Information:

MOULD KING 14010S AWM is an extensive construction set with 1628 blocks, allowing you to build an impressive 1:1 scale sniper rifle model. The finished model measures 118.5 cm in length, 27 cm in height and 4.5 cm in width, making it ideal as a display model. The set stands out with its black-and-green design, 8x magnification scope, folding bipod and detachable magazine for five projectiles. The model features a manual loading and firing mechanism, requires no batteries and offers both satisfying building and interactive play. Intended for ages 14 and over.

Full product description

AWM model at scale with 1,628 bricks

MOULD KING 14010S AWM is an extensive construction set that allows you to build a full-size model of a sniper rifle. The build consists of 1,628 pieces and stands out with its distinctive black-and-green design, long barrel, stock, grip, scope and folding bipod. The set works well as a challenging building project as well as an impressive display model for fans of technical constructions.

Impressive assembled dimensions

Once built, the model measures 118.5 cm in length, 27 cm in height and 4.5 cm in width. The 1:1 scale means the construction clearly reflects the proportions characteristic of the AWM model. Its slim shape and length of over one metre contribute to an attractive look on a shelf, desk or in a collection of brick-built models.

Manual loading and firing mechanism

The model is equipped with a manual system for loading and firing the included brick-built projectiles. After each shot, the mechanism needs to be reloaded, so the fun involves not only assembling the construction, but also operating its moving parts. The whole system works mechanically and does not require batteries or any additional power supply.

Folding bipod for stable positioning

The construction includes a folding bipod that helps position the long model on a flat surface. The support makes it easy to display the rifle horizontally, while also making it easier to use the scope and mechanism during play. The bipod can be folded away when the model is being carried or stored.

Scope with 8x magnification

On the upper part of the construction there is a scope offering 8x magnification. This element allows observation through the sight and complements the appearance of the AWM model. The scope is mounted on a raised bracket, making it easy to access when positioning the model on the bipod.

Detachable magazine for five brick-built projectiles

The removable magazine holds five included projectiles made from construction pieces. Being able to detach it allows you to recreate the loading process and better understand how the mechanism works. Moving parts, the trigger and the reloading system increase the functionality of the finished model.

Black-and-green construction with technical details

The combination of green panels with the black barrel, scope and stock elements emphasises the technical character of the set. The construction also includes a grip, trigger, adjustable supports and an orange barrel tip indicating that this is a toy model. The set is intended for users aged 14 and over and can be an interesting addition to a collection of construction models.

Specification

Parameter	Details
Manufacturer	MOULD KING
Model	14010S AWM
Product type	Brick-built construction model with manual firing mechanism
Number of pieces	1628
Assembled dimensions	118.5 × 27 × 4.5 cm — length x height x width
Mechanism	Manual loading, single shot and reloading
Magazine	Detachable, holding 5 brick-built projectiles
Support	Folding bipod
Colours	Green, black and orange
Material	ABS plastic
Compatibility	Bricks compatible with popular construction systems
Recommended age	14+
Set contents	Construction bricks, assembly instructions, scope, folding bipod, magazine and brick-built projectiles
Safety information	Do not aim the projectiles at the face or eyes. The product contains small parts and is not suitable for children under 3 years old.
