Information:

MOULD KING 12029 Christmas Train Wonderland is an extensive construction set with 4232 elements, allowing you to build an impressive winter display with a mountain village, snow-covered cottages, Christmas trees, a river, bridges and tunnels. The focal point of the model is a moving red train travelling along a circular track, which adds dynamism and unique charm to the whole scene. The multi-level structure with a waterfall, rocks and illuminated details creates an atmospheric scene visible from every side. It is an engaging project for building enthusiasts and an eye-catching festive decoration measuring 51,1 × 38,3 × 26,5 cm.

Full product description

Christmas diorama full of winter atmosphere

MOULD KING 12029 Christmas Train Wonderland Building Set is an extensive construction set consisting of 4232 pieces, allowing you to build an impressive winter village surrounded by mountains. The central feature of the diorama is a red train travelling along a circular track that leads through bridges and tunnels. The whole scene is completed with snow-covered houses, Christmas trees, a river and numerous festive decorations, creating a setting reminiscent of winter towns.

Picturesque mountain scenery

The design stands out with its multi-level structure depicting rocky mountains, a waterfall flowing into the river, and a railway bridge spanning the valley. Illuminated houses, paths and winter vegetation create a cohesive composition that looks attractive both by day and when the lighting is switched on.

A diorama full of detail

From every side, you can spot more elements of the landscape – tunnels, bridges, houses, trees and a winding railway line. The elaborate layout makes the model inviting to view from different angles and to discover more details during the build and after completion.

Moving red train

One of the most distinctive features of the set is the red train travelling along a route that passes over a bridge and through tunnels. This gives the finished build a dynamic character and draws attention during display. The combination of the moving train and the winter scenery makes the diorama an impressive addition to festive arrangements.

Building full of satisfaction

The set, with over four thousand pieces, has been designed for people who enjoy elaborate construction models. As you assemble the individual modules, you gradually create a complete winter wonderland with numerous buildings, bridges and landscape elements, making the build an engaging project for many hours.

Refined mountain composition

The tall mountain with a waterfall, tunnel and a small chapel at the summit gives the diorama depth and a distinctive character. The varied levels of the structure make the model attractive from every side and faithfully capture the atmosphere of a winter town nestled among the mountains.

Decoration for a festive interior

Once completed, the model can serve as a decoration placed on a table, chest of drawers or near the Christmas tree. The festive colours, winter architecture and moving train help create a unique atmosphere during family gatherings and the winter season.

Dimensions of the finished model

The finished diorama measures 51.1 × 38.3 × 26.5 cm, making it a great standalone festive decoration. Its compact yet elaborate form allows the model to be displayed on a table, shelf or chest of drawers without sacrificing its wealth of detail.
