Information:

MOULD KING 23002S HZ-R is a detailed racing motorcycle model with 656 pieces, inspired by track machines. The black and green colour scheme, gold and silver details, and sporty fairings give it a dynamic, technical look. The model stands out with a visible engine, an extensive exhaust system, an exposed frame and details imitating carbon fibre. Once assembled, it measures approx. 31,7 cm in length, 11,7 cm in width and 18,5 cm in height, and the included stand makes display easy. It is an attractive set for fans of motorcycles, technical builds and collectible models.

Full product description

MOULD KING 23002S HZ-R Racing Motorcycle

MOULD KING 23002S HZ-R is a detailed racing motorcycle model that combines a dynamic silhouette with a structure made up of 656 pieces. The black-and-green colour scheme, sporty fairings and contrasting gold and silver details give the machine a character inspired by track motorcycles. Step-by-step building lets you watch as an eye-catching construction emerges from individual parts, with a visible engine, exhaust system and distinctive body line.

Sporty silhouette inspired by track machines

The side profile of the model highlights the low-slung body line, the angled handlebar position and the elongated rear section of the structure. Large wheels, an exposed frame and a clearly defined power unit make the motorcycle look attractive both during assembly and once displayed on a shelf. Green frame elements break up the dominant black, while carbon-fibre-style surfaces reinforce the technical character of the whole project.

Detailed front with fairing and handlebars

The front of the motorcycle draws attention with a transparent windscreen, sporty fairing and compact handlebar assembly. Gold suspension elements provide a strong colour accent and work well with the black covers and green frame. The individual parts have been arranged to reflect the layered construction of a real machine, so while building you can take a closer look at the relationships between the wheel, fork, handlebars and bodywork elements.

Distinctive rear and stable construction

The rear view reveals a wide wheel, a tapering seat section and the sport-shaped tail of the motorcycle. The multi-layered construction consists of technical elements, panels and connectors that create a coherent whole without hiding the model's mechanical character. The included stand helps position the motorcycle for display, so the finished project can become part of a vehicle collection, a room decoration or a desk display piece.

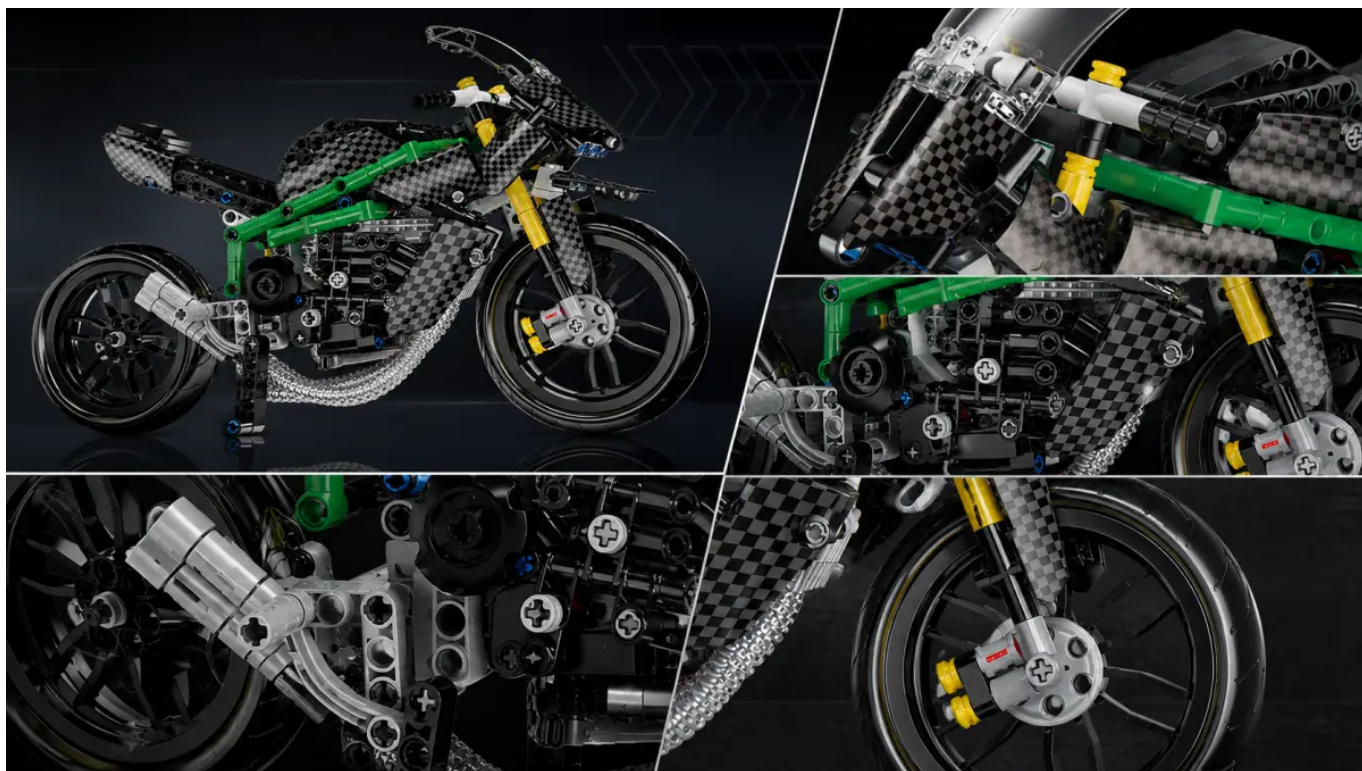

Impressive model over 31 cm long

Once assembled, the motorcycle measures approximately 31.7 cm in length, 11.7 cm in width and 18.5 cm in height. These proportions make it possible to showcase many structural details, while also ensuring the model is easy to place on a shelf, chest of drawers or in a display cabinet. The slim silhouette, large wheels and extensive detailing are clearly visible from different angles, so the model can be presented both in a classic side view and at an angle showing its front fairing and engine.

Mechanical details that enhance the model's realism

The construction stands out thanks to numerous details that encourage a close look at the motorcycle. The visible engine has been complemented with cables, covers and elements resembling powertrain components, while an extensive exhaust system has been placed by the rear wheel. The front fairing, wheel disc, fork and carbon-fibre-pattern panels create a multi-layered composition. The large number of pieces helps to make the building process more varied and gradually reveals further sections of the machine.

A project for motorcycle and technical construction enthusiasts

MOULD KING 23002S HZ-R may appeal to people who enjoy sporty vehicles, mechanical constructions and models designed for self-assembly. The set offers an engaging building process in which the frame, engine, suspension, wheels and bodywork elements are created one by one. Once completed, the motorcycle attracts attention with its aggressive line, contrasting colours and numerous details inspired by racing machines, making it a strong addition to a collection of brick-built models.

Specification

The key information about the MOULD KING 23002S HZ-R set is shown in the table below.

Parameter	Details
Model	MOULD KING 23002S HZ-R Motorcycle Model Building Set
