Information:

MOULD KING 22006 Himeji-jo Castle is an extensive Japanese castle model with 3086 pieces, inspired by traditional Japanese architecture. The set stands out with its multi-level structure, black roofs, gold details, a stone base and decorative cherry blossom. The modular construction allows selected floors to be lifted to admire the detailed interiors, courtyard and samurai-inspired accents. It is an impressive project for fans of architecture, history and collectible buildings, ideal as a decoration for a shelf or desk.

Full product description

Himeji Castle, Japan

MOULD KING 22006 HIMEJI-JO CASTLE BUILDING MODEL SET is an extensive construction set inspired by Japanese architecture. The bricks create an impressive castle with a multi-level structure, black roofs, gold details and a decorative cherry blossom tree. The model is well suited as a building project for fans of architecture, history and collectible brick-built structures.

Interiors and courtyard

The castle offers not only an attractive exterior, but also carefully designed interiors. The structure includes rooms, a courtyard, furnishings and motifs referring to samurai aesthetics. Such details make the building process more varied and ensure that the finished model is appealing to view from many angles.

The atmosphere of old Japan

Characteristic roofs, light walls, a stone base and a pink cherry tree create a composition associated with traditional Japanese architecture. The model looks great on a shelf, desk or as part of a larger display of brick-built structures. The castle's subdued colour scheme is broken up by gold accents and decorative greenery.

Modular construction

The structure consists of 3,086 pieces, allowing you to create a large display model with many details. The modular form makes it possible to lift selected floors, making it easier to look inside and view the interiors once the build is complete. It is an interesting option for those who enjoy calm, engaging construction projects.
