Information:

MOULD KING 12039 Christmas Train is a construction set with 922 pieces, allowing you to build a decorative model of a Christmas locomotive with wagons, a Christmas tree and presents. The green-and-red train delights with festive details and is perfect as a decoration for the home, a collection or a railway layout. The model has a drive and remote control, so once assembled it can move along the tracks, combining creative building with dynamic play. It is an ideal choice for railway enthusiasts, model makers and seasonal decorations.

Full product description

Christmas train from MOULD KING bricks 12039

MOULD KING 12039 Christmas Train ESU KG230 Diesel Locomotive Building Set is a unique construction set consisting of 922 pieces, allowing you to build a decorative model of a Christmas train. The green-and-red locomotive together with the carriages, Christmas tree and presents creates an atmospheric railway display that works well both for play and as a festive collection ornament.

Locomotive with drive and remote control

The model is equipped with a drive that allows it to move along the tracks and can be conveniently controlled with a remote. This means that once assembly is complete, the user can set the train in motion and create their own festive railway layout. The set combines creative building with the possibility of active play.

Festive details and decorative character

MOULD KING 12039 stands out thanks to its rich festive-themed equipment. The carriages carry a decorated Christmas tree and colourful presents, while the combination of green, red and gold elements emphasises the Christmas atmosphere of the build. The model makes it possible to create an eye-catching decoration for a shelf, table or under the Christmas tree.

Complete railway display with circular track

The set includes the elements needed to create a complete festive railway scene. The locomotive and carriages can move along the prepared track layout, while the additional decorations help build a miniature Christmas world. The construction encourages creativity and the creation of your own arrangements.

Carriage with Christmas tree and presents

One of the distinctive elements of the set is the transport carriage with a large Christmas tree and gift parcels. The detailed design of the carriages makes the whole train look attractive even when stationary, creating an interesting decorative piece for railway enthusiasts and brick model fans.

Set for railway and model-making enthusiasts

922 pieces let you enjoy the building process and recreate many construction details. The model will be an interesting option for people who enjoy building with bricks, collecting railway models and creating seasonal decorations. The finished train can become part of a larger layout or a standalone festive ornament.

Compact dimensions and impressive display

Once assembled, the model retains the proportions typical of railway locomotives while remaining easy to display at home. Thanks to the included tracks, the user can create a closed running layout, and the view from different angles allows the details of the locomotive, carriages and festive accessories to be appreciated.
