Manufacturer: MOMCOZY

Referention number: DNXGKJLLMRMMNN

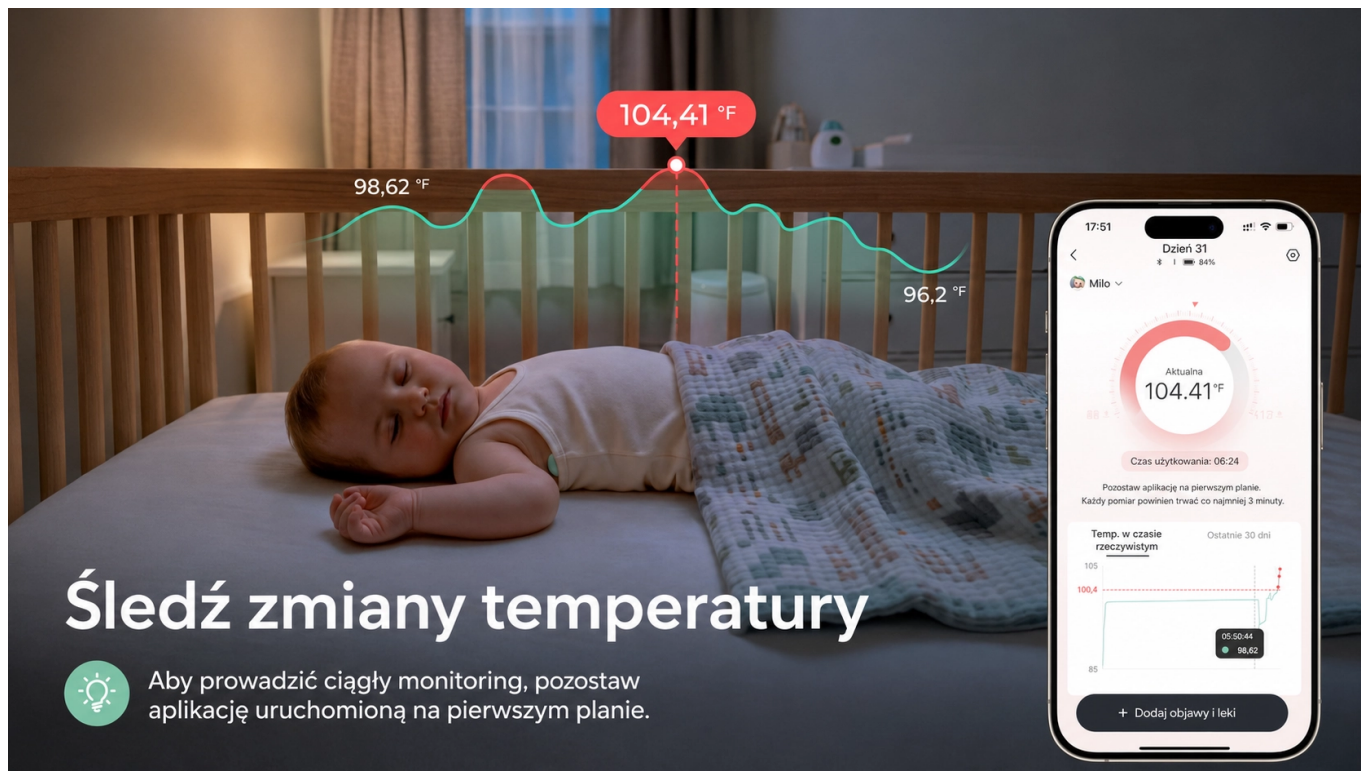

Information:

Momcozy T31 Smart Baby Thermometer is an intelligent thermometer for continuous monitoring of the temperature of infants and children at home. It measures with high accuracy of $\pm 0.2^{\circ}\text{F}$, and automatically sends the data to the Momcozy app, where you can track temperature charts, add symptoms and create profiles for several users. The quiet underarm measurement does not disturb the child's sleep, and the hypoallergenic 3M material helps protect sensitive skin from irritation. The built-in battery provides up to 180 hours of operation, and the practical case makes storage and transport easier.

