Information:

MOULD KING 10138 Black Saber is a collector's construction set inspired by the science fiction atmosphere, allowing you to build an impressive black replica of a lightsaber for display. The model consists of 885 elements, offering an engaging build and a satisfying final result. Its slim shape, dark colour scheme and futuristic details give it a distinctive, dark character, while the included stand emphasises its decorative appearance and makes it easy to place on a shelf, desk or in a collection. An additional LED element enhances the visual effect, making the model an attractive decoration for fans of space-themed replicas and display models.

Full product description

Black Saber Replica

MOULD KING 10138 BALCK SABER is a collector's construction set for fans of science fiction atmosphere, distinctive replicas and display models. The bricks build a black lightsaber with a striking, slender form, mounted on a stand that emphasises its decorative character. The model works well as part of a collection, a room ornament, or a desk or shelf display alongside other sets inspired by cosmic themes.

885 pieces in the set

The set consists of **885 elements**, making the build engaging without being overwhelming in the number of stages. The construction lets you gradually build the hilt, the long blade and the elements responsible for the model's display appearance. It is an option for people who enjoy projects with a strong theme, distinctive colour scheme and a final effect that can be placed straight away in a visible spot.

Dark sci-fi style

Black Saber stands out with its dark colour scheme, contrasting blade and futuristic character. The saber's long shape makes the model look dynamic both on the stand and when viewed from the side. The hilt details and elongated blade line help capture the atmosphere of a replica known from pop-culture stories about space warriors, without the need for unnecessary decorative elements.

Model for display

Once assembled, the **Mould King brick-built lightsaber** can become a strong accent in a collection. The stand makes it easy to place the model on a shelf or desk, and the LED element enhances the visual effect in a darker setting. The set will be an interesting choice for people who like fantasy-inspired models, replicas of weapons from a cinematic universe, and constructions intended mainly for display.

Specification

Parameter	Details
