for a stationary bottle warmer that speeds up the preparation of formula feeds at night.
- Carers of newborns and infants fed with formula who need constant access to warm water.
- People for whom hygiene, easy cleaning of containers and protection of the feed's nutritional value are priorities.
- Families looking for kitchen equipment that makes night-time childcare easier without waking the rest of the household.
