Manufacturer: MOMCOZY

Referention number: DNXGKJLMMRMOL

Information:

Momcozy SJ019 is a functional swaddle for newborns aged 0-3 months, designed to help provide a calm and safe sleep by reminding the baby of the conditions in the womb. Made from a soft, breathable blend of 70% bamboo viscose and 30% cotton, it has OEKO-TEX Standard 100 certification, making it safe for delicate skin. The design helps reduce the Moro reflex, while the wide bottom supports the proper development of the hips. Quiet hook-and-loop fasteners and a bottom zip make quick nappy changes easier without waking the little one. The material helps wick away moisture, protects against overheating, and retains its softness after washing.

Full product description

Momcozy SJ019 - A Functional Way to Help a Newborn Sleep Peacefully

Momcozy SJ019 Swaddles For Newborns Serenity is a functional swaddle designed with the youngest children aged 0-3 Months (0-3 months) in mind. This carefully designed blanket helps provide newborns with stable and safe conditions during rest, reminiscent of the environment inside the mother's womb. The product combines the features of a traditional nappy wrap with a **Sleepsack Swaddle** (swaddle sleep sack), making everyday life easier for parents around the world. Thanks to its thoughtful design, this Amazon product supports peaceful **Sleep** (sleep) in children during the first months of life.

Spokojny sen przy każdej zmianie

Ciche i szybkie przewijanie

Bez rozpinania całości — tylko „zzz-zip!”

Spokojniejszy sen
Mniej wybudzeń

Szybkie przewijanie
Bez odpinania

Miękki i delikatny
Dla wrażliwej skóry

Bezpieczny wybór
Sprawdzona jakość

Safe materials and OEKO-TEX Standard 100 certification

The product's construction is based on carefully selected materials that are fully suitable for the sensitive skin of every **Newborn** (newborn). The fabric consists of 70% bamboo viscose (**Bamboo**) and 30% high-quality cotton. This material has the official **OEKO-TEX Standard 100** certification, which guarantees the absence of harmful chemical substances. The fabric structure is exceptionally **Soft** (soft), while also offering optimal elasticity, allowing for a stable **Wrap** (wrap) that moves with the baby's body. Bamboo fibres offer moisture-wicking properties, helping to keep the baby dry throughout the night.

