momcozy

Manufacturer: MOMCOZY

Referention number: DNXGJOIOHRMMLQ

Information:

Momcozy BF008 is a set of 2 reusable gel breast compresses that provide relief during lactation, engorgement, swelling and soreness after feeding or pumping. Thanks to hot & cold therapy, they can be cooled to reduce pain and swelling, or heated to support milk flow and clear blocked ducts. The flexible, enlarged 360° design fits the breasts well and can also be used with a breast pump. The compresses are soft, safe for sensitive skin, free from BPA and latex, easy to clean and convenient for everyday use.

Full product description

Momcozy BF008 - Reusable gel breast compresses for your comfort

The **Momcozy** BF008 Arge Reusable Breast Therapy Packs are an advanced solution for women who want to care for their breasts at every stage of lactation. This enlarged **compress** has been designed to bring relief in the most difficult moments, such as engorgement or soreness after pumping. The set includes **2 pieces**, which, thanks to their flexible structure, adapt perfectly to the shape of the body. It is an essential item for your maternity kit, earning excellent **reviews** among mums looking for support for their **lactation**.

Hot & Cold Breast Therapy Packs - Heat and cold therapy

These **breast gel compresses** offer a dual action, allowing the **breasts** to recover quickly. You can **cool** them in the freezer (minimum 4 hours at -18°C) to **relieve** swelling and pain after intensive feeding. In turn, **Hot** therapy is indispensable before **breastfeeding** – simply **heat** the **compress** in hot water or use the **microwave** mode. The warm **gel compress** helps clear a **blocked milk** duct and stimulates milk flow, making it a product with a broader range of action than standard **Lansinoh** solutions.

Relief for sore breasts and support for lactation

Problems such as **mastitis** or a **sore**, hypersensitive **nipple** require gentle care. **Momcozy** has created a product that protects **sensitive skin** – the material is soft and safe, completely free from toxins and substances such as **latex** or **BPA**. Every **nipple** and **breast** gains protection from pressure, and the enlarged 360° design means the **compress** covers the entire breast surface. As a result, **feeding** becomes less stressful, and **lactation** proceeds in a more controlled and painless way.

Zimna terapia łagodzi ból

Pomaga zmniejszyć obrzęk i ból

Use with a breast pump and ease of use

This **gel compress** has been designed to work with devices such as a **breast pump**. You can wrap the warm **compress** around the funnel, which helps shorten pumping time and increase the amount of milk obtained. This is a feature often appreciated by mums using **Lansinoh** products who are looking for greater coverage. The ability to quickly prepare the compress in the **microwave oven** (just 70 seconds) makes **Momcozy** the perfect companion for night-time feeding sessions and morning routines.

momcozy

W zestawie 2 miękkie pokrowce

Przyjazne dla skóry i nadają się do prania w pralce

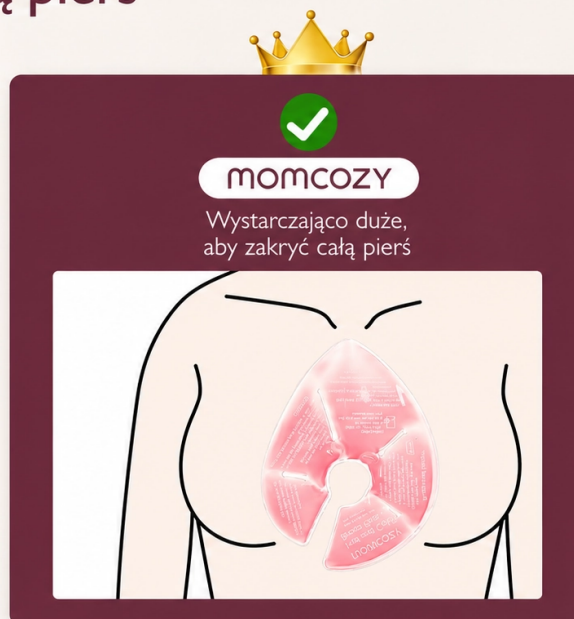

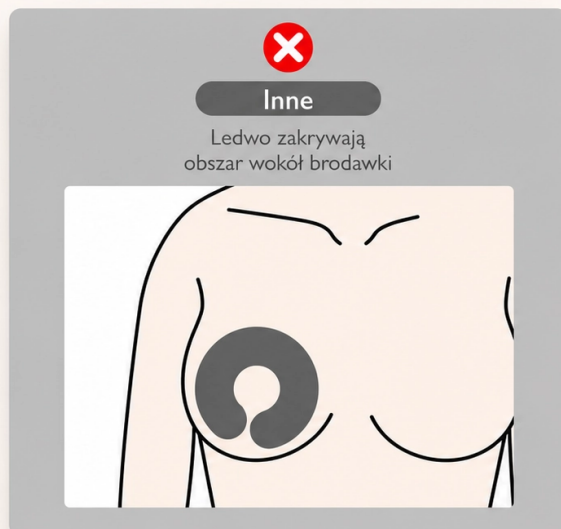

Safety and care during the feeding period

During the breastfeeding journey, the most important thing is the safety of you and your baby. **Momcozy gel breast** compresses are reusable and easy to keep clean. The stable, non-toxic gel provides a constant temperature for a long time, bringing soothing relief to the **breasts**. Whether you are dealing with soreness or want to prevent a situation in which a duct may become **blocked**, these **breast gel compresses** are an excellent choice. It is a product that supports breast health, protects the **nipples** and allows you to enjoy motherhood without unnecessary discomfort.

Całkowicie obejmują całą pierś

Zapewniają kojące odczucie na całej powierzchni
