Information:

MOULD KING 10063S The Money Tree is a decorative brick-built model depicting a lucky tree in a white pot, inspired by the symbol of prosperity, good fortune and positive energy. The 905-piece set combines green leaves, coins and red-and-gold ornaments, creating an elegant, oriental composition ideal for a living room, study, office or collector's shelf. The model offers an enjoyable step-by-step building experience and, once assembled, becomes an eye-catching interior decoration. It is also a great gift idea for fans of building blocks and symbolic decorative pieces.

Full product description

MOULD KING 10063S The Money Tree - brick-built lucky tree

MOULD KING 10063S The Money Tree Building Model Set is a decorative brick set that lets you build an eye-catching lucky tree in a white pot. The model combines a plant motif with symbolism of prosperity, wealth and positive energy, making it a great fit as a decoration for a living room, study, office or collector's shelf. The composition with green leaves, coins and red-and-gold accents draws the eye while retaining an elegant character.

Decoration inspired by a symbol of good fortune

The money tree motif has long been associated with wealth, happiness and prosperity. In this version, it is presented as a model for self-assembly, which after building can serve as an interior decoration. The white pot adds lightness to the whole piece, while the green crown of the tree complements bright room décor well.

Oriental character and decorative details

The model stands out with red hangings, coins and small decorations that refer to the oriental symbolism of luck. Such additions make the tree look more distinctive and can become an interesting accent in the interior. It is an option for people who like decorations with hidden meaning and brick sets with a display character.

Model for display at home and in the office

Once assembled, the tree can be placed on a sideboard, shelf, desk or side table. Its decorative form helps create a pleasant-looking space, and the compact base makes it easy to position the model in different places. It is a set that looks good both in a warm home interior and in a more orderly office space.

905 pieces and an enjoyable building process

The set consists of 905 bricks, allowing for a calm, engaging build of the model step by step. The construction includes the pot, trunk, spreading crown, leaves and decorative elements. Building helps you unwind, and the finished model gives the satisfaction of a decoration made by your own hands.

A gift idea with a positive message

MOULD KING 10063S The Money Tree can be an interesting gift for fans of bricks, decorations and symbolic interior accessories. The lucky tree motif makes the set a good choice for birthdays, Christmas, a housewarming or as a gift for the office. Once assembled, it does not go back into the box, but can immediately become part of the décor.

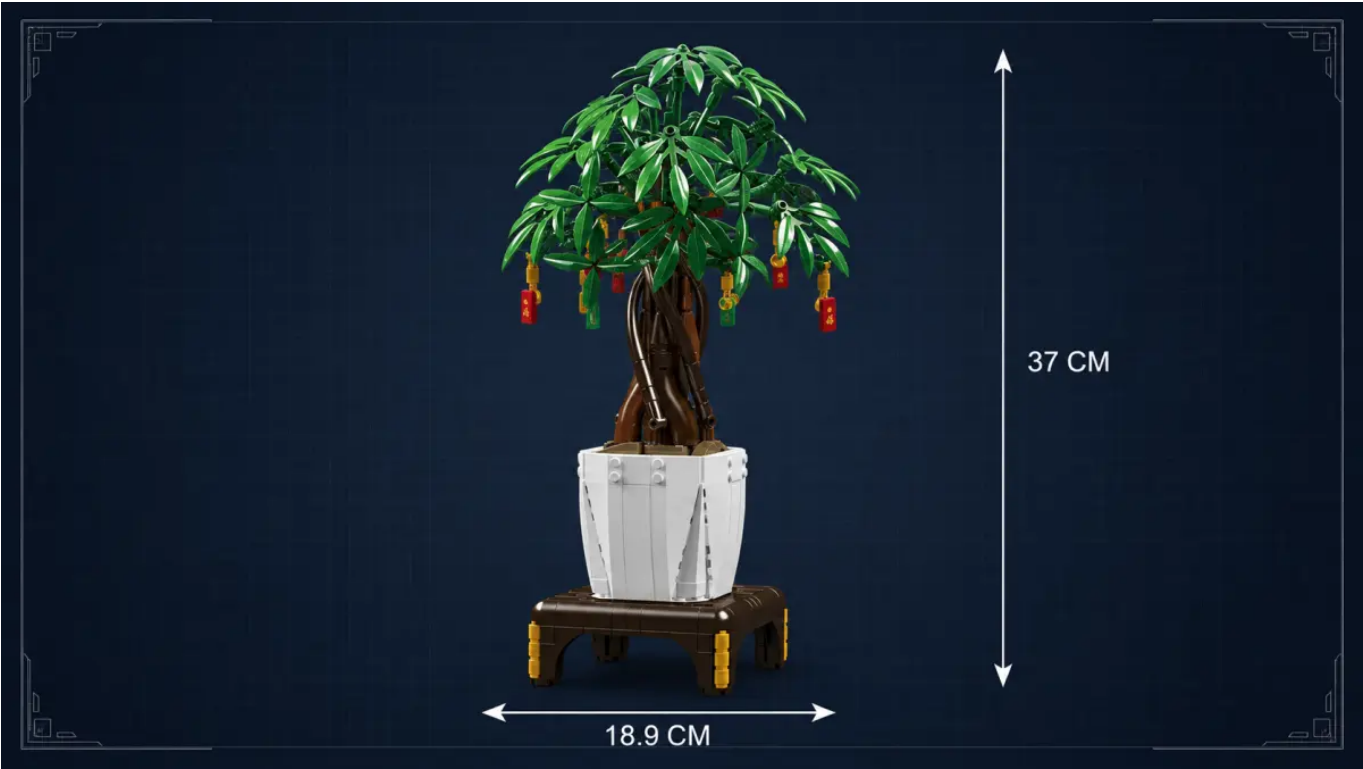

Refined look of the crown and hangings

Particularly noteworthy are the green leaves, red-and-gold hangings and small decorative elements arranged on the branches. The close-up shows that the model is based on many small details that together create a coherent composition. As a result, the tree looks attractive both from a distance and when viewed up close.

Impressive collector’s model

The Money Tree Building Model Set is an option for people looking for a brick set with a decorative purpose. Once assembled, the model has an impressive height, so it looks great among other ornaments. The dark product background highlights its shape, colours and display character.