Full product description

Momcozy T31 Smart Baby Thermometer

Momcozy T31 Smart Baby Thermometer is an electronic thermometer designed for continuous monitoring of body temperature in infants and children. The device enables constant monitoring of the ward's health condition at home, sending data directly to a mobile app. As a result, the product makes it easier to care for a sick child and allows precise measurement data to be collected without the need to repeatedly perform the examination manually.

Śledź zmiany temperatury

 Aby prowadzić ciągły monitoring, pozostaw aplikację uruchomioną na pierwszym planie.

Precise measurement and advanced sensor technology

The design of the Momcozy T31 device is based on a highly sensitive sensor supported by a temperature compensation algorithm. This technological integration means that this baby thermometer provides a stable and precise measurement with an accuracy of $\pm 0.2^{\circ}\text{F}$. A certified, hypoallergenic 3M material compliant with ISO 10993 is used for attachment to the body, preventing irritation of the delicate skin of an infant.

Dokładność pomiaru: $\pm 0,2^{\circ}\text{F}$

Przed Po

Temperature monitoring and stable readings without disturbing the child's sleep

The thermometer is attached directly under the armpit, allowing for a stable, quiet and immediate reading of vital signs. The design eliminates the need to wake the child, so temperature monitoring takes place in a neutral way, without disturbing the child's sleep. To maintain the appropriate accuracy and a high level of hygiene, the disposable attachment element should be replaced every 8 hours, after first cleaning and drying the skin at the application site.

3 proste kroki do bezpiecznego monitorowania

Krok 1

Połącz

Krok 2

Założ

Krok 3

Monitoruj

Aby uzyskać dokładny pomiar:

Przed użyciem delikatnie osusz pachę. Wymień plaster i zmieniaj jego położenie co 8 godzin.

Smart Momcozy app and multifunctional use

The smart device automatically sends the collected information to the dedicated Momcozy app running on a smartphone. The software generates clear charts, allowing the user to easily analyse temperature change trends over a selected time period. In addition, the app allows manual recording of accompanying symptoms and enables separate profiles for multiple users, making it easier to organise medical records for siblings.

Practical design and efficient battery

The Momcozy T31 Smart Baby Thermometer is characterised by a long operating time, thanks to an integrated battery that provides up to 180 hours of continuous use. The set includes a sealed, functional case that makes it easier to transport and store the equipment in suitable conditions. Before starting pairing with the T31 model, the Momcozy app must be updated to the latest version available in the app store.

Technical data

Parameter	Technical specification
Model	Momcozy T31
Sensor accuracy	$\pm 0.2^{\circ}\text{F}$
Mounting location	Under the child's armpit
Attachment material	Hypoallergenic 3M medical material (ISO 10993)
Sticker replacement time	Every 8 hours
Battery life	Up to 180 hours of continuous monitoring
System compatibility	Momcozy app (latest version required, Android and iOS systems)
App features	Trend charts, symptom entry, profiles for multiple people
Set	Thermometer, sealed case, set of starter stickers

Key advantages

- **Precise measurement** - high accuracy of $\pm 0.2^{\circ}\text{F}$ thanks to an advanced compensation algorithm.
- **Quiet and immediate reading** - continuous data transmission without the need to touch or wake the sick child.
- **Skin safety** - the use of proven, hypoallergenic 3M materials minimises the risk of irritation.
- **Efficient battery** - the built-in cell allows the device to be used for 180 hours without interruption.
- **Functional app** - automatic temperature curve plotting and the option to create profiles for several family members.
- **Practical transport** - the sealed packaging protects the thermometer from damage and contamination while travelling.

The product is suitable for

- Parents and carers looking for a tool for constant fever monitoring in infants without having to get up at night.
- People looking for safe medical solutions tested for sensitive, allergy-prone skin.
- Large families who want to keep a record of each child's infections in one organised mobile app.
- Users looking for proven measuring devices to complement a home first-aid kit or newborn essentials.
