Information:

MOULD KING 10218 White Dolphin Yacht is an elegant construction set with 857 elements, allowing you to build a stylish model of a white motor yacht with turquoise glazing and orange lifebuoys. The slim hull, detailed deck, cabin, cockpit, sun loungers and communication mast give it a realistic, nautical character. Once assembled, the model measures approx. 36,7 × 10,3 × 18,7 cm and works perfectly as a decoration, a collector's item or a gift for fans of bricks, yachts and display models. It is an engaging yet comfortable project that combines the pleasure of building with an attractive final result.

Full product description

MOULD KING 10218 White Dolphin Yacht - brick-built motor yacht model

MOULD KING 10218 White Dolphin Yacht Building Set is a construction set for people who enjoy nautical models, elegant hull lines and building display-oriented projects. Once assembled, it forms a white motor yacht with turquoise glazing, orange lifebuoys and a carefully designed deck layout. The model works well as a collector's item, a room decoration or a gift for fans of bricks and maritime builds.

857 pieces and an engaging building process

The set consists of 857 pieces, offering a satisfying build without being overwhelming in terms of part count. Step by step, the construction lets you create a sleek hull, cabin, upper deck and details typical of a leisure motor yacht. It is a proposition for people who value calm, creative building projects and like to see a clear result after each stage of assembly.

Elegant silhouette inspired by luxury vessels

The White Dolphin Yacht stands out with its streamlined shape, light colour scheme and proportions that evoke leisure motor yachts. The white hull is broken up by turquoise windows, adding lightness to the model and emphasising its maritime character. Orange accents in the form of lifebuoys enliven the whole, while also helping to convey the look of a vessel ready to set sail.

Deck, cabin and leisure area details

The model includes elements that create the atmosphere of a leisure yacht: a cockpit, seating areas, an upper deck, sun loungers and a communications mast. Such details mean the build is not just a simple shape, but has clearly defined functional zones. As a result, the finished model looks good both from the side and from above, and viewing it from different angles reveals more details.

Display model for a collection

Once assembled, the yacht measures approx. 36.7 × 10.3 × 18.7 cm, so it looks great on a shelf, desk or in a display cabinet with models. Its sleek form and maritime colour scheme make the set an interesting addition to a collection of vehicles, ships or architectural and technical models. It is a construction designed with presentation in mind, so after completion it can remain on display as a decorative accent.

Maritime atmosphere in a compact form

MOULD KING 10218 White Dolphin Yacht combines the theme of sea travel with the pleasure of building with bricks. The model offers a clear motor yacht shape, and its details help create the impression of a vessel ready for a cruise on calm waters or a stop in port. It is a good choice for people who want to add a model with a lighter, holiday feel to their collection.

A gift idea for fans of bricks and yachts

The set works well as a gift for a teenager, an adult hobbyist or a collector of brick-built models. The motor yacht theme makes it stand out from land vehicles and technical machines, while the number of pieces allows for a longer but still comfortable build. The included instructions guide you through the successive stages of construction, making it easier to organise the work and enjoy the process of creating the model from scratch.

A stylish accent for a hobby space

Once assembled, the White Dolphin Yacht can become a decoration for a space connected with travel, model making or maritime themes. The light hull, sleek construction and visible deck details mean the model fits well into arrangements inspired by marinas, sailing and leisure by the water. It is a set that combines the pleasure of building with the aesthetics of the finished construction.
