Information:

MOULD KING 19015S FH16 is an extensive remote-controlled model of a red tractor truck with pneumatic functions. The set allows you to control the vehicle with a remote control or app, as well as discover moving elements such as the tilting cab, opening front and visible fan. With 4868 pieces, it is a demanding and satisfying project for fans of engineering and trucks. Once assembled, the model is approx. 63.5 cm long and looks great as an eye-catching decoration or part of a collection.

Full product description

FH16 Tractor Unit

MOULD KING 19015S FH16 REMOTE CONTROLLED PNEUMATIC TRACTOR TRUCK BUILDING SET is an extensive construction set for enthusiasts of engineering, heavy vehicles and models with moving functions. Once assembled, it forms a red tractor unit with a massive silhouette, a refined cab and an industrial character. The model works well both during assembly and as part of a collection of brick-built technical vehicles.

Remote control

The set allows the model to be controlled using a remote control or a phone app. This means the truck can move once assembled, and the user can operate selected vehicle functions. This solution increases the appeal of play and means the model is not only a static display piece.

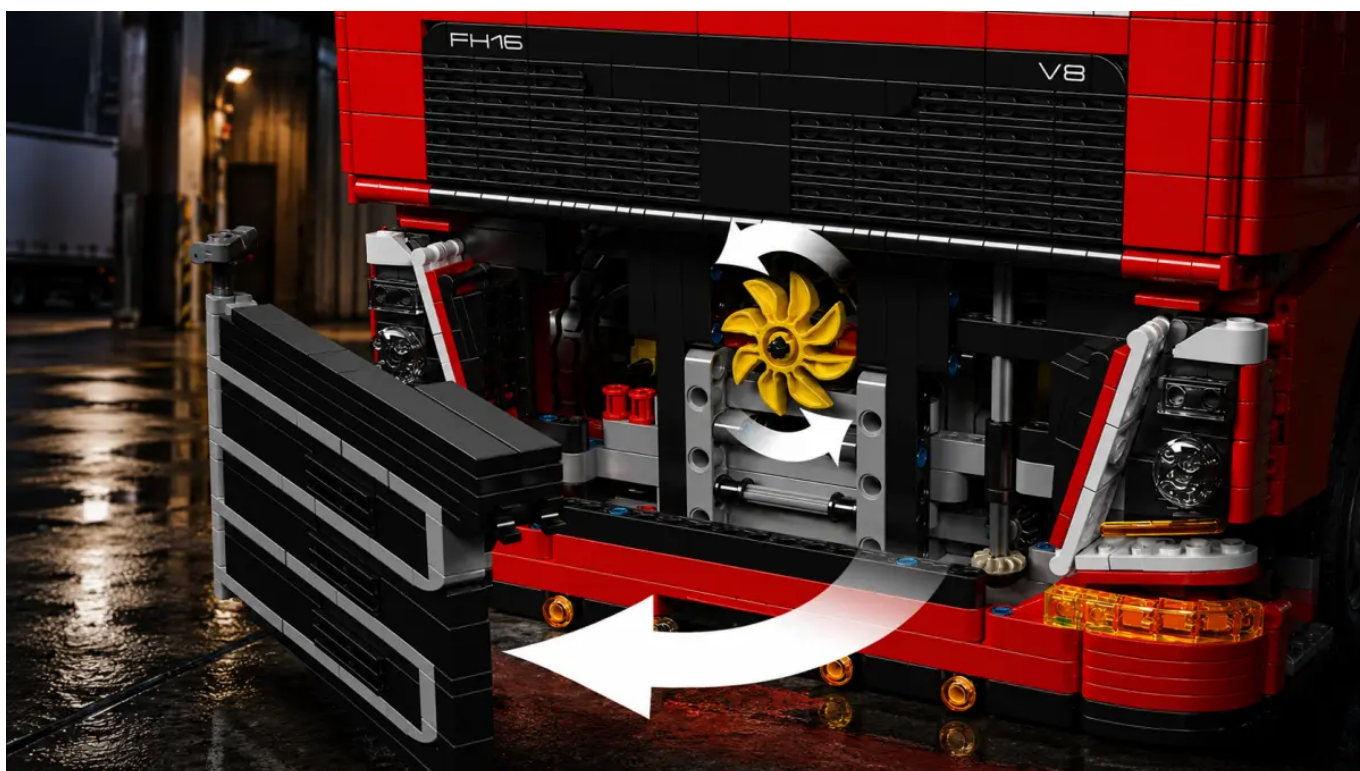

Pneumatic functions

The model has been equipped with pneumatic elements that make it possible to replicate the operation of mechanisms based on compressed air. This solution contributes to the more technical character of the build and makes it easier to understand how moving systems work in large commercial vehicles.

Moving elements

The tractor unit offers many details that make the finished build more interesting. The tilting cab, opening front, visible fan and mechanical elements help you take a closer look at the vehicle's construction after assembly. The model looks good from various angles, so it suits a collection of brick-built technical machines.

Large brick-built project

The set consists of 4,868 pieces, making it a proposition for those who enjoy longer and more engaging construction projects. Assembly requires patience, good organisation and careful following of the instructions. The finished model is approx. 63.5 cm long, so it stands out strongly on a shelf, desk or in a larger display.

Specification

Parameter	Details
Model	MOULD KING 19015S FH16 Remote Controlled Pneumatic Tractor Truck Building Set
Number of pieces	4,868 pieces
Dimensions when assembled	approx. 63.5 × 30.5 × 41 cm
Remote control	Yes, remote control / phone app
Mechanical control	Yes, the model has moving functions and pneumatic elements
Model type	Brick-built FH16 tractor unit with RC functions and pneumatics
Power supply	Battery for the model included; remote control requires batteries
Recommended age	14+