Jednoczęściowy otulacz

Szybkie zakładanie i zdejmowanie

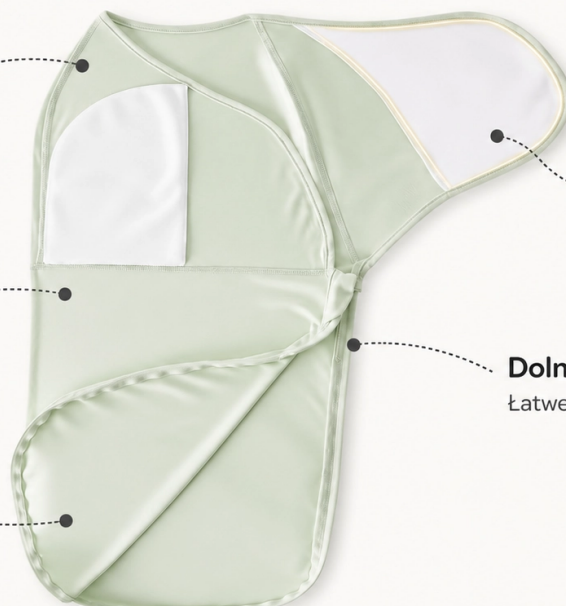

Panele w serek
Bezpieczne dopasowanie

Mieszanka bambusa i bawełny
Przyjazna dla skóry

Szerszy dół
Swoboda ruchów

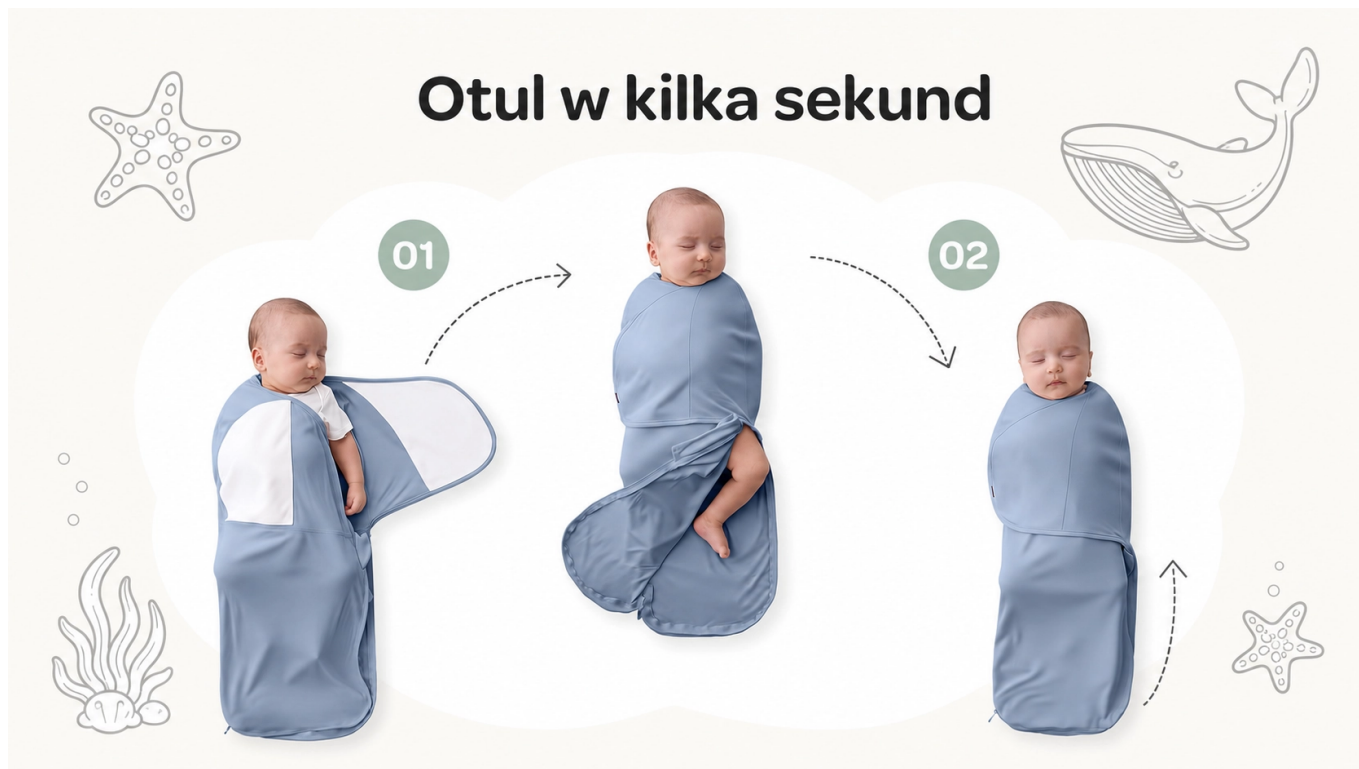

Cichy rzep
Bez wybudzania

Dolny zamek
Łatwe przewijanie

**OEKO
TEX®**

Easy to use, thanks to the Easy Swaddle function for parents

The practical **Design** (design) makes **Swaddling** (swaddling) a simple task even for inexperienced carers. The fastening system is based on quiet **Whisper-Quiet Hook-and-Loop** (quiet hook-and-loop fastening) and a lower **Quick-Bottom-Zip** (quick bottom zip). As a result, the **Baby Swaddle** (baby swaddle) allows for quick nappy changes without having to fully unwrap the baby's upper body. The process is **Easy** (easy) and efficient, which reduces the risk of waking the baby. The product is intended for infants from birth to around 3 months of age (0-3 **Months**), making it easier to adapt to a new environment.

Preventing the Moro reflex and supporting hip health

The one-piece design effectively limits sudden arm movements, known as the Moro reflex (**Startle Reflex**), helping to ensure uninterrupted **Sleep** (sleep) for the baby. The upper part features an adjustable V-shaped neckline with an extended fastening panel, allowing for a precise fit to the body shape of each newborn. At the same time, the lower part of the swaddle is characterised by a wide **Wide Hem** (wide lower hem) cut. This design supports the natural development of the hip joints, allowing the legs to spread and bend freely in line with paediatric recommendations.

Support for thermoregulation and skin protection

The combination of bamboo and cotton fibres provides optimal air circulation, which is crucial in preventing the baby from overheating. The delicate structure of the material protects the skin from irritation and chafing that could occur with rough fabrics. This nappy wrap for newborns reduces wake-ups caused by thermal discomfort, helping to maintain the correct body temperature throughout the night. The product retains its properties and softness even after repeated washing, making it a reliable cot essential throughout the first **Months** (months) of life.

Mieszanka bambusa

Delikatna jak druga skóra Twojego maluszka

Miękki jak chmurka

Wyjątkowo przewiewny

Pomaga utrzymać suchość

Naturalny wybór

Key benefits

- **Safe fabric:** The combination of bamboo viscose and cotton with OEKO-TEX Standard 100 certification protects a baby's skin.
- **Quick changing:** The bottom zip allows nappy changes without waking the baby or fully unwrapping them.
- **Reduced wake-ups:** The design stabilises the arms, helping to limit the Moro reflex and ensure peaceful rest.
- **Healthy hips:** The wide bottom of the swaddle gives the legs freedom of movement, supporting proper anatomical development.
- **Quiet fit:** The use of quiet hook-and-loop technology allows the tightness to be adjusted without creating noise.

The product is a proposition for

- **New parents:** People looking for an easy-to-use solution for safely swaddling a newborn.
- **Babies with a strong Moro reflex:** Children who often wake up because of uncoordinated arm movements.
- **People putting together a baby layette:** Parents who choose certified, breathable materials that help regulate their baby's temperature.
- **Those looking for a practical gift:** A suitable present for a baby shower thanks to its attractive packaging.
