Information:

MOULD KING 10057 Lily Flowers Bouquet Building Set is a decorative construction set with 1006 pieces, from which an impressive bouquet of lilies in pastel colours is created: white, pink, green and blue. The finished model is approx. 46.4 cm tall and is set in a stable white brick-built vase, making it look great on a desk, shelf, chest of drawers or dressing table. It is a stylish decoration for interiors in Scandinavian, boho and minimalist styles, as well as an interesting gift idea for lovers of flowers and creative building. The set requires no watering or maintenance, and the detailed construction of the flowers and vase provides a satisfying building experience and a lasting decorative effect.

Full product description

Pastel bouquet made of building blocks

MOULD KING 10057 Lily Flowers Bouquet Building Set is a decorative construction set that, once assembled, creates a bouquet of lilies in a subtle pastel colour palette. The composition combines white, pink, green and blue elements, making it a good choice as a decoration for a desk, shelf, chest of drawers or dressing table. It is an option for people who enjoy creative building and decorations that do not require watering or care.

Impressive model for display

The finished bouquet is approx. 46.4 cm tall, and its base measures approx. 32.6 x 32.6 cm. This makes the model clearly visible, yet still easy to place in a home interior. The white vase made of blocks creates a cohesive base for the flowers and means the whole piece can be displayed without the need for an additional container.

Decoration with character

Pastel block flowers suit bright interiors, Scandinavian-style arrangements, boho spaces and minimalist rooms. The model can serve as a decoration for a living room, bedroom, teenager's room or workspace. The bouquet also makes a great gift for someone who likes building blocks, floral motifs and hand-assembled decorations.

Stable vase construction

The set includes not only the flowers, but also a vase built from blocks. The open construction lets you see how the stems are routed and how the elements are arranged inside the base. This solution helps keep the composition tidy and allows the finished model to be placed conveniently on a flat surface.

Lily-inspired details

The flowers have been designed from many small elements that form petals, flower centres, buds and leaves. Close-ups show the layered structure of the plant details, making the model engaging to build and satisfying to watch as individual parts turn into a decorative composition.

1006 pieces to assemble

MOULD KING 10057 consists of 1006 pieces, which makes the set a longer and calmer building activity. It is a good choice for people looking for a decorative model that does not go back into the box once assembled, but remains as an interior decoration. The set includes instructions that guide you through the successive stages of construction.
