Information:

MOULD KING 14001S is an extensive construction model with 783 elements, inspired by the MP5, in an elegant black colour scheme with an orange barrel tip. The set offers engaging assembly and lets you learn how the motor, magazine, trigger and moving elements work. The built-in electric drive activates a mechanism for firing lightweight projectiles, providing interactive target practice. The model has a detachable magazine, adjustable stock, front grip and sight elements. Once assembled, it measures 53 cm in length, 22 cm in height and 4 cm in width, making it ideal both for play and as an impressive collector's display piece.

Full product description

Expanded MOULD KING 14001S construction model

MOULD KING 14001S is a set consisting of 783 pieces, from which a large model inspired by the MP5 design is built. The black colour scheme, orange muzzle end and extensive arrangement of technical elements make the finished build eye-catching both during play and as part of a collection of brick-built models.

Electric projectile-firing mechanism

The built-in electric motor enables the firing mechanism for lightweight projectiles to be activated. After placing them in the magazine and pulling the trigger, the model can fire successive shots, making the set combine assembly with interactive play on the prepared shooting range with targets.

Engaging assembly of 783 pieces

Building the model allows you to learn how the motor, magazine, trigger and moving structural elements work together. Numerous beams, axles, connectors and panels create a compact form, while the included instructions guide the user through the successive assembly stages. The set is suitable as a demanding project for older users interested in mechanics and model building.

Functional construction details

The model is equipped with a detachable magazine, moving trigger, front grip, sight elements and an adjustable stock. The individual solutions increase the appeal of the finished build and allow its configuration to be changed. The orange elements at the muzzle help distinguish the brick-built model from a real object.

Dimensions in line with the product graphic

Once assembled, the model measures 53 cm in length, 22 cm in height and 4 cm in width. This format makes it easy to display the construction details while also making the model comfortable to hold during play. Before purchase, it is worth preparing suitable space for building and later storing the set.

Play using targets

The firing mechanism allows for play involving hitting lightweight targets placed in a safe location. The model should be used under adult supervision and must not be aimed at people, animals, faces, eyes or delicate objects. Following the safety rules helps you use the set's functions responsibly.

Adjustable stock and interchangeable magazine

The stock can be folded and adjusted, allowing the model length to be adapted to display or play. The removable magazine makes it easy to load the projectiles, while the sight elements and front grip add extra functions to the build. Once assembled, the model can serve as an interactive set or as a display piece on a shelf.

Specification

Parameter	Details
Manufacturer	MOULD KING
Model	14001S
Number of pieces	783
Dimensions when assembled	53 × 22 × 4 cm — length × height × width
Set type	Construction model inspired by the MP5
Drive	Electric motor
Firing function	Mechanised firing of lightweight projectiles
Number of projectiles	13 pieces
Moving parts	Adjustable and folding stock, removable magazine, moving trigger
Additional equipment	Front grip, sight elements, assembly instructions
Material	Plastic
Recommended age	14 years and over
Safety rules	Do not aim projectiles at people, animals, faces or eyes; adult supervision recommended
