Information:

MOULD KING 20014S TIGER HEAVY TANK MODEL BUILDING SET is a construction set with 850 pieces, allowing you to build a grey model of the Tiger heavy tank with realistic military details. The tracked vehicle stands out with its massive silhouette, movable turret and adjustable barrel, making it look excellent in a collection. The model offers remote control via a remote controller or mobile app, enabling it to drive forwards, backwards and turn. It is an attractive option for fans of technical models, military vehicles and building blocks with moving functions.

Full product description

Tiger Tank from Bricks

MOULD KING 20014S TIGER HEAVY TANK MODEL BUILDING SET is a construction set for people interested in military vehicles, engineering and models with moving functions. Once assembled, it forms a grey tracked tank inspired by a heavy combat vehicle. Its distinctive shape, long barrel and robust running gear make the model look great as a collector's item.

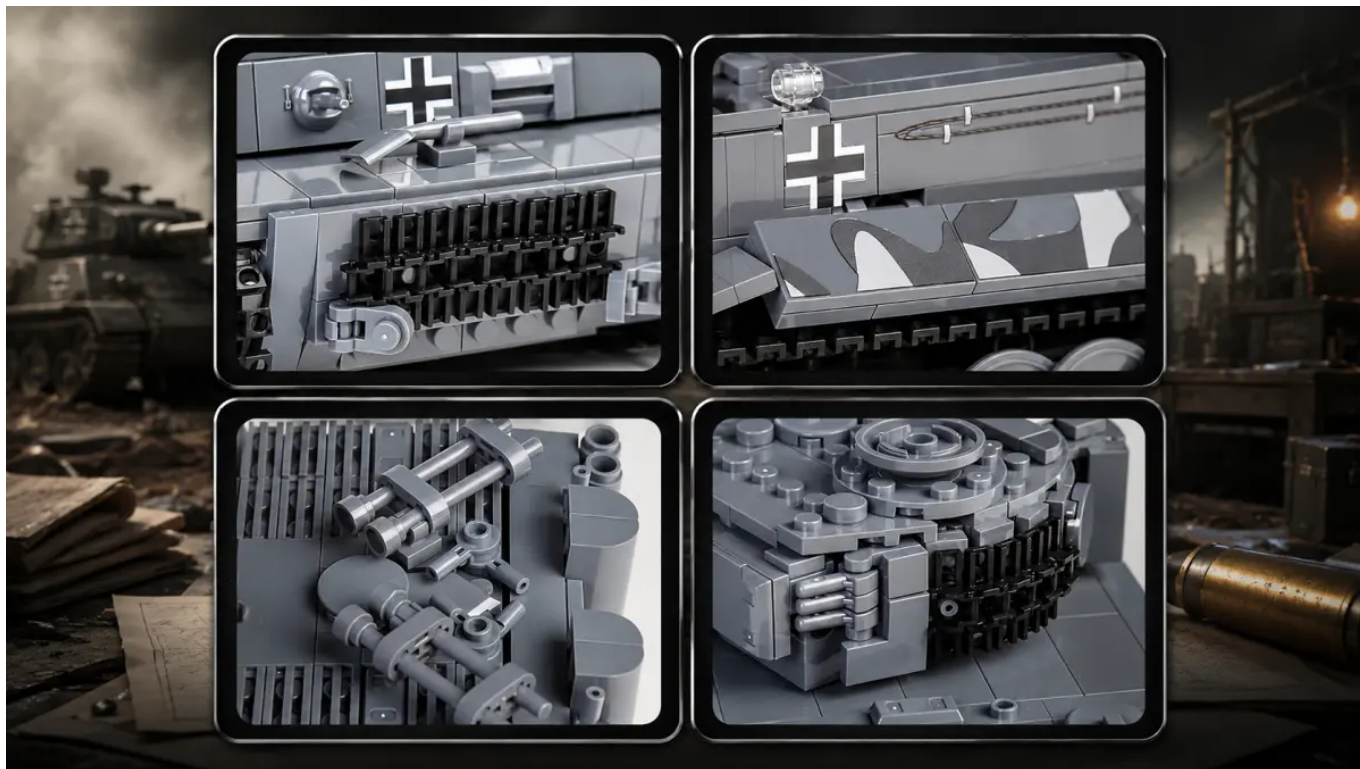

Remote control

The model offers remote-control functions, so once assembled it does not have to serve only as a display piece. The tank can be driven using a remote control or a mobile app. Control includes moving forwards, backwards and turning, which allows for active play and testing the tracked running gear.

Details of the combat vehicle

The construction draws attention with details typical of military models. The turret, armour, barrel, hull elements and tracks form a coherent whole that resembles a heavy battle tank. The movable turret and adjustable barrel position allow you to adapt the model's appearance during play or display.

Construction with 850 pieces

The set consists of 850 pieces, so it will be suitable for people looking for a technical model of medium complexity. Building it allows you to learn about the layout of the hull, turret and tracks, and the finished model measures approx. 24.4 cm in length. It is an option for fans of bricks, military vehicles and models with moving functions.

Specification

Parameter	Details
Model	MOULD KING 20014S Tiger Heavy Tank Model Building Set
Number of pieces	850 pieces
Dimensions when assembled	approx. 24.4 × 13 × 11 cm

Parameter	Details
Control	Remote control via 2.4 GHz remote or mobile app
Mechanical functions	Forwards and backwards movement, turning, turret rotation, barrel adjustment
Model power supply	Power module / battery in the model, charging via USB cable
Remote control power supply	2 AAA batteries, no information on batteries being included in the set
Model type	Brick-built Tiger tank with RC functions
Material	ABS plastic
Recommended age	14+
